

*As you can see, much of the programming carried on KCRO is of a nature that is intended to help our community and inform individuals.*

*KCRO airs regular weather forecasts from meteorologist Matt Duncan. It also carries newscasts from SRN news as well as local newscasts during Heartland Viewpoint. The Emergency Alert System can break in to regular programming with important information from the National Weather Service or with Amber Alerts. We saw several flash flood warnings this past summer.*

*Thank you for taking the time to read this Quarterly Report.*
