	Economic Update	The so-called 'decoupling' of the US and Chinese economies is NOT happening. Their The reality hidden by 'decoupling' is just capitalism's usual uneven development. Capitalism economies are too deeply intertwined. Capitalism relocated investment away from its old centers (Western Europe, North America and Japan) to China, India, Brazil et al. The US cannot stop or reverse that process any more than Britain could stop or reverse it in the 18th and 19th centuries. Wars fail or worse. The only real option is mutual accommodation.	01/17/2024	9:00 - 9:30 AM	28 Minutes
	Economic Update	In this week's show, Prof. Wolff analyzes the corporation. It stands as a basic institution blocking real democracy in our society. The corporation's structure and operations empower and enrich a tiny social minority at the expense of the people's wealth and democratic power. Like the critiques of slave plantations and feudal manors that preceded the disappearance of those systems, the growing critique of capitalism reflects but also informs critical social movements now.	01/24/2024	9:00 - 9:30 AM	28 Minutes

	Economic Update	This week's updates are divided into two parts. Part A: the special dimensions and qualities of the US labor movemen's current dynamism, Piketty shows capitalism generates widening wealth and income gaps leading to crashes or else simmering, divisive, domestic resentments. The system itself becomes destabilized. It can then lurch to the left as happened via The New Deal in system itself becomes destabilized. It can then lurch to the left as happened via The New Deal in the USA or right as in Nazi Germany, Italy and Spain (fascism). Both movements advocated gov't intervention to stabilize capitalism: one left, one right. The left worked via massive supports to working people (minimum wages, gov't jobs, social security, etc.). The right went to try forced labor, anti-immigrant efforts, demonizing immigrants to support employers. Turns right have their parallels now: Brexit, Trump, Milei (Argentina) and Miloni in Italy. The big question: since all the rightward moves failed and sent Germany, Italy and Spain over into social democracy, will their behavior be equaled again?	02/07/2024	9:00 - 9:30 AM	28 Minutes

Pacific Business Talk	Patent and Trademark Law Phillip Edward Page, B.S., J.D., LL.M. Professor of Law Emeritus South Texas College of Law "We #southtexascollegeoflaw have a program that gives free legal advice to #smallbusinesses wanting to register and protect their brands. Small merchants sometimes have a tough time getting off the ground, and getting legal protection for their trademarks can be expensive with law firms and tricky without. Through a program blessed by the U.S. Patent and #trademark Office (PTO) we take clients, do all the initial vetting, examine the mark for possible conflicts, and prepare the registration paperwork that goes to the government. We even have a fast-track with the government to get applications processed. And we do it all for free. The advantages of getting one's mark properly registered can be enormous. We are the only law school in Houston providing these services. I would love the opportunity to discuss with you how to get the word out to the business community about our program and the advantages brand protection can have, whether for established businesses or start-ups. One of the flows near Ft Stockton is so bad there they declared a no fly zone over it. Bill pointed out the Railroad Commission is way understaffed to monitor millions of abandoned wells and the lack of enough money to run the railroad commission.
