

WOUB Radio FM Network  
Issues/Programs List October to December 2023

This quarter, news and events were dominated by a special election concerning Ohio constitutional amendments, an abortion rights constitutional amendment, upcoming election issues, statehouse legislative moves, and national politics. In addition to our daily news reports and special features, the WOUB FM network broadcast news stories focused on actions of the Ohio state legislature, state news of Kentucky and West Virginia, and energy security. Regional news is also accessed through the Ohio Valley Resource, a network of stations throughout the Ohio River/Appalachian region funded by the stations and CPB.

We continue to provide an international perspective with programming from the BBC from 9-10am on our FM network. Public affairs and news programming from NPR continue to be the prime focus of our weekday FM programming. The daytime format consists of Morning Edition, 1A, Fresh Air, Here and Now, On Point, and All Things Considered from NPR; and the BBC Newshour. NPR News is used hourly (except midnight to 5am).

This quarter, we continued our series "Spectrum" where Tom Hodson interviewed guests on a wide variety of topics from politics to culture to education. These interviews were featured in half hour programs on our AM service, with five minute features used during Morning Edition and All Things Considered. We base our programming and production decision on a number of factors, including news stories and events in the region, letters and phone calls from listeners and efforts to find local angles to important national or international stories.
