

Federal Communications Commission Washington, D.C. 20554 April 4, 2022

Adam Biddel, CBSO Family Life Broadcasting System 7355 North Oracle Road Tucson, AZ 85704

Re: Family Life Broadcasting System (FLBS)

KFLB(AM), Odessa, TX

Facility Identification Number: 39900 Special Temporary Authority (STA)

BESTA-20220323AAE

Dear Mr. Biddel:

This is in reference to the request filed on March 23, 2022. FLBS requests an extension of the STA granted on October 6, 2021, to continue operating with reduced power to allow time to complete repairs due to an RF module failure. In support of the request, FLBS stated that the transmitter was not repaired or replaced over the past six months.

that although many repairs have been completed, it has been unable to repair the 50 kW transmitter over the past two years.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA is GRANTED, and FLBS may continue to operate ND daytime with a reduced power of 0.5 kW, and DA nighttime with a reduced nominal power of 0.3 kW. FLBS must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR

¹ KFLB(AM) is licensed on 920 kHz with 1 kW day (ND) and 0.5 kW night (DA).

§ 1.1310. FLBS must submit an e-mail to my attention to note the date the station resumed licensed operations per BML-20051114AOJ with negligible changes to all operating parameters.

This authority expires on October 3, 2022.

Sincerely,

Joseph Szczesny, Engineer

Audio Division Media Bureau
