She died three months later and her death was ruled suicide. Stephens married Stephanie and shortly after became seriously ill, suffering from liver failure, hepatitis C and diabetes. Stephanie said that her husband became depressed as his health declined and on May 1, 2001, she said she woke to find him lying dead next to her. Despite her claim that she had nothing to do with Dr. Stephens' death, authorities were suspicious. An autopsy revealed the presence in Stephens' blood of the drug Atracurium, a muscle relaxer used in surgery. Stephanie was tried and found guilty of murder and will serve at least 30 years in prison. She is trying for an appeal. Segment titles: "Voices From The Past"; "Talk Of
