

Climate Connections
Programming Summary for October 30 – November 10, 2023

File Name	Air Date	Title
CX231030	Mon., 10/30	Yes, older homes can be weatherized: The U.S. Department of Energy has created a webpage with DIY projects that could help you save money this winter and reduce your home's carbon footprint.
CX231031	Tue., 10/31	Climate change is making fall allergy season last weeks longer: Ragweed pollen can aggravate asthma and other allergies late into fall.
CX231101	Wed., 11/1	Goodbye, noisy leaf blowers: Illinois landscaper offers all-electric service: It's so much quieter.
CX231102	Thu., 11/2	Wild spring weather swings hurt New York's fall apple harvest: It's a problem that's getting worse as the weather gets more erratic.
CX231103	Fri., 11/3	How to cut the carbon footprint of your next flight: You could reduce your pollution by up to 63%.
CX231106	Mon., 11/6	The Inflation Reduction Act has created nearly 75,000 jobs: Plus it's spurred more than \$86 billion in private investments.
CX231107	Tue., 11/7	Pro mountain runner Dakota Jones is doing his part for the climate: Through his running camp, he's getting others involved, too.
CX231108	Wed., 11/8	Battery storage helped Texas power through summer heat: Solar and wind energy stored in batteries can help prevent rolling blackouts and power failures.
CX231109	Thu., 11/9	Unhoused people are especially vulnerable to wildfire smoke: Alameda County Healthcare for the Homeless provides people living outside with masks, information about health risks, and guidance for where to seek shelter.
CX231110	Fri., 11/10	'Every single time it rains hard here, everyone in town gets really tense': Intense rain caused historic flooding in Montpelier, Vermont, last summer. The effects still linger.

Climate Connections
Programming Summary for November 13 – November 24, 2023

File Name	Air Date	Title
CX231113	Mon., 11/13	Climate change could make air travel even worse: Floods, heat waves, and storms are causing turbulence and delays.
CX231114	Tue., 11/14	Up to 20% of lung cancer patients never smoked: Air pollution has also been linked to the disease.
CX231115	Wed., 11/15	Green careers can provide a new way forward after prison: Roots of Success exposes incarcerated people to careers in renewable energy, clean transportation, and other environmental fields.
CX231116	Thu., 11/16	Solar worker helps other women get started in the industry: Riley Neugebauer founded Solar for Women, which helps women support each other online.
CX231117	Fri., 11/17	Wind power boosts his family's business, Kansas rancher says: 'I always say that wind farming is my best cash crop.'
CX231120	Mon., 11/20	Uber driver switches to EV, saves money: He's one of about 50,000 who have rented a Tesla through an Uber and Hertz program.
CX231121	Tue., 11/21	Many cyclists want to keep biking even in winter, advocate says: But cities don't always keep bike paths and lanes adequately plowed.
CX231122	Wed., 11/22	Warming winters threaten a unique dessert cider: Ice cider requires weeks of frigid temperatures to brew.
CX231123	Thu., 11/23	Are sweet potatoes a climate-resilient crop of the future? They thrive in hot temperatures, within limits.
CX231124	Fri., 11/24	Why one researcher is flying less: He's often asked to travel for research and conferences, but he's found some less-polluting options.
