2nd Quarter 2016 Program Summaries

Doki (E/I):

Doki offers fun characters each with their own strengths and weaknesses (therefore offering a broad representation of possible at-home-viewers). The team is supportive of one another and the "world" of Doki and its characters reflects the media landscape of today's child. Although the most supportive programming involves the audience through presentation of material in a way that demands intellectual interaction on the part of the viewer (i.e., encouraging the viewer to assist on -screen characters to solve problems), and this series might benefit from this type of "interaction," Doki does offer enthusiastic characters, real questions, and an "arguably" realist presentation of discovery. Combined, these elements will keep children engaged and support their learning.

The Choo Choo Bob Show (E/I):

The Choo Choo Bob Show is a 30-minute program specifically created for children ages 4-11. Each program features a diverse community of people and puppets who share a love of trains, adventure and music. Viewers are introduced to a fantasy location called "Tiny Land" where a miniaturized environment of model trains and people encourage exploration as well as pro-social behaviors such as courtesy, compromise and patience. The program series proposes situation that require thoughtful choices and provides resolution geared to the unique concerns and abilities of young children.

Raggs (E/I):

This 30-minute program stars five canine characters who are talented musicians. Their chemistry and friendship help them through creative and humorous challenges. Each program centers on a main theme that promotes social and academic readiness while addressing specific pre-school curriculum topics.
