Unveiling a world of deceit and treachery worthy of any fictional thriller: plants behaving badly. Two groups of plants exhibit such intriguing behavior that a century and a half ago they attracted the attention of Charles Darwin. These same plants, orchids and their carnivorous relatives, still fascinate scientists today. Darwin's book 'On the Origin of Species' shook the scientific world and far beyond. Yet it was his next book, devoted entirely to orchids, which filled in crucial gaps and clarified his revolutionary ideas. Orchids have an ethereal beauty, whether growing hundreds of feet up in a misty rainforest or along the verges of busy suburban roads. But their exotic flowers are shaped for just one purpose - to seduce pollinators. Many use sex as a lure by impersonating a female bee or wasp. But it's not only about the orchids: scientists have recently shown that there are many more carnivorous plants than we ever thought existed. Welcome to the world of killer tomatoes and murderous potatoes! Even the more well-known carnivorous plants - sundews, flytraps and pitchers - are revealing new behaviour. Carnivorous plants have featured in many sci-fi films over the years, but the reality turns out to be far stranger than the fiction.

On the anniversary of an attack by pro-Trump rioters on the U.S. Capitol, Vice President Kamala Harris said we should look at the event as part of a steady series of moments that “attempt to unravel” American democracy. The “chaos and violence” of Jan. 6 was an example of what can happen “if there is a destruction of democracy,” Harris said during an interview with PBS Newshour anchor and managing editor Judy Woodruff on the anniversary of the attack. But Congress’ return to complete its routine counting of electoral votes after the violence had subsided was also a symbol “of a democracy that is both fragile and strong.” Harris was at the U.S. Capitol as the attack unfolded last year in her capacity as the junior senator from California and the vice president-elect. She said even before that day, the nation’s democracy was threatened by falsehoods about the 2020 election, including fraudulent claims of widespread voter fraud. “It is incumbent, then, on those who are informed, who are knowledgeable, to be vigilant in speaking truth, no matter how difficult sometimes it is to hear, much less speak,” Harris said. “Because the truth is that the democracy of the United States of America is only standing as it is because of the faith and the purpose of the American people to fight for it.” Other highlights from the interview: On Republican reaction to Jan. 6: Harris said she applauded Rep. Liz Cheney, R-Wyo., who blamed Trump for stoking the riots. House Republicans have subsequently stripped Cheney of her leadership role, while Democrats promoted her to vice chairwoman of the House committee that is investigating the Jan. 6 attacks. Harris said she wouldn’t speak to whether the Jan. 6 committee was considering criminal prosecution as she was not “privy to the internal facts” made available to the committee. On voting rights: The U.S. needs federal laws “that guarantee the freedom and right of every American to have access to the ballot,” Harris said. She called on Congress to pass the John Lewis Voting Rights Act and the Freedom to Vote Act, saying they’re important to upholding

the right to vote in free and fair elections. The legislation has passed the House, but has stalled in the Senate as Democrats do not have enough votes to overcome a Republican filibuster. On COVID-19: Harris stood by the administration's approach to the COVID-19 pandemic response, saying progress has been made over the last year – vaccines, boosters and masks have helped schools and businesses reopen. But there's still work to do, she added. Nearly two years into the pandemic, Harris said she recognized many people have reached "a level of malaise." "We want to get back to normal," but we must do the work of "pushing through with solutions ... let's meet the challenges where they are," she said. The administration has drawn criticism in recent weeks for testing capacity and access, and in a pair of letters published Thursday in the journal JAMA, six public health advisers who served on the Biden-Harris transition team urged the White House to shift its vaccine-focused response to focus more on testing, surveillance and public health as a way toward a "new normal."

On April 2, 1936, when the 22-year-old son of a sharecropper entered the Olympic Stadium in Berlin, he was, he later remembered, barely able to control his anger. "I was angry because of the insults that Hitler and the other German leaders had hurled at me and my Negro teammates on the Olympic squad." The young athlete would channel his raw emotions into some of the most remarkable achievements in the history of athletics, winning four gold medals. To tell the story of Owens' remarkable victories in the face of Nazi racism,

this film begins in the poor Cleveland neighborhood where the young athlete grew up; details his early career; describes Adolf Hitler's outsized ambitions for the 1936 Olympics; explores the movement in Western democracies to boycott the event; and explains the pressures on Owens to attend. The film also reveals the unlikely relationship Owens struck up at the games with his German rival Carl "Luz" Long and shows, that in the end, despite his success in Germany, Owens struggled to find a place for himself in a United States that was still wrestling to overcome its own deeply entrenched racism.
