09.16.21	08:30	60:00	Alternative Radio – The Financialization of Housing	From Seattle to Toronto, the cost of owning a home is soaring. Rents are no better. Accelerated by neoliberal economic doctrine a paradigm shift in housing has occurred in recent years. There is a growing disconnect between housing as a human right and housing as a financial vehicle for investment. We’ve come a long way from FDR’s remarkable 1944 State of the Union address where he advocated for, “The right of every family to a decent home.” Today, housing is viewed by the global investor class as a commodity to be bought and sold in markets, a repository for capital and a means of accumulating wealth. Financialization of housing causes gentrification, undermines community, exacerbates inequality and contributes to the disgrace of homelessness. We need to develop and encourage politics that not only restores housing as a universal human right but to make it affordable as well.

09.16.21	08:30	60:00	Alternative Radio – Black Liberation	The widespread protests in the wake of the murders of George Floyd and Breonna Taylor marked a new chapter in the struggle for Black liberation. What would constitute Black liberation? Keeanga-Yamahtta Taylor says it's about self-determination. "Can we make decisions free of economic coercion? Can we make decisions that are truly free? That to me is what liberation would be. I know that it's not something that Black people can achieve alone. Black liberation is bound up with human liberation. On a purely mathematical basis, Black people drift between 13 and 14% of the population. We can't get free alone. So, this is also about really trying to examine the connections between the subjugation of Black people, and how that relates to a wider web of subjugation of other people, including White people, in our society."
09.23.21	02:00	60:00	Philosophy Talk – What Do We Owe Future Generations?	We talk about owing future generations a better world. We might also think that we should do things for future generations even if our actions might not benefit present-day people. But is it possible to have obligations to people who are not yet born? Can people who do not exist be said to have rights that we should respect? And if they do, what do we do if our rights and theirs conflict? Josh and Ken are obliged to welcome Rahul Kumar from Queen's University, editor of Ethics and Future Generations.
