As recently as the early 80s, about three of every four doctors in the U.S. worked for themselves, owning small clinics. Today, some 75 percent of physicians are employees of hospital systems or large corporate entities. Some worry the trend is leading to diminished quality of care and is one reason doctors at a large Midwestern health provider decided to unionize. Fred de Sam Lazaro reports.

Series Title: NOVA
Episode Title: Polar Extremes
Length: 120 minutes
Airdate: 3/20/2024 8:00:00 PM
Service: PBS
Format: Other
Segment Length: 01:52:46

Join renowned paleontologist Kirk Johnson on an epic adventure through time at the polar extremes of our planet. Following a trail of strange fossils found in all the wrong places—beech trees in Antarctica, hippo-like mammals in the Arctic—Johnson uncovers the bizarre history of the poles, from miles-high ice sheets to warm polar forests teeming with life. What caused such dramatic changes at the ends of the Earth? And what controls the dial on Earth's thermostat? Today, the Arctic is warming faster than anywhere else in the world, and Antarctica has locked in its ice enough water to raise sea level by a terrifying 200 feet. The way that the poles respond to a warming climate is one of the greatest wildcards in predicting our climate future. Johnson uses Earth's history, written in stone, as a cipher to decode what is going on at our polar extremes today, and what the future may hold.
