**Issue:** Trends in Politics

**Time Aired:** 10:25 AM

**Duration:** 3:59

**Description:** John Stonestreet warns listeners not to withdraw from politics even though the newly elected leaders may give a reprieve from aggressive anti-Christian policies. After the new administration attempts to dismantle the Obama agenda, "there may very well be an equal and opposite reaction." He reminds listeners that national elections are every two years, and "... politics most often is downstream of culture. Culture will shape politics. And as Chuck (Colson) said during his final speech, the culture is shaped by "the cult," its belief system, what people truly believe and care about."

Oshkosh reversed their decision and will be including Asher in their 2017 marketing campaign. Meaghan told CNN, "Using people with special needs [in advertising] shows the world that these people have value and worth just like any typical person does."

**Date:** 1/4/2017 **Station:** FM  
**Program Name:** Breakpoint  
**Issue:** Planned Parenthood  
**Time Aired:** 10:25 AM  
**Duration:** 3:59  
**Description:** John Stonestreet describes the waning days of 2016, "...when most eyes were turned to the Trump team transition or holiday distractions, the Obama administration developed a new and reprehensible rule to preserve funding for Planned Parenthood, the nation's largest abortion provider." He outlines what appears to be a refusal to give up on the part of the Obama administration. In response to states who have redirected Title X funds from Planned Parenthood to other organizations that offer health care to uninsured and low-income Americans, a new rule (not a law) invented and adopted by the Department of Health and Human Services prohibits states from blocking Planned Parenthood from receiving the Title X family planning services grant money. Congressional Republicans have already told federal agencies to forget about "finalizing pending rules or regulations in the administration's last days." They warn that they will work to "ensure that Congress scrutinizes" their actions--and, if appropriate, will even "overturn them--pursuant to the Congressional Review Act," a law that allows rules issued in the waning days of an administration to be removed.

But the story doesn't begin here. "If the Chinese government had had its way, Anni would never have been born. Anni was a second child at a time when China's One Child policy was in brutal effect. Millions of Chinese women were forced to undergo abortions for the "crime" of expecting a second child. Anni recently gave a piano performance at Carnegie Hall, and Mr. Metaxas wonders how many aborted children might have become pianists, medical researchers, farmers, soldiers, artists, and moms and dads themselves. As the 44th anniversary of Roe v. Wade approaches, he urges people to join the "21 Days of Prayer for Life" campaign.

In Mr. Colson's words, "Many think of King as a liberal firebrand, waging war on traditional values. Nothing could be further from the truth. **Duration:** 3:59  
**Description:** Eric Metaxas tells about a hoax that was published in a postmodern literary journal by Alan Sokal entitled "Transgressing the Boundaries: Toward a Transformative Hermeneutics of Quantum Gravity". He tells that he was attempting to "expose the sloppiness, absurd relativism, and intellectual arrogance" of "certain precincts of the academic humanities." This same journal also published an article arguing that the "Western assumption that there are only two sexes" is being refuted by 'a rainbow of gender' purged of 'the binary male/female model.'" Mr. Metaxas asserts that this is more unscientific gibberish, but refuting it is not as simple as "inviting someone to step outside a 21st floor window" as Mr. Sokal did after his article was published and he came clean about it.

**Issue:** Abortion  
**Time Aired:** 12:45 PM  
**Duration:** :60  
**Description:** John Stonestreet suggests that when the pro-abortion argument of "Human life doesn't begin until long after conception" surfaces, we should respond with "basic biology." He recommends listeners ask pro-choice friends two questions. First, when did they begin being alive? Secondly, ask if they are human and when they became so. Consequently, how can a non-living embryo magically grow into a living child?

John Stonestreet suggests both would do well to read Jacques Ellul's "The Political Illusion," an insightful diagnosis of mankind's tendency to make a god out of politics.

<b>Issue:</b>	Racial Prejudice		
<b>Time Aired:</b>	12:45 pm		
<b>Duration:</b>	:60		
<b>Description:</b>	John Stonestreet comments on a new movie, "Hidden Figures," the true story of three African-American women whose math skills helped put the first American into orbit in 1962. Katherine Johnson--the main character of the story, a widow and mother of three--also had to contend with a bunch of white male engineers at NASA who, frankly, didn't want her around. Add to that the NASA's Langley Research Center was in segregated Virginia--separate bathrooms, coffee pots, and all--and it's a wonder Ms. Johnson endured. But she did--finding strength in her church, her family, and as the movie subtly shows--her faith in Christ.		

**Date:** 1/23/2017 **Station:** FM  
**Program Name:** Breakpoint  
**Issue:** Youth Issues  
**Time Aired:** 10:25 AM  
**Duration:** 3:59  
**Description:** Eric Metaxas addresses the tendency of this generation of college-age adults, who have been referred to as "snowflakes," to rewrite history itself to suit their feelings. He cites examples at the University of Pennsylvania, where NBC reported that a portrait of William Shakespeare was replaced with a photo of Audre Lorde, a "self-described black lesbian, mother, warrior, poet." This was in an affirmation of a commitment to be more inclusive in the English department. Outside of the U.S. at London University, entrollees in the School of Oriental and African Studies are demanding that "figures such as Plato, Immanuel Kant, and Rene Descartes be removed from their philosophy curriculum, since they're white and represent . . . colonialism." A degree ignoring these irrefutable facts of history, "will not be worth the paper on which its printed." And for those tempted to get carried away in this political correctness, Mr. Metaxas proclaims, "Your emotions do not trump reality."

We're caretakers of animals, not their equals."

Live Action sent investigators posing as pregnant women to 97 Planned Parenthood centers seeking prenatal care. 92 out of 97 of the centers turned away the investigators who claimed to want to keep their babies. "So for \$500 million in federal funding for Planned Parenthood, American taxpayers get less than 2 percent of the nation's breast exams and pap smears, but 30 percent of the nation's abortions."

**Program Name:** Breakpoint This Week  
**Issue:** Abortion and Ethics in Science  
**Time Aired:** 12:00 PM  
**Duration:** 25:00  
**Description:** Leaders of the recent Women's March in Washington D.C. excluded pro-life groups and made it abundantly clear that abortion rights are an integral part of their message. The next weekend brought in a very different group of women during the 2017 March for Life. Support for the rights of the unborn has grown steadily since the introduction of ultrasound technology that allows expecting mothers to see their unborn babies. The current presidential administration has promised progress in the fight to end legal abortion. The differences between the two groups have brought about some dramatic and desperate tactics by abortion rights activists. In addition, The recent announcement that scientists have produced the first human-animal chimeras raises thorny questions and challenges pro-lifers and Christians.

**Time Aired:** 10:25 AM  
**Duration:** 3:59  
**Description:** On January 13th, Compassion International told the sponsors of 130,000 Indian children that, barring an unlikely turn of events, it would cease operations in India in mid-March. David Curry, the CEO of Open Doors, told Morgan Lee and Mark Galli of Christianity Today that the situation in India reflects the rise of what he calls "ethnic nationalism," in which what it means to be an Indian is defined in religious— in this case, Hindu—terms. An Indian who is a Christian or, for that matter, a Muslim, is regarded as less than truly Indian, because Hinduism is at the heart of what it means to be an Indian. Eric Metaxas encourages listeners to let the Trump administration know that the five-fold increases in annual trade which India desires over the "near term" must be accompanied by a greater respect for religious freedom on the subcontinent.

**Time Aired:** 10:25 AM  
**Duration:** 3:59  
**Description:** John Stonestreet comments on the noticeable difference in this year's 44th annual March for Life in Washington, D.C. For the first time in years, there are large numbers of pro-life sympathizers in the political realm, including a president who "at least seems to be interested in keeping . . . promises to fight for the unborn." There was a hopeful and even excited mood, and Eric Metaxas prayed for those who hurled insults and profanity at those at the center of change just the weekend before. As Vice-President Pence said, we want our movement to be known for "love, not anger. . . compassion, not confrontation."

<b>Description:</b>	Moir Weigel asserts in The Atlantic article published last month that ultrasound imaging does not, in fact, reveal babies in the womb. She claims that it is a "tool pro-lifers have used to dupe women into seeing fetuses as human beings." One wonders if she hears herself. Eric Metaxas compares her idea to telling someone that microscopes faqlsely "advance the idea" that bacteria and viruses cause disease. Or that telescopes falsely "advance the idea" that galaxies exist. Metaxas believes Weigel is right that ultrasound has been instrumental in the pro-life movement. Pregnancy care centers report that nearly eighty percent of abortion-minded women choose life after seeing their babies on screen. He says, "Perhaps what they see on that monitor troubles them. And you know what? It should."

**Description:** WORLD magazine online ran a chilling story about a Swedish midwife who cannot find employment because she won't perform abortions. This case was lost in the Swedish courts twice, leading one to believe that if you don't want to kill babies, health professionals in Sweden need to find another job. John Stonestreet asks, "Could such an outrage happen here?" He asserts that Washington State already has entered this domain when it began requiring pharmacists to dispense abortifacients. He asks listeners to support the nomination of Judge Neil Gorsuch who would hopefully overturn such blatant violations of religious freedom.

**Time Aired:** 10:25 AM  
**Duration:** 3:59  
**Description:** John Stonestreet believes the abortion industry's unhappiness about the abortion rate being down is causing them to make irrational attempts to undermine the cause for life. He cites author Moira Weigel's accusation that "Ultrasound made it possible for the male doctor to evaluate the fetus without female interference." There seems to be an assumption that all OB/GYN physicians are male! Further, it appears that an embryo in a lab is not just a clump of cells as pro-choice individuals have claimed for a long time, but according to Ana Maria Dumitru, a fifth-year M.D./Ph.D. candidate at Dartmouth, "...embryos know what they're supposed to do to live, and they try to live, whether they're in their mother or not." After research and observation, she explains, "This one little cell, with its complete genetic content, can and does begin to divide and to grow, even in an experimental dish in an incubator in the closet space of some unmarked lab. . .the reality is this: they are autonomous humans from the very beginning." This is regardless to what modern science wants to label them.

But many are crying foul since Colorado voted in doctor-assisted suicide back in November. <b>Description:</b>	An elderly woman in Holland with Alzheimer's was in a nursing home and considered by the staff to be "controlling" and to cause trouble. Unbeknownst to her, her doctor put tranquilizer in her coffee and when it was clear she was to be injected with a lethal dose of medication she put up a fight. The doctor asked to the family to restrain her, which they did, and the woman was killed. John Stonestreet explains that this is the all-too-predictable result of the "death with dignity" or "right to die" laws permitted by five U.S. states. This law will inevitable devolve into an obligation to die.

**Description:** Beyonce wandered off-script from her entertainment industry pro-choice peers when she appeared on stage pregnant and dressed as a goddess in a performance dedicated to "birth and motherhood." She and her fans freely referred to the twins in her womb as "children," not fetuses or "any other dehumanizing euphemism popular with abortion supporters." John Stonestreet observes a trend among celebrities, that being, what makes their unborn children human is "how their parents, society, or a news anchor feel about them--not some inherent quality they share with all unborn babies." He concludes that the thousands of heartbeats quieted each year by abortion are no less human and no less valuable than Beyonce's twins.

It would seem that fighting discrimination and protecting religious liberty do not have to be mutually exclusive according to Stonestreet; as Anderson points out, both sides need to carefully define terms. He points out that there is a difference between discrimination and making distinctions.

As a matter of fact, he seems to think all religions are basically subjective nonsense. But there ARE things exclusive to Christianity, which Mr. Stonestreet points out. "...the claims of Christianity are public. They center on a Savior Who lived and performed miracles publicly, died publicly, rose from the dead publicly, and showed Himself to hundreds of witnesses publicly. Other religions started with private revelations or dreams given to a single person. When it comes to historical verifiability, there's no comparison."

**Description:** The LGBT movement knows very well that culture has the power to make what used to be unthinkable seem so normal. Gay moments (like Seinfeld's "not that there is anything wrong with that") accomplish this. The upcoming "Beauty and the Beast" first-ever openly gay moment from Disney is a case in point. John Stonestreet will be watching the movie with his girls and plans to point the moment out, using it as a springboard for a conversation that he will likely have to have soon enough as a result of real-life moments just walking down the street.

**Time Aired:** 12:45 PM  
**Duration:** :60  
**Description:** John Stonestreet comments on the trend in places such as China, Spain and in the recent past Denmark, in which these governments campaigned to try and encourage procreation amongst citizens. Many suggestions have been made (along with China's obvious one-child policy) as to why this has become necessary. Some say affordability is at the root of the problem. Others say long work hours, late suppers and going to bed after midnight are responsible for the low birth rates, but John Stonestreet believes it is the prevailing worldview. How people view marriage, children and the "good life" are proving to have consequences not just for individuals, but for entire societies.

He says "Bart Ehrman, the agnostic biblical scholar and fierce critic of the New Testament, calls Jesus-deniers Internet conspiracy theorists trying to sell books, and compares them to Holocaust-deniers." He refers also to Dominic Crossan, who would never pass as an evangelical apologist who "says he's 'certain' that Christ existed and chalks up alternative theories to disdain for the Prince of Peace." He goes on to say, "Even ancient writers hostile to Christianity like Josephus, Tacitus, and Pliny the Younger, confirm the existence of a Man from Nazareth who preached throughout Galilee and Judea, ran afoul of the authorities, was crucified under Pontius Pilate, and sparked what would eventually become the world's largest religion."

**Description:** John Stonestreet summarizes a new book by Rod Dreher, "The Benedict Option," in which two key points are stressed: first, we've arrived at a moment where "full participation in mainstream society" is no longer compatible with living lives of traditional Christian virtue; and therefore, second, the time has come to find new ways of living as Christians. Mr. Stonestreet appreciates Dreher's emphasis on the point that people need to take seriously the powerful ability of culture to shape hearts and minds. "Culture is a catechizing force, but too many of us are like the fish who don't know they are wet." Dreher sends a message to Christians that they need to be characterized by "thick ties," to fellow Christians and institutions, especially the church. It must be more than instructive. It must be formative, he says.

He goes on to say, "Pushing the idea that biological males can become females and vice-versa while posturing as champions of science is a bit contradictory. **Issue:** Ebola Plague  
**Time Aired:** 10:25 AM  
**Duration:** 3:59  
**Description:** John Stonestreet discusses the one-night showing of the powerful documentary about faith in the face of a deadly epidemic, "Facing Darkness". At first, and despite the disease's near-genocidal wrath, the world largely ignored the killer plague, Ebola. But then missionaries Dr. Kent Brantly and Nancy Writebol contracted the disease. It was a terrible blow to the ministry and its work in Liberia, but it also became a turning point in the fight against Ebola. Because these brave Christians ran TOWARD the plague, not away from it, Liberia was officially declared Ebola free by 2015. More importantly, the witness of these brave Christians, points people to Christ.

**Description:** In the confirmation hearings, California senator Dianne Feinstein demanded that Judge Neal Gorsuch recognize Roe v. Wade as "super-precedent," a term which John Stonestreet doesn't believe is a "thing". David French pointed out that the Supreme Court has overruled itself dozens of times, citing the example of Plessy v. Ferguson in 1896 that declared racial segregation constitutional. It had been "settled law" for over half a century until later justices realized the Court was wrong. The Supreme Court is not bound to bad laws.

**Time Aired:** 10:25 AM  
**Duration:** 3:59  
**Description:** Earlier this year Princeton University announced Tim Keller as the winner of the 2017 Kuyper Award for Excellence in Reformed Theology. Then, after much public dissidence, they withdrew the award because he didn't conform to "mainstream Presbyterian orthodoxy" on subjects such as women's ordination, and especially, LGBT issues. Though this is unfortunate, John Stonestreet points out that there IS some good news from Princeton as very conservative professor, Robby George, and very liberal professor, Cornel West, issued a joint statement in which they say, "It is all too common these days for people to try to immunize from criticism opinions that happen to be dominant in their particular communities." While acknowledging the right to peaceful protest, they ask readers to consider whether it might "not be better to listen respectfully and try to learn from a speaker with whom I disagree?"

<b>Issue:</b>	Risky LGBT Behavior		
<b>Time Aired:</b>	10:25 AM		
<b>Duration:</b>	3:59		
<b>Description:</b>	Over a year and-a-half after the Obergefell decision, the debate over gay "marriage" and homosexuality has largely fizzled out: partly because of the election, partly because the "T" in the LGBT acronym has been stealing all the headlines, and partly because Obergefell is now viewed by many as settled law. John Stonestreet tells that this "progress" isn't bringing about the rosy picture that was promised. Michael Hobbes, who identifies as gay, writes about the heartache that men like himself experience as they are two-to-ten-times more likely to commit suicide. They're twice as likely to experience depressive episodes, report having fewer close friends and abuse drugs at an alarming rate. And these hazards even seem to exist in places like the Netherlands and Switzerland where same sex "marriage" has been accepted for years. After looking at various suggestions as to the reason for this, Stonestreet concludes with this question, "Could it be that God didn't design His image-bearers to live like this, and when we do, it actually destroys us?"

<b>Description:</b>	Last week YouTube announced they're reviewing complaints about their "restricted mode," which allows parents to control the videos their kids watch. The complaints came from lesbian, LGBT-identifying video bloggers who said this mode blocked many of their videos and he found that offensive. John Stonestreet encourages listeners that they have a right AND responsibility to know what kids are doing online, regardless what any activists are offended by.
