Re: Hi-Favor Broadcasting, LLC (HFB)
KSDO(AM), San Diego, CA
Facility Identification Number: 51166
Special Temporary Authority (STA)
LMS File No.: 0000233666

Dear Mrs. Hinz:

This is in reference to the request filed on December 22, 2023. HFB requests a further extension of the STA granted on January 29, 2016, to continue operating using one shorter drop wire antenna attached to the KLSD(AM) tower to allow time to install the second longer drop wire antenna and then file the required 302-AM license application in LMS to cover BP-20220627AAH.¹ In support of the request, HFB stated that fabrication and construction of the new phasing coupling and filtering equipment will be taking place this month.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA is GRANTED, and HFB may continue to operate with the following facilities:

Geographic coordinates	32° 43' 51" N, 117° 04' 59" W (NAD 1927)
Frequency	1130 KHz
Hours of operation	Unlimited

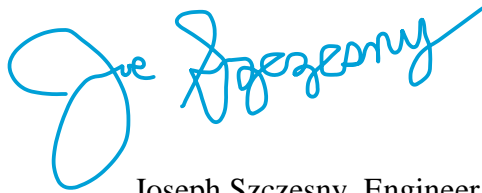

¹ KSDO(AM) is licensed for DA operation on 1130 kHz with 10 kW (day and night) using different patterns, and BP-20220627AAH authorizes different DA patterns using two drop wires attached to the existing KLSD tower.

Operating power	2.5 kW
Antenna type	Drop wire antenna (hung from Phillystran tower guy rope)
Antenna radiator height	64° (47.2 meters)
Antenna efficiency	239.5 mV/m/kW at 1 km

HFB must reduce power or cease operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 2, 2024**.²

Sincerely,

Joseph Szczesny, Engineer
Audio Division
Media Bureau

cc: John Neely, Esq., MN PC (via email only)

²Periods of operation pursuant to this STA shall be recorded in the station's records (see 47 CFR § 73.1820). The records shall include start/stop dates and times of such operation. These log entries must be maintained for a minimum of two years as specified in 47 CFR § 73.1840(a), unless a longer retention period is requested by the staff. Periods of operation may be subject to independent verification that they in fact occurred.
