

# “Krypto the Superdog”

## STATEMENT OF EDUCATIONAL MISSION

Miki Baumgarten, Ph.D.

February 2006

### GENERAL EDUCATIONAL GOAL AND RATIONALE:

“Krypto the Superdog” is intended to acquaint youngsters with the meaning of heroism and to inspire them to act proactively, righteously, and heroically in their own lives. On the surface, Krypto appears to be a normal, loyal, and fun-loving mutt. He is a playful companion to his young master, Kevin; and an integral member of a distinctive community of neighborhood pets. In this way, Krypto's character and everyday life mirrors that of his original master, Superman's, Clark Kent alter-ego. But just as with Superman, beneath Krypto's “mild mannered” appearance lies an array of amazing powers, drive and heart. Superman taught a past generation the importance of using one's abilities effectively for just causes. Krypto does the same for today's young viewers by acting as an engaging model for ethical actions, pro-social behaviors and heroic deeds.

By incorporating this important learning goal in a context of fun and laughter, “Krypto the Superdog” also gives kids a chance to hone and develop their burgeoning sense of humor. In his ground-breaking studies, respected developmental psychologist, Anthony J. Chapman, found evidence that humor can be encouraged and taught through modeling. There is indication too that a sense of humor fulfills meaningful purposes for young children – helping them to cope with difficult and challenging situations, to understand language and to develop social skills.

### EDUCATIONAL OBJECTIVES:

To teach viewers the value and importance of heroism, involving empathy for the plight of others, initiative, independence and courage.

To assist viewers to learn to act effectively and judiciously in a range of situations – being prepared for eventualities, setting priorities, employing clear thinking and rational judgment, and taking tasks through to completion.

To aid viewers to develop positive personal and prosocial qualities, including self-esteem, perseverance, cooperation and leadership.

To spark and broaden viewers' maturing sense of humor in order to aid intellectual development, enhance resilience, and help them to see the fun of new learning.

#### TARGET AUDIENCE:

The target audience for "Krypto the Superdog" is made up of four to six year-old boys and girls across a broad spectrum of racial, ethnic, and socio-economic categories. The level of educational content is varied so as to be meaningful to children throughout the age range -- challenging younger viewers and reinforcing learning for older ones.

#### EDUCATIONAL FORMAT:

The general educational goal and discrete educational objectives are fully integrated with the story-lines, characters and settings dealt with in "Krypto the Superdog." By focusing on the exploits, adventures and relationships of a super special dog, the series provides the young viewing audience with a fascinating, non-threatening and relatable arena from which to observe and learn from the actions of others. Learning is engaging, natural, and part of the overall fun of the series.
