Girls Scouts

Issue Addressed in this Program

Description on how the issue was covered:

Background/history of Girl Scouts

Girl Scouts was founded in 1912 by Juliette Gordon Low in Savannah, Georgia.

Girl Scouts has always been an inclusive organization. Any girl between 5-17 years old can join.

Some troops focus on outdoors--we have great summer camps and dat camps--while other troops focus on special interests such as science, travel, community service and more. There is so much to learn and enjoy as part of a Girl Scout troop.

Girl Scout troops typically have about ten members and two leaders. They can join a troop near their home or school.

And some fun facts

Many Supreme Court justices, doctors, professional athletes, teachers, business leaders and more established their business sense and sense of team work through Girl Scouts.

Girls can earn scholarships and other awards through Girl Scouts.

Research shows that girls involved in GS have higher self-esteem, more confidence, a stronger sense of self and higher aspirations than those who are not. We teach girls that anything is possible and that they can reach their dreams. 😊

GSHCC serves 18,000 Girl members in our 18 county area.

Diane Sobkowicz
Enfermedades del Corazon

Issue Addressed in this Program

Description on how the issue was covered:

Five numbers, that all women should know to take control of their heart health are:

1. Total Cholesterol
2. HDL (good) Cholesterol
3. Blood Pressure
4. Blood Sugar
5. Body Mass Index (BMI)

Knowing these numbers can help women and their healthcare provider determine their risk for developing cardiovascular diseases. It's time for all women to learn the most critical numbers in their life -- their hearts depend on it.

1. Understand Risk Factors
 - There are some you can control like blood pressure, smoking, cholesterol, lack of regular physical activity, and some you can't control like age, gender, and family history.
 - That's why it is important to Know Your Numbers, learn your Family History and discuss all risk factors with your healthcare provider.
2. "Know Your Numbers"
 - Five numbers can change your life - Total Cholesterol, HDL (good) Cholesterol, Blood Pressure, Blood Sugar and Body Mass Index (BMI).
3. Take Action and Manage Your Numbers
 - Schedule a separate visit with your healthcare provider to learn these numbers and commit them to memory.
 - Work to improve your numbers, if necessary.

Description on how the issue was covered:

SUMMER MEALS Martha Carrillo, Natomas Unified School District

What are summer meals and when are they being served?

Why are summer meals important?

There's no cost? How are these meals funded?

How can parents find a summer meals site that is convenient for them?

- Summermeals.org

It sounds like you are trying to spread the word. What do you want parents to know?

- No cost

- No paperwork

- No need to sign up

- Find a site that's safe and convenient for your family, where your kids can be with other kids and enjoy activities offered. For information about how to find activities for kids this summer...

Why the focus on fresh fruits and vegetables?

Which summer crops will be in season here?

Can you tell us about the types of meals (recipes) that will be served during the summer meals program?

What are the benefits of serving food that is grown locally?

What types of changes is your school district making to ensure that children have the opportunity to enjoy fresh produce during the school day?

How can schools and farmers team up to offer kids in California the freshest fruits and vegetables?
