Carlos Quiroz  
Celina Salas

### Issue Addressed in this Program

Description on how the issue was covered:

1. What is the Latino Leadership Council? What do you guys do?
2. You guys offer a lot of services to the Latino community, let's talk a little bit today about what you offer in terms of health care services to Latina women, specifically.
3. What happens if someone out there is sick, doesn't have medical insurance, can you help them out?
4. In addition to physical health, many in our community are facing mental health challenges, like depression, isolation, anxiety and more. What services do you have that can help women facing these challenges?
5. What are some of the mental health challenges that you see in the community and how are you addressing them?
6. What is the cost for people to get these services?
7. Can anyone get these services or are there any requirements?
8. If someone out there needs services, how can they get in touch with you?

Time: 7:30am  
Duration: 30 min  
Talent: Alma Garcia

### GUEST:

Enfermedades del Corazon  
Dr. Diane

## Issue Addressed in this Program

Description on how the issue was covered:

Five numbers, that all women should know to take control of their heart health are:

1. Total Cholesterol
2. HDL (good) Cholesterol
3. Blood Pressure
4. Blood Sugar
5. Body Mass Index (BMI)

Knowing these numbers can help women and their healthcare provider determine their risk for developing cardiovascular diseases. It's time for all women to learn the most critical numbers in their life -- their hearts depend on it.

Here's how:

1. Understand Risk Factors
  - There are some you can control like blood pressure, smoking, cholesterol, lack of regular physical activity, and some you can't control like age, gender, and family history.
  - That's why it is important to Know Your Numbers, learn your Family History and discuss all risk factors with your healthcare provider.
2. "Know Your Numbers"
  - Five numbers can change your life - Total Cholesterol, HDL (good) Cholesterol, Blood Pressure, Blood Sugar and Body Mass Index (BMI).
3. Take Action and Manage Your Numbers
  - Schedule a separate visit with your healthcare provider to learn these numbers and commit them to memory.
  - Work to improve your numbers, if necessary.
