

July 5, 2023

Dear Affiliate Partner:

To assist you in complying with the reporting requirements for children's television and the requirement that stations air "core" educational and informational children's programming, we are providing you with episode-specific descriptions ("The More You Know" educational and informational programming block) as set forth in the attached Quarterly Children's Programming Report for the 2nd quarter of 2023. Please note that **we have not included the specific dates and** times for each of the programs as that information may be station-specific.

This report is divided into the following categories:

1. Educational Objectives and Show Summaries: **The More You Know** both for programs broadcast in the 2nd quarter of 2023 and those planned for the 3rd quarter of 2023.
2. Core Programming: Regularly scheduled programming furnished by the NBC Network that is specifically designed to serve the educational and informational needs of children ages 13-16. Each of these programs is identified on-air as educational and informational with the "E/I" icon and is similarly identified to the national listing services. Please note that the target age range for **The More You Know** programming is identified as 13-16 years old.
3. Other Programming: Programming furnished by the NBC Network that contributes to the educational and informational needs of children 16 and under but is not specifically designed to meet the educational and informational needs of children.
4. Public service announcements targeted to children 16 and under.
5. Non-broadcast efforts that enhance the educational and informational value of NBC Network programming to children.

The regularly-scheduled children's programming and promotional content furnished to you by the NBC Network during the 2nd quarter of 2023 complied with the commercial limits of the Children's Television Act, and 47 C.F.R. §§ 73.670(a)-(d), provided that you broadcast and distributed such programming as furnished to you by NBC, and did not add any promotional or advertising content thereto other than as directed by NBC via weekly postings on APT.

Despite the recent revisions to the Children's Television Programming Rules, we will continue to provide this report on a quarterly basis. Please consult your legal counsel with any questions.

If you have any questions about this report, please feel free to call us.

Note Regarding FCC's Audio Description Rules: The programs supplied in **The More You Know** block are audio-described to provide a better viewing experience for blind or visually impaired children.

2nd QUARTER 2023
EDUCATIONAL OBJECTIVES and SHOW SUMMARIES
[AGE TARGET 13-16]
1 April 2023 – 30 June 2023

In the 2nd Quarter of 2023, NBC continued airing The More You Know Educational/Informational programming block, designed for older adolescent children, ages 13-16. Each of the six shows has a hosted format, featuring non-fiction, informative programming that extends NBC's iconic The More You Know brand to Saturday mornings. The audience views inspiring stories about the environment, social change, health and wellness, and community engagement. There was one change to the lineup for Q2. In the final hour of the block, the series *Roots Less Traveled* was replaced with an additional half-hour of *Earth Odyssey with Dylan Dreyer*. Stations continued to have the option of airing the final hour of the block (*Earth Odyssey with Dylan Dreyer* and *The Voyager with Josh Garcia*) on their primary channel or on their secondary D2/D3 channel.

EARTH ODYSSEY WITH DYLAN DREYER

Earth Odyssey with Dylan Dreyer is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Earth Odyssey with Dylan Dreyer will take viewers on an incredible journey to the wildest points on the globe, uncovering the connection between the environment, the wildlife, and the human beings that surround them. Hosted by Meteorologist Dylan Dreyer, Earth Odyssey with Dylan Dreyer will reveal a new destination each week, ranging from Africa, Indochina, the Middle East, and many untamed islands around the world. Audiences will come face-to-face with fascinating native animals, some cute and some dangerous, while educating teen viewers with amazing facts about nature and wildlife. Earth Odyssey with Dylan Dreyer gives audiences a captivating look at the symbiosis between all living things, in the most larger-than-life places on Earth.

WILD CHILD

Wild Child is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Wild Child will take viewers on an adventure to meet the cutest, most curious, most fascinating baby animals on the planet. Along the journey, audiences will witness the incredible bond that exists within the animal kingdom between parents and their children. Hosted by Sheinelle Jones, Wild Child will reveal how these untamed youngsters are born, how they play, and how they learn to survive in the wild. Each week, viewers will witness a wide variety of wild animal children in their first years on Earth as they overcome environmental challenges and threats from predators.

HARLEM GLOBETROTTERS: PLAY IT FORWARD

Harlem Globetrotters: Play It Forward is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Harlem Globetrotters: Play It Forward celebrates the historic franchise that has delighted fans of all ages with joy and goodwill for nearly a century. Hosted by Craig Robinson, audiences will get to know the new generation of talented Globetrotters players and coaches, while witnessing how they bring their unique skills and passions both on and off the court. From teaching financial literacy to community engagement to sharing the importance

of eating healthy and staying fit, Harlem Globetrotters: Play It Forward will educate viewers in a manner accessible and understandable to children aged 13-16. Each week, Harlem Globetrotters: Play It Forward will feature stories of both compassion and mind-blowing athleticism, demonstrating the incredible impact that basketball can have for generations to come.

ONE TEAM: THE POWER OF SPORTS

One Team: The Power of Sports is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. One Team: The Power of Sports features stories that focus on diversity, inclusion, and how sports often bring people together for a common goal that goes beyond the playing field. Hosted by Corey Robinson, this series shines a light on people who have used sports to overcome obstacles or to help their community. Viewers will learn the value of acceptance, and how everyone deserves a fair shot in life. No matter the level of competition, One Team: The Power of Sports demonstrates the impact sports can have on people, regardless of their gender, background, or the color of their skin.

EARTH ODYSSEY WITH DYLAN DREYER

Earth Odyssey with Dylan Dreyer is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Earth Odyssey with Dylan Dreyer will take viewers on an incredible journey to the wildest points on the globe, uncovering the connection between the environment, the wildlife, and the human beings that surround them. Hosted by Meteorologist Dylan Dreyer, Earth Odyssey with Dylan Dreyer will reveal a new destination each week, ranging from Africa, Indochina, the Middle East, and many untamed islands around the world. Audiences will come face-to-face with fascinating native animals, some cute and some dangerous, while educating teen viewers with amazing facts about nature and wildlife. Earth Odyssey with Dylan Dreyer gives audiences a captivating look at the symbiosis between all living things, in the most larger-than-life places on Earth.

THE VOYAGER WITH JOSH GARCIA

The Voyager with Josh Garcia is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. The Voyager with Josh Garcia takes viewers on an exciting and immersive journey around the globe with world traveler and host, Josh Garcia. Each episode gives audiences access to the world's most incredible destinations as Josh seeks out the truly authentic experiences one can only find when shown by a knowledgeable and passionate guide. In each episode, Josh learns how to prepare an authentic, regional meal, visits a local artisan to learn about their trade and craft, and samples the culture while learning about the heritage of the region's population, showing viewers what is so unique about each city he visits. The Voyager with Josh Garcia brings viewers on an enthralling adventure to explore the people and cultures that make our world so breathtaking.

3rd QUARTER 2023
EDUCATIONAL OBJECTIVES and SHOW SUMMARIES
[AGE TARGET 13-16]
1 July 2023 – 30 September 2023

In the 3rd Quarter of 2023, NBC continued airing The More You Know Educational/Informational programming block, designed for older adolescent children, ages 13-16. Each of the six shows has a hosted format, featuring non-fiction, informative programming that extends NBC's iconic The More You Know brand to Saturday mornings. The audience views inspiring stories about the environment, social change, health and wellness, and community engagement. There were no changes to the lineup for Q3. Duration (hh:mm:ss): 00:30:00

EARTH ODYSSEY WITH DYLAN DREYER

COMING OUT OF THE SHELL WITH CRUSTACEANS [EDD512]

Today on Earth Odyssey, host Dylan Dreyer takes us under the sea to explore the alien world of crustaceans. First up, we'll learn about a fascinatingly deceptive crustacean, the spider crab. These elegant crabs owe their feathery appearance to anemones on their bodies. Spider crabs have developed a unique behavior of allowing different anemones to graft to their bodies. We'll witness how this camouflaged lifestyle takes on many and varied forms for these crustaceans. We'll see that there are no creative limits

as each crab takes on its own unique and totally wild look. We'll also learn that the Japanese species of spider crabs are the largest crab species on Earth and can reach up to twelve and a half feet from one claw to another. Next, we'll discover how other crustaceans use their environment, and even the animals living alongside them, as a form of protection. We'll witness how some crustaceans have chosen the nomadic life living on the backs of sea cucumbers. Crustaceans such as crabs and shrimp will use a host sea cucumber as protection to hide from potential predators. We'll also learn about a specific predator that feeds on crustacean larvae, the pipefish. We find out that pipefish can devour great amounts of larvae at once, sucking them into their mouths like a straw.

[Educational Message: The way each animal adapts and thrives in the wild is entirely unique to the species. But crustaceans take their individuality to extremes. Adapting and even becoming a part of their environment has ensured their survival on our planet for millions of years.]

WILD CHILD

CITY SAFARI [WLC312]

Today on Wild Child, host Sheinelle Jones takes us on a tour of cities to find the baby animals that love the urban lifestyle. First up, we'll visit the gardens of the urban jungle to learn about the lifecycle of a fascinating insect, the praying mantis. Females will carefully lay between 100 to 400 eggs on a sturdy leaf or branch. When conditions are warm enough, the egg cases crack, and babies begin to hatch. As they develop, praying mantis babies go through up to six molting stages before they reach maturity. A praying mantis can molt to change its color depending on the season. We'll also discover that a praying mantis is the only known insect with 3-D vision like in mammals. Next, we'll meet an animal that's wholeheartedly embraced the urban lifestyle, the Canada goose. Baby Canada geese, known as goslings, can dive up to forty feet deep at just one day old. We'll also learn that Canada geese are monogamous and will typically mate with just one partner for life. Canada Geese usually forage in groups and on land, where they mostly feed on a variety of plants including grass, seeds, and berries. We'll discover that Canada geese can eat up to three pounds of grass each day.

[Educational Message: In this episode, we took a safari into the cities to reveal the wild animals living in urban environments. While they might have ancient wild backgrounds, these crafty creatures have expertly adapted to the man-made world around them using their natural instincts and some modern modifications.]

HARLEM GLOBETROTTERS: PLAY IT FORWARD

GONE SKYDIVIN' [HGL112]

Today on Harlem Globetrotters: Play it Forward, host Craig Robinson takes us to the lake to go fishing with the team, then shows us how the Globetrotters have some friendly competition with a group of champion little leaguers. First up, Coach Lou, Wham, Hammer, TNT, and Torch head to the outdoors for a fishing excursion. We'll find out that being in nature generates calmness, joy, creativity, and better concentration. Here we'll learn that fishing requires the five essentials of rod, line, bait, hook, and reel. With an average length of sixteen inches, the longest largemouth bass on record is just over thirty-eight inches long. We'll discover that fishing is a great outdoor activity that can teach you to have more patience and dedication. Next, we'll join Jet, Bulldog, and Hot Shot when they head to D.C.'s Ward 8 to play a classic playground game with champion little leaguers, the D.C. Kings. We'll find out that American baseball may have derived from an English sport called Rounders. Also, we'll learn that the first official baseball game was played in 1846 while the first basketball game was played in 1891.

[Educational Message: In this episode, we learned that taking time to enjoy nature is important to both your physical and mental health. We found out that an activity as simple as fishing can teach us how to be more patient and reflective with our time. It's important that we take time in our daily lives to stop and smell the roses.]

Duration (hh:mm:ss): 00:30:00

**ONE TEAM: THE POWER OF SPORTS
ON A ROLL [TPS314]**

First, Paralympian Brittani Coury embraces her journey to the top. As a young girl, Brittani Coury used snowboarding to escape her home life, but an injury threatened to keep her off the slopes for good. After multiple surgeries, she returned to snowboarding and eventually won the 2018 Paralympic silver medal in addition to five world cup medals. Inspired by the nurses who helped her, she also decided to study nursing in hopes of paying it forward. Today, Brittani continues to train for snowboarding competitions while maintaining her job as a registered nurse. Next, Corey Robinson visits an Olympic Teaching Kitchen to roll sushi with US Olympic Gold Medalist Tamyra Mensah-Stock. Athletes should be eating differently than the general population, based on their training load, their goals, and then phases of training. Too much sugar in an athlete's diet can cause blood sugar dips, affecting energy levels and overall performance. Athletes must make sure they are feeding their body with the right types and amounts of food and at the right times.

[Educational Message: From technology to a well-balanced diet, utilizing beneficial resources is a crucial step towards progress of any kind. Viewers learn the importance of support and knowing how it shapes peak performance in any aspect of life.]

**EARTH ODYSSEY WITH DYLAN DREYER
VIETNAM [EDD101]**

Today on Earth Odyssey, host Dylan Dreyer takes us on an excursion to the lush tropical landscape of Vietnam. Situated on the Easternmost rim of the Indochina Peninsula, we'll discover that Vietnam is one of the most bio-diverse countries in the world. We'll learn that Vietnam's dense tropical forests cover almost half of the country, and that approximately 10 percent of the world's animal species live in this region. But we'll discover how this environment was not always thriving. In the 1960's, the Vietnam War destroyed almost one-fifth of the rainforests, leaving scores of animals fighting against extinction. But today, Mother Nature has fought back, and these tropical jungles are once again thriving. Next, we'll travel into the lowlands in search of yellow-cheeked gibbons. These monkeys are famous for the loud, odd sounding melodies they use to mark their territories. We'll discover that these monkeys are also some of the best tree swingers on the planet, reaching speeds of up to 25 miles an hour as they swing up to 50 feet from branch to branch. Next, we'll meet one of the rarest species of primates who were once thought to be extinct, the Hatinh Langur. We will learn about their strange social structures, their eating habits, and how they have made an unlikely home in the limestone caves in the cliffs of Halong Bay. Finally, we'll travel to the Son Tra Primary Forest, home to the red shanked douc, one of the most beautiful and colorful monkeys in the world. We'll discover that these highly social primates live in groups of up to 15 members. Despite the fact that they were almost driven into extinction, they now thrive because their home has been deemed a No-Entry Zone to the public since the end of the Vietnam War.

[Educational Message: The rainforests of Vietnam are an example of the true resilience of the natural world. Plants and animals have made an incredible resurgence since the Vietnam War. We must always protect our environment for generations to come.]

Airdate: 01 April 2023

THE VOYAGER WITH JOSH GARCIA
LIFE'S A BEACH [VJG125]

Host Josh Garcia spends the day ashore discovering Sydney's amazing beach culture. First, Josh surveys the coastal landscape from a seaplane and witnesses some iconic landmarks. Then, he heads to the coast to connect with some chefs and learns that "shrimp on the barbie" is actually a real thing...and it's delicious. Josh digs into his first Australian barbeque on the picturesque coast. Then, Josh tries out the indigenous tradition of natural basket weaving with a local artisan. Finally, he finishes his day on a surfboard. Josh learns the techniques to catch a wave like a pro and stay on the board, for at least a few seconds.

[Educational Message: Taking the opportunity to jump in and try new experiences firsthand can build confidence when trying new things in the future. Plus, you might even catch yourself having fun!]

Time:

Duration (hh:mm:ss): 00:30:00

EARTH ODYSSEY WITH DYLAN DREYER
THE AIR UP THERE! [EDD513]

Today on Earth Odyssey, host Dylan Dreyer takes us to the skies of Africa for a closer look at the region's most amazing avian residents. First up, we'll learn about the feathered architects of the wild, the sociable weaver bird. We'll learn that weavers create intricate apartment-style nests with hundreds of mated pairs building their nests next to each other. The spectacular tangles of dried grass have remarkable insulating properties that protect the birds from the extreme heat. Known as the largest nests on the planet, weaver bird nests can be home to as many as 100 pairs. Continually maintained by the entire colony, we'll discover that these nests can be used by weaver birds for decades. Next, we'll learn about a bird that's a highly skilled angler, the pied kingfisher. We'll find out that pied kingfishers can hover expertly and fly up to thirty-two miles per hour while hunting. Here we'll witness how kingfishers catch their prey by skimming the water with their long beaks at high speeds. When the kingfisher thrashes its prey to make it easier to swallow, the bird's feathers get covered in mucus. Once it has finished its meal, the kingfisher will return to the water for a quick bath. We'll learn that birds are great bathers as it's a good way to stay cool and keep their feathers clean.

[Educational Message: In this episode, we learned that more than 2,000 species of birds call Africa home. Beautiful, unique, and ingenious, the feathered flyers of Africa will always keep us looking up to the skies.]

Airdate: 08 April 2023

Time:

Duration (hh:mm:ss): 00:30:00

WILD CHILD
AWESOME ANIMALS OF ASIA [WLC313]

Today on Wild Child, host Sheinelle Jones takes us on a trip across Earth's largest continent to discover the spectacular baby animals of Asia. First up, we'll journey to the thick jungles of Southeast Asia to learn about a vibrant primate resident, the orangutan. Orangutans are the world's largest arboreal mammal, spending most of their lifetime in the treetops. We'll learn that orangutans are unique from other primates because they are mostly solitary in the wild. Orangutans are extremely intelligent, known for using tools and even learning to communicate with sign language. Next, we'll visit the lush forests of Vietnam to learn about a rare old-world monkey, the red-shanked douc. Red-shanked doucs are nicknamed the "costumed ape" as they are one of the most colorful primates in existence. Rarely seen on the ground, red-shanked

doucs prefer being higher up in the canopy and move amongst the tallest branches. We'll learn that the diet of the red-shanked douc consists primarily of tender leaves, but they are also known to eat flowers, fruits, and seeds.

[Educational Message: In this episode, we took a tropical excursion to see the remarkable baby animals of Southeast Asia. As each new generation arrives, they're given the tools to make their own mark on their habitat and prosper like their parents before them.]

HARLEM GLOBETROTTERS: PLAY IT FORWARD

BLAST OFF! [HGL113]

Today on Harlem Globetrotters: Play it Forward, host Craig Robinson shows how a program is helping teach South Central LA youth about the benefits of sports and exercise. Then, Cheese and TNT visit NASA's Kennedy Space Center to learn how teamwork gets a rocket to the moon and back. First up, we're visiting Los Angeles to learn about an organization that specializes in empowering children with disabilities through exercise and sports. Here we'll join Jet, Wham, and Hotshot as they participate with the youth in the program's various exercise and sports activities. We'll discover that warming up prevents injuries by loosening your joints and improving blood flow to your muscles. Next, we'll tag along with Cheese and TNT as they visit NASA's Kennedy Space Center for the Artemis I space launch. We'll learn that the launch of Artemis I is the beginning of NASA's new mission to return astronauts to the surface of the moon. We'll find out that while there are no astronauts onboard Artemis I, future Artemis missions will carry the first woman and first person of color to the moon.

[Educational Message: In this episode, we learned about an inclusive sports and exercise foundation helping the youth in South Central Los Angeles. We discovered that through sports, persons with disabilities can acquire vital social skills, develop independence, and become empowered to act as agents of change.]

ONE TEAM: THE POWER OF SPORTS

FRONT-RUNNER [TPS315]

First, Johnny Kelley proves that life isn't a sprint, it's a marathon. Running a marathon is one of the most grueling activities for any athlete. In the history of the Boston marathon, there is a legend among legends, John Adalbert "Johnny" Kelley. He won it twice, finished second a record seven times, was in the top ten 18 times, and twice represented the U.S. at the Olympic games. In addition to the Boston Marathon and the Olympics, one estimate placed Kelley at fifteen races a year. In his career, Kelley ran one hundred twelve marathons, or nearly three thousand miles! Next, after Ryan Straschnitzki's stand-up hockey career came to a halt, he pursued the game of sledge hockey to keep his dreams alive. In 2018, the Broncos junior team in Canada lost ten teammates and their coach after a fatal bus crash. Those who survived the accident had severe injuries and faced long rehabilitations, but Ryan Straschnitzki was determined to not let anything keep him from returning to the rink. Ryan is still training on the ice, hoping to represent Canada in the Paralympics one day.

[Educational Message: Attitude is paramount above all when pursuing ambitions. Viewers learn how willpower can play a huge role in not just achieving goals but also in developing important life skills.]

EARTH ODYSSEY WITH DYLAN DREYER

HEBRIDES [EDD102]

Today on Earth Odyssey, host Dylan Dreyer takes us on an adventure to the mysterious Hebrides archipelago off the Northern coast of Scotland. Known as “Europe’s Last Wilderness” and isolated from the mainland, this island chain has become the perfect breeding ground for millions of creatures. First up, we’ll travel to the Outer Hebrides chain that hosts one of the largest gatherings of grey seals on the planet. We’ll discover that each year over 35,000 of these aquatic mammals arrive on the isolated shores to mate and give birth to new pups. Here we’ll learn that more than 9,000 pups are born in this region each year. Next, we’ll journey inland to the Island of Rum to witness one of the largest deer in the world, the red deer. We’ll learn that adult males typically weigh around 450 pounds and stand nearly 6 and a half feet tall. We’ll witness as these massive bucks fight aggressively with their mighty antlers to win mating rights for the island’s female population. Finally, we explore one of the region’s most mysterious animals, Ancient Man. We’ll discover that it is believed man reached the islands over 6,000 years ago during the Iron Age. We’ll learn that these ancient humans brought along with them primitive sheep that still roam the countryside today. We’ll also explore the ancient stone dwellings that were carved into the landscape and see towering stone monuments whose mystical origins still baffle experts today.

[Educational Message: The world we recognize today is billions of years in the making. The amazing plants and animals living on Earth deserve our respect and protection.]

THE VOYAGER WITH JOSH GARCIA

SANDS OF TIME [VJG319]

Host Josh Garcia arrives at the port city of Aqaba, Jordan, where he can see the coastlines of Israel, Egypt, and Saudi Arabia from Aqaba’s port. Though virtually landlocked, Jordan has 17 miles of coastline which attracts divers from all over the world. The Gulf of Aqaba is at the northern end of the Red Sea, and there’s a wide variety of coral reefs and other sea life that thrive in the water. To learn more about coral reefs and Jordan’s conservation efforts, Josh meets with a local conservationist who takes him on a dive in the Red Sea. Coral reefs are formed by corals that secrete calcium carbonate to form a hard skeleton. Next, Josh heads north to Wadi Rum, a protected desert wilderness of red sand dunes and granite rock formations. Human existence in Wadi Rum has been traced back to prehistoric times. Josh makes the trek and meets with members of a Bedouin tribe who show him how to prepare Jordan’s national dish, mansaf, and they instruct him on the proper way to eat it. The name of the dish, “mansaf,” comes from the Arabic word meaning “large tray or “large dish.” Mansaf is prepared with rice, meats, and yogurt, and served with a traditional bread, called “shrek,” or a round unleavened flatbread. Finally, Josh visits the ancient Nabatean capital city of Petra. Built over 2,000 years ago, Petra is considered one of the most famous and important archaeological sites in the world, and a spectacular marvel of Jordan’s ancient ingenuity and place in world history. Josh walks through the historic canyon in wonder and learns about the tomb carved into stone for King Aretas IV, who was the King of the Nabateans from around 9 BCE to 40 CE. King Aretas IV’s tomb, known as the Treasury, is nearly 131 feet high and has two floors.

[Educational Message: When it comes to marine conservation, if we can understand what a coral reef is, we can actually enhance the pre-existing conditions of that reef in our immediate environment, allowing it to thrive.]

EARTH ODYSSEY WITH DYLAN DREYER
WILD CREATURES OF THE CARIBBEAN [EDD503]

Today on Earth Odyssey, host Dylan Dreyer takes us on a tropical trip to the Caribbean to learn more about the animal icons of these wild islands. First up, we'll travel deep in the tropical islands of the Caribbean to learn about an indigenous mammal whose role is paramount to the survival of a vast array of plant and animal species, the Antillean fruit-eating bat. A major contributor to the proliferation of seeds and pollination of plants, bats are a critical species in this environment. Despite weighing less than two ounces, these medium sized bats have a wingspan of nearly two feet long. We'll learn that colonies of Antillean fruit-eating bats have been found in caves with at least two-thousand inhabitants. We'll discover that Antillean fruit-eating bats will feast on insects in addition to fruit, pollen, and nectar. Next, we'll learn about an insect that is common along the shores of the Caribbean, the horse guard wasp. Also known as Hymenoptera, these wasps play a critical role in pollinating plants as well as predation of destructive insects. While large in size, we'll learn that horse guard wasps are not aggressive and are surprisingly solitary creatures. Unlike its social cousins, we'll discover that each horse guard wasp lives its life independently alongside others.

[Educational Message: In this episode, we traversed the tropical islands of the Caribbean. With unique plants and animals that have found a way to thrive where others simply could not exist, the islands of the Caribbean give us a window into the beautiful diversity of nature. Even in a tropical paradise, adaptation and ingenuity are key for any animal's survival.]

WILD CHILD
FURRY FAMILIES [WLC314]

Today on Wild Child, host Sheinelle Jones takes us around the world to find the furriest baby animals on our planet. First up, we'll visit the coastal cliffs of New Zealand to visit with a colony of fur seals. Female fur seals give birth almost every year of their adulthood. Here we'll spend the morning with fur seal pups while their mother goes hunting for breakfast. We'll learn that pups start to feed on solid food after about one year. Fur seal pups spend a large proportion of time playing with other pups and objects such as seaweed and reef fish, attaining skills they'll need later in life. We'll find out that fur seals are most at home in the water, spending months away from land at a time. Next, we'll get a closer look at the national animal of Finland, the Eurasian brown bear. Native to Europe, Asia, and North America, the brown bear has the largest geographical distribution of any bear species. Bears are omnivores, meaning they can enjoy both plants and meat in their diet. We'll find out that Eurasian brown bears can weigh up to 780 pounds. Brown bear cubs have about two years to enjoy their mother's care and learn the ways of the wild before they venture out on their own.

[Educational Message: In this episode, we traveled the globe to find the world's most remarkable baby mammals. It's amazing to see how each of these versatile animal families thrive in their unique part of the world. Whether in oceans, on ice, or in dense forest, mammals have shown that sticking together is a tried-and-true survival tool.]

**HARLEM GLOBETROTTERS: PLAY IT FORWARD
SWIMMING WITH WHALE SHARKS [HGL114]**

Today on Harlem Globetrotters: Play it Forward, host Craig Robinson takes us to join wounded veterans for an extraordinary encounter with whale sharks in Atlanta. Then, we'll learn about a special art education program in Oakland, California. First up, we'll travel to the Georgia Aquarium to learn more about the Wounded Warrior Project. Specifically, we'll find out more about a diving immersion project at the aquarium that provides a unique therapeutic opportunity for veterans. Here we'll also discover more about the various species of fish they will be surrounded by during their dive. We'll learn that whale sharks are the largest species of fish, but they eat some of the tiniest creatures in the ocean. Next, we'll join Torch and Jet as they visit an arts education program in Oakland, California. We'll learn more about how this local program provides free arts education to students in underserved communities. Here we'll see firsthand how creativity knows no bounds as the Globetrotters join the students to create music from all kinds of household objects.

[Educational Message: In this episode, we learned more about the incredible therapeutic power that diving with whale sharks can have on those in need. We witnessed the profound impact this unique program can have on veterans suffering from conditions such as anxiety and post-traumatic stress disorder.]

**ONE TEAM: THE POWER OF SPORTS
RING THE BELL [TPS316]**

First, we learn how Allyson Felix balances life as a mother and as an Olympian; and she explains how she found a new purpose to succeed after becoming a mother. The 100-meter sprint is the shortest race in the Olympics, and Allyson Felix is already the most decorated female athlete in U.S. track and field Olympic history. Next, when Zac Bell's dream of making it to the NHL was cut short by injury, he found ways to inspire with some amazing stick tricks. Zac took to hockey from a young age and signed a contract with the NCDC in Maine to pursue a future in the NCAA. Unfortunately, multiple head injuries resulted in a need to reinvent the path forward. Instead, Zac found a way to fill the void by creating content videos to inspire people to get involved in the sport. With hundreds of thousands of followers all over social media, Zac is bringing the love of hockey to new fans every day.

[Educational Message: Purpose can hold a powerful meaning and is something unique to everyone. Viewers learn the importance of finding that purpose, and how life-altering experiences can often bring about a journey of self-discovery.]

**EARTH ODYSSEY WITH DYLAN DREYER
GALAPAGOS [EDD103]**

Today on Earth Odyssey, host Dylan Dreyer takes us on an adventure to the Galapagos Islands. A volcanic hotspot off the coast of South America, the Galapagos Islands are a living museum and showcase of evolution. We'll learn more about the 19th century botanist Charles Darwin, and how he used the Galapagos Islands as his own laboratory. We'll follow Charles Darwin's trail to see how he studied the evolution of animals and plants on these islands. We'll take a closer look at the bizarre and beautiful species that Darwin studied, from the prehistoric giant tortoises to the blue footed boobies. On our journey,

we will see how each species adapts and finds a way to survive, despite the unforgiving conditions of these volcanic islands. Next, we'll find that some islands in the Galapagos are still harboring active volcanoes. We'll get an up-close look at the volatile world of Fernandina, Galapagos' youngest island. Fernandina's plants and animals must cope with the constant threat of volcanic eruptions. Living within a hostile land environment, we'll meet the only lizard in the world that's learned to fish for its dinner, the marine iguana. To brave the ocean currents, these cold-blooded reptiles spend time warming their bodies on sun-kissed rocks before taking the plunge. Each fishing trip for these creatures is a race against time. We'll discover how marine iguanas evolved over time to make the most of their underwater meal. Finally, we'll hop over to the older Galapagos islands with less volcanic activity. We'll learn how their stable environment is creating an opportunity for a more diverse and abundant wildlife scene.

[Educational Message: We witnessed first-hand how Dr. Charles Darwin's visit to the Galapagos Islands shaped our understanding of our natural world. Adaptation and evolution play an important role in our survival. We must always seek knowledge to understand more about the world around us.]

THE VOYAGER WITH JOSH GARCIA

VIKING TERRITORY [VJG208]

Host Josh Garcia sails into Copenhagen, the storybook capital of Denmark. First Josh visits the famed Viking museum to learn how Viking ships were built. He travels back in time as he learns the techniques and mechanisms used by Vikings and takes part in building one of these ships in exactly the same fashion. Vikings were Norse seafarers that lived between the 8th and 11th centuries. Then Josh visits a local restaurant known for the country's national dish and learns that there's more to smorrebrod than just any old open face sandwich. Smorrebrod is all about mixing texture and complex flavors and is traditionally made with dark rye bread and herring. Herring is a fatty fish that is traditionally salted, smoked, or pickled. With the help of this local chef, Josh learns how to elevate this open face sandwich into a work of art. Finally, Josh ventures out to sea and explores the massive wind turbines that help generate the city's power. Denmark is a leader in renewable energy, and the power from wind turbines covers nearly forty percent of the country's power consumption. These wind farms are located in the North Sea because they are able to capture more wind since there's no interference from land or trees.

[Educational Message: Things aren't always what they appear to be on the surface, and sometimes it's best to reserve your judgment until you have more information and a better understanding of what's beneath the surface.]

EARTH ODYSSEY WITH DYLAN DREYER

BRINGING UP BABY...BABOONS! [EDD514]

Host Dylan Dreyer takes us across the globe to join a troop of baboons and discover more about the fascinating life cycle of these mercurial monkeys. A baboon's life, much like humans, relies heavily on social connections and a deep sense of community. We'll learn that no baboon can survive successfully in the wild without its clan. This mutual dependence on one another has formed unique and sometimes unexpected habits from the day they're born. First, we'll find out that infant baboons will feed from their mothers for about two years. We'll learn that even at a young age, baboons will wrestle, fight, and argue to establish a social hierarchy as well as dominance. At around seven years old, male baboons will move to new troops and often challenge the alpha upon arrival. We'll discover that alpha male baboons can weigh up to eighty pounds, which is double the size of an average member of the clan. We'll learn that baboon clans can be gargantuan with some groups having up to three hundred members. Baboons spend the

majority of their time on the ground but will use trees to sleep, forage, and hide. We'll also discover that female baboons inherit their social status within the troop from their mothers.

[Educational Message: Baboons are an iconic species recognized all over the world, but their lives are far more complex than meets the eye. We learned that from birth these fascinating creatures live in a precarious balance of play versus conflict. For these powerful primates, survival is only possible when they all work together.]

WILD CHILD

WALKING AMONG US [WLC316]

Host Sheinelle Jones takes us back to the places where wild and urban collide to meet the adorable animals that have mastered both. First, we visit the gardens of the urban jungle to learn about the lifecycle of a fascinating insect: the praying mantis. Females will carefully lay between 100 to 400 eggs on a sturdy leaf or branch. When conditions are warm enough, the egg cases crack, and babies begin to hatch. As they develop, praying mantis babies go through up to six molting stages before they reach maturity. Next, we hit the links and learn more about the animals that make their homes on urban golf courses and country clubs. We start the day with a mother hedgehog and her baby on a morning stroll in the rough. We'll learn that hedgehogs are named after their favorite foraging sites, hedges. Hedgehogs were originally called "urchins," which led to the naming of sea urchins. We'll also find a Eurasian coot with her hatchlings as they're foraging for breakfast. In just eight weeks, coot chicks will become independent and must fend for themselves. During their breeding and hatching season, Eurasian coots become overly aggressive and territorial to defend their young.

[Educational Message: In this episode, we took a safari into the cities to reveal the wild animals living in urban environments. Each one of these amazing creatures has learned how to thrive in our human made environments while passing along their urban knowledge to the next generation.]

HARLEM GLOBETROTTERS: PLAY IT FORWARD

RUNNING TO GRANDMA'S PLACE [HGL116]

Host Craig Robinson takes us to check out a gelato company where we'll learn some tips on successful entrepreneurship. Then, we'll follow Jet, Hotshot, and Cheese as they visit with local children and encourage literacy in Harlem, New York. First up, Hammer and Torch explore their entrepreneurial curiosities when they visit an Atlanta gelato company. Here, we learn more about the process of developing a business plan and starting your own company and about the "Give Back" model of business that allows customers to make a positive impact on their community simply by purchasing local goods. Next, we travel to Harlem, New York where we'll meet two community members who've committed their passion of reading to teaching children. Our players visit a literacy center called "Grandma's Place" and find out about the reading programs that are helping to educate local Harlem children. We'll join Jet, Hotshot, and Cheese as they participate in story time with a classroom of children and learn more about the history of their neighborhood.

[Educational Message: In this episode, Hammer and Torch learned some of the ins and outs of becoming an entrepreneur. We learned that small businesses can not only be profitable but can have a positive impact on the community as well. We also learn that in entrepreneurship it's important to have big goals, but to always start small and surround yourself with the right people.]

ONE TEAM: THE POWER OF SPORTS

LONG ODDS [TPS317]

First, the emotional story of a boy and a horse and the relationship that makes them both winners. Cody Dorman was born with Wolf-Hirschhorn syndrome, and he spent a lifetime overcoming long odds. Every fall over the past 15 years Keeneland Racecourse has hosted Make-A-Wish Day. Cody got his wish with a visit to Gainsborough farm to meet a racehorse. They formed a connection, so the horse got the name Cody's Wish. That bond was front and center for the world to see at the 2022 Breeder's Cup, when, with Cody in attendance, Cody's Wish ran a miraculous race to victory. Next, see how the U.S. Army's world-class athlete program helps brave men and women reach their athletic goals. For some athletes, representing their country is a daily responsibility and honor. In the shadow of Pike's Peak just south of Colorado Springs is Fort Carson, a U.S. Army post and home of the army's world-class athlete program. Soldiers for the U.S. Army compete with the best Olympians and Paralympians in the world. The Army's world-class athlete program has sent over 40 soldiers to compete in the last 4 Olympics, with several soldiers ready to qualify for the 2024 Paris games.

[Educational Message: Discipline and training are not the only assets of a champion. Viewers learn the effect of hope, and how it can inspire one to push forward, through even the biggest struggles.]

EARTH ODYSSEY WITH DYLAN DREYER

CHINA [EDD104]

Today on Earth Odyssey, host Dylan Dreyer takes us on an exploration of a hidden oasis known as the Yunnan, in Southwest China. We'll discover that this remarkable region consists of lush valleys, tropical forests, and some of the most rugged mountain peaks on earth. With its wide array of landscape and climates, we'll learn that it is the perfect home for approximately half of China's birds and mammals. With a vast range of climates, we'll discover how these creatures have learned to adapt and survive in vastly different environments. First, we'll begin our journey in the lowland forests of the Yunnan, home to one of the biggest monkeys in Asia, the Chinese stump tailed macaque. We'll discover how these highly social primates live in groups of around fifty individuals, and how the fertile evergreen forest provides all the food and water they need to survive. We'll follow these fascinating primates to learn about their eating habits, their social structure, and their daily fight for survival. Next, we'll make a trek up to the top of the Hengduan Mountains to meet a mysterious group of primates who inspired the legend of the abominable snowman. In truth, these strange looking primates are actually known as snub-nosed monkeys. We'll discover how these creatures have adapted and learned to survive in the frigid, snowy mountains. Not to mention, we'll witness how snub-nosed monkeys are some of the most breathtaking tree swingers on Earth. Here we'll learn how there are four types of primate locomotion such as vertical clinging, quadrupedal, brachiation, and bipedalism. Finally, we will meet a group of fishermen who, for a thousand years, have trained and used the hunting skills of cormorant birds to help them fish the mighty rivers of the Yunnan.

[Educational Message: Nature can be an unforgiving environment, and we must always respect its beauty and power. We should always seek to learn new ways to adapt to changes in our world in order to thrive and survive.]

THE VOYAGER WITH JOSH GARCIA
AWESOME AUCKLAND [VJG322]

Host Josh Garcia sails to one of the most visited cities in the Southern Hemisphere, Auckland, New Zealand, which lives up to its reputation as being a multicultural, laid-back urban environment that celebrates the great outdoors. Nicknamed the “City of Sails,” its harbors are filled with yachts of all sizes. To get the lay of the land, Josh meets with a group of Maori dancers who proudly carry on one of their ancient traditions, the haka. The greatest concentration of Maori, an indigenous Polynesian people, resides in Auckland. It’s believed the Maori explorer, Kupe, first made landfall on the North Island around 1,000 years ago. Josh learns some of the basic moves of the haka and tries them out with these Maori dancers. Then, Josh climbs high to the top of Auckland’s famous Harbour Bridge where he gets a spectacular guided view of the city. The Harbour Bridge spans the Waitemata Harbour, connecting the northern area with downtown Auckland. The Waitemata Harbour covers an area of 70 square miles. The bridge itself is just over three quarters of a mile and summits at about 200 feet. It took four years and a team of 1,000 to build the bridge which opened in 1959. Next, he visits a local farm where he learns why New Zealand is famous for its sheep and he’s challenged to test his skills as a sheep herder. Finally, Josh learns why it takes a team to sail a racing yacht when he has a lesson in sailboat racing on board New Zealand’s most famous racing sailing yacht. The kiwi bird is the national symbol of New Zealand and a popular nickname for a New Zealander. Given the popularity of sailing in New Zealand, some are even nicknamed yachtie. New Zealand sailors compete and win races all over the world, and it takes years of training and conditioning to sail competitively.

[Educational Message: Trying out a new activity and sticking with it can be an incredibly rewarding experience. If you are new to something, don’t shy away from what you don’t know, but instead jump in and you might surprise yourself with what you can learn in the moment.]

EARTH ODYSSEY WITH DYLAN DREYER
CURIOSITIES OF THE CARIBBEAN [EDD515]

Host Dylan Dreyer takes us on a tropical journey to the Caribbean to visit the one of the world’s richest regions of biodiversity. First, just a few steps away from the Caribbean shore, we’ll find colonies of least terns building their nests. Least terns make their nests on the sandy ground, which brings hazards that each couple must face together. We’ll discover that least terns live in groups to exchange information about food sources and detect predators. We’ll also learn about another fascinating bird species that calls this region home, the Antillean nighthawk. With their unique plumage and an incredible ability to stay absolutely still, we’ll find out that Antillean nighthawks are masters of camouflage. Next, we’ll meet with one of the Caribbean’s aquatic residents, the green sea turtle. We’ll discover that female sea turtles have been known to travel up to 1,500 miles to reach their nesting site. In a single nesting season, females lay between two and six clutches of eggs, each containing 65 to 180 individual eggs. We’ll learn that eggs in the same nest all hatch within days of each other and the baby turtles will make their way to sea together.

[Educational Message: The Caribbean is a wealth of biodiversity with creatures as unique and beautiful as the land they call home. Through the generations, these animals have adapted to become Caribbean specialists, able to navigate the limited resources and bouts of extreme weather with expert precision, doing everything it takes to thrive in the wild.]

Duration (hh:mm:ss): 00:30:00

WILD CHILD

CONTINENTAL CHARACTERS [WLC317]

Host Sheinelle Jones takes us east of the Atlantic Ocean for a European baby animal safari. First, we'll learn more about a familiar animal with a wild side: the feral pig. We'll discover that wild pigs are able to detect some odors up to seven miles away and up to ten inches underground. Also, while these super-sniffers may not have the best eyesight, their sensitive noses are excellent at leading the way to tasty morsels. Next, we'll venture deeper into the woods to get a closer look at the national animal of Finland, the Eurasian brown bear. Native to Europe, Asia, and North America, the brown bear has the largest geographical distribution of any bear species. Bears are omnivores, meaning they can enjoy both plants and meat in their diet. We'll find out that Eurasian brown bears can weigh up to 780 pounds. Brown bear cubs have about two years to enjoy their mother's care and learn the ways of the wild before they venture out on their own.

[Educational Message: In this episode, we took an adventure back to Europe to discover the young animals that call this diverse and incredible landscape home. We learned that it takes resilience and flexibility to survive in such a diverse environment with numerous changes throughout the seasons.]

Duration (hh:mm:ss): 00:30:00

HARLEM GLOBETROTTERS: PLAY IT FORWARD

NEW TEAMMATES [HGL117]

Host Craig Robinson takes us to Chicago to learn about the humble beginnings and history of the Harlem Globetrotters. Then, we'll take a trip around the world to learn more about the incredible places the Globetrotters have visited. First, we'll visit the Wendell Phillips Academy High School, the oldest Black high school in Chicago. We'll learn that, in 1926, some of the school's former students started a basketball team that would soon become known as the Harlem Globetrotters. We'll learn that the Chicago-based team incorporated the Harlem name as a clever marketing strategy. We'll also discover that the Globetrotters basketball team was created before the formation of the National Basketball Association. Next, we'll learn interesting facts about some of the incredible places that the Globetrotters have visited over years. On Jet's trip to California, we learned the Golden Gate Bridge's distinctive color provides enhanced visibility for passing ships in the often-foggy conditions of the San Francisco Bay. On Hotshot's visit to Italy, we discovered that the Colosseum in Rome is the largest amphitheater ever built. On Torch's travels to France, we learned that Eiffel Tower was the centerpiece of the 1889 World's Fair.

[Educational Message: In this episode, we discovered more about the history of the Globetrotters and some of the interesting facts the players have learned in their travels around the world. We'll hear firsthand how traveling and being open to new experiences and cultures can have a profound impact on our understanding of the world.]

ONE TEAM: THE POWER OF SPORTS

A PARENT'S LOVE [TPS318]

First, Paralympic medalist Mallory Weggemann shares her journey of training and competing while pregnant. After a routine medical procedure left her paralyzed from the waist down, Mallory broke eight world records within two years. And two years after that, she won her first of three Paralympic gold

medals at the 2012 London games. While Mallory's disability doesn't prevent her from having children, her husband Jay's infertility made natural conception impossible. Mallory and Jay went through surgery and ten months of IVF treatment to get pregnant. At age 33, she competed at the Para Swimming National Championships, and she did it while 26 weeks pregnant with her first child. Mallory gave birth to a baby girl, who will get to see her incredible mother compete in her fourth Paralympic games in Paris. Next, Jennifer King and Natalia Dorantes pave the way for more women in the NFL. Coming from diverse backgrounds, both women pursued football careers from a young age. They became the first black and Latina staff in the NFL, respectively. They work hard to not only grow as coaches but hope to inspire the next generation of women in pro football. While there's still ways to go, in 2022, women made up twenty-five percent of NFL teams' senior administration, and there are a record 15 women that are part of team coaching staffs.

[Educational Message: It takes trailblazers of all kinds to help spread the seed of diversity. Viewers learn the importance of representation and how it can create more paths where there might have been fewer or none at all.]

Duration (hh:mm:ss): 00:30:00

**EARTH ODYSSEY WITH DYLAN DREYER
CARIBBEAN [EDD105]**

Today on Earth Odyssey, host Dylan Dreyer takes us on a journey to the Caribbean Islands. We'll discover that the Caribbean Islands are a string of more than 7,000 islands between North America and South America. First up, we'll learn about the violent beginnings of the Caribbean Islands, and how volcanic eruptions shaped the land many years ago. We'll witness how the fertile volcanic soil on the islands soon created lush, tropical forests full of wildlife. Next, we'll learn more about the leatherback sea turtles that call the Caribbean home. The largest of all sea turtle species, we'll discover that the leatherback can grow to roughly six feet in length and weigh as much as a small car. Next, we'll learn how sunken ships get a second life as man-made reefs for numerous species of coral and marine life. We'll also discover how the Caribbean Islands are located in "Hurricane Alley," making this region more vulnerable to powerful natural events. We'll find out where the animals retreat to when they are caught up in the storms, and how they rebuild once the weather passes. Next, we'll meet the National Bird of Trinidad, the scarlet ibis, and find out where their unique color comes from. Here we'll learn that the scarlet ibis gets its unique color from its diet, which consists primarily of crabs rich in the pigment, carotene. We'll discover that the scarlet ibis is actually born with grey feathers, earning its flashy red color over time. Finally, we'll learn about the hummingbirds that are found throughout the Caribbean Islands. We'll discover that their hearts work like an engine, beating up to five hundred times per minute. To keep their energy up, they need to feed constantly. Always on the move, we'll learn that hummingbirds will consume almost three times their body weight every day.

[Educational Message: A habitat of extreme climates and conditions requires clever adaptation and determination for survival. We should always respect and appreciate the beauty and power of nature.]

Airdate: 29 April 2023

Time:

Duration (hh:mm:ss): 00:30:00

**THE VOYAGER WITH JOSH GARCIA
CITY OF DELIGHT [VJG108]**

Host Josh Garcia travels to Paris, France where he takes a tasting tour with a local Parisian foodie, meets a master craftsman whose specialty is vintage umbrellas, and learns the art of French gastronomy from a renowned chef. First, Josh samples a variety of different Parisian treats with the help of a food tour guide, who shows him some local favorites. While visiting a fromagerie, or cheese shop, Josh learns there are over 400 varieties of French cheese, usually named after the town or region of origin. Next, Josh learns a

lost art from a master craftsman who restores and creates one-of-a-kind umbrellas and parasols, which were chic fashion accessories in 19th century Paris. Finally, Josh takes a cooking class to learn how to make French cuisine after he returns from his travels.

[Educational Message: Keeping an open mind and a willingness to explore is important to leading a fulfilling life and understanding others.]

Airdate: 6 May 2023

Duration (hh:mm:ss): 00:30:00

EARTH ODYSSEY WITH DYLAN DREYER
SUPERSTARS OF THE SAVANNAH [EDD516]

Host Dylan Dreyer takes us on a safari to discover more about the iconic animals of Africa. First up, we'll learn more about the uncontested champion of Africa's large carnivores, the lion. Packing almost five hundred pounds of muscle and measuring four feet from shoulders to rump, lions can overcome much larger animals such as buffalo and even giraffe. We'll discover they have even hunted adult elephants, which weigh twenty times heavier than lions. Next, we'll learn more about one of the tiniest champions of pure strength, the dung beetle. For its size, the dung beetle is the strongest insect on the planet, capable of shifting a mass 1,141 times its own weight. Dung beetles also use their immense strength to challenge other males when competing for the affection of females. We'll find out that whatever obstacle it may encounter, the dung beetle always makes a straight line towards its objective, taking the shortest path. We'll also learn that dung beetles thrive on every continent on Earth except for Antarctica.

[Educational Message: In this episode, we discovered more about the amazing animals that call Africa home. The African Savannah is teeming with celebrity creatures so iconic and loved, they've dazzled humans since the dawn of history. From the largest carnivores to the strongest insects, Africa's incredible wildlife needs to be protected for generations to come.]

WILD CHILD
FAMOUS FLYERS [WLC318]

Host Sheinelle Jones takes us around the world to learn more about our planet's most amazing avian animals. First, we'll meet a bird that's famous for hovering over this region of the world, the common kestrel. Often found nesting on the ledges of buildings, these petite and precise hunters have adapted well to human impact. We'll learn that female common kestrels can lay between three and seven eggs. We'll find out that only female common kestrels incubate the eggs, while the male is responsible for getting her food. Kestrels hunt by hovering roughly thirty-five to sixty-five feet off the ground as they search for prey. We'll learn that these small but feisty birds of prey are known to live up to a decade in the wild. Next, we'll discover more about another impressive bird, the white stork. These love birds are monogamous, staying with their partners for life. After sharing incubation duties for about a month, white stork parents will be rewarded with a nest full of fluffy hatchlings. We'll learn that white stork nests can be more than six feet wide and three feet deep. Many cultures value the stork as good luck and place platforms on their roofs for storks to nest in.

[Educational Message: In this episode, we took an adventure to the skies to learn more about the diverse array of avian that call our planet home. We discovered that each species has its own unique traits and personalities that make them truly majestic to see in the wild.]

**HARLEM GLOBETROTTERS: PLAY IT FORWARD
YES YOU CAN! [HGL118]**

Host Craig Robinson takes us to Arizona where Hammer, Bulldog, and TNT will help empower and motivate local youth at a renowned afterschool program. Then, Bulldog, Jet, and Hotshot learn about the value of financial literacy while discovering the game of golf. First, we'll join the Globetrotters as they visit an afterschool program that's helping to educate and empower the local youth of Chandler, Arizona. Here the Globetrotters will join the program's robotics team and witness the students showing off their coding and programming skills. Next, we'll travel to the Country Club at Woodmore in Washington, D.C. where the Globetrotters will learn more about financial literacy from a local entrepreneur and neobank owner. We'll learn that typically, neobanks don't have physical locations and offer services through apps and mobile devices. We'll find out that having a better understanding of finance and budgeting will benefit you when applying for loans and planning for your future.

[Educational Message: In this episode, we joined the Globetrotters as they hit the golf links and met with a local entrepreneur to find out more about financial literacy. We learned there is increased earning power for college graduates versus high school graduates. Also, we found out why it's important to better understand finance to avoid taking on too much student loan debt.]

**ONE TEAM: THE POWER OF SPORTS
A STORIED PAST [TPS319]**

First, golf in the last few decades has become a more competitive sport thanks to greater diversity on the field of play. Because of the lack of courses African Americans were permitted to play in the 1920s, two groups formed to help fight that discrimination: the all-male Royal Golf Club and the all-female Wake-Robin Golf Club. Together they continued to petition the department of interior to grant them a new public course. Secretary Ickes made the decision to have Langston built in 1939. In 1945, the National Parks officially called for full integration across all its properties. Although many heavyweights of society have made their way to Langston over the years, today, it continues to be a home for anyone that comes through its doors. Next, the women of the Iron Dames are taking their turn on the racetrack. Over the past twenty-five years, women have slowly been able to find opportunities in professional motor sports. There have been a few successful female drivers, but now, an all-female team competing at the highest levels is in pole position to change all of that. The Iron Dames is a project supporting females in motor sport, and not just drivers, but females in general, mechanics, engineers, team managers.

[Educational Message: Equality is a necessary component in leveling the playing field. It opens doors, encourages growth, and fosters new relationships. Viewers learn the power of coming together to fight for change and create opportunities.]

**EARTH ODYSSEY WITH DYLAN DREYER
TURKEY [EDD106]**

Today on Earth Odyssey, host Dylan Dreyer takes us on a journey to Turkey. Wedged in between Europe and the Middle East, we'll discover why Turkey is a country of extreme temperatures and landscapes. In Turkey, conditions can quickly deteriorate with heavy downpours, blinding snowstorms, and even burning

heat. We'll find out how this country's largest land mammal, the brown bear, copes with such a hostile environment. Here we'll learn that two layers of fur protect the brown bears from harsh weather. Next, we'll go rock climbing with Turkey's Anatolian wild goats, considered one of the best mountaineers in the world. We'll follow a group of wild goats as they trek alongside thousand-foot cliffs. Here we'll discover how the wild goats have uniquely adapted hooves and eyesight that allow them to traverse these great heights. Next, we'll journey to the wetlands of Turkey and witness a thriving ecosystem fed by the rich minerals of the volcanic earth. Here we'll find some of the most colorful birds in the world, including the bright pink greater flamingos. We'll witness first-hand how these long-limbed birds fish for shrimp in the salty waters. Here we'll learn how the flamingos get their name from "Flamenco," a Latin word meaning fire. Finally, we'll visit the wild beaches of Turkey and learn more about the loggerhead sea turtles that nest in these areas. We'll discover that while the sandy beaches are a popular nesting spot for the turtles, there are numerous predators lurking, such as ghost crabs. As the baby loggerhead turtles finally hatch, it's a race to the open ocean waters before the crabs can catch up.

[Educational Message: We are constantly faced with new challenges and environments in our lives. Living in extreme climates requires strength and adaptation in order to ensure survival of future generations.]

Duration (hh:mm:ss): 00:30:00

THE VOYAGER WITH JOSH GARCIA

ALOHA SPIRIT [VJG301]

Host Josh Garcia sails to Oahu, Hawaii and explores the dynamic local culture. First, Josh takes a walk on the iconic Waikiki Beach and learns its history as the birthplace of surfing. The Polynesians were the first people to arrive on the island by way of canoe, and canoeing remains a popular activity on the island. Chinese, Japanese, and Filipino influences have also made their mark on this small island's culture, especially in the popular local foods. Then, Josh learns that there's more to leis than flowers, and that traditionally they can be made out of kukui nuts, feathers, and banana leaves. The kukui nut is from the kukui tree, the official state tree of Hawaii. Different leis have different meanings; for hula leis, different leaves are used depending on who is being honored in song. Next, Josh joins a local chef to help prepare a unique take on a popular Asian-style roll. Then, Josh tests his stamina and rhythm while training to be a hula dance warrior. Hula was brought to Hawaii by Polynesians and was handed down orally through generations. This ancient style of dance is called Hula Kahiko. Ancient warriors used hula to develop Lua martial art skills. After a taste of hula warrior training, Josh witnesses an ancient hula celebrating the sun. Finally, Josh gets to paddle a canoe out of Waikiki Beach with a professional canoe racer.

[Educational Message: When many different cultures come together to define the culture of a city, you might witness a unique fusion of these cultures in the local cuisine, customs, and practices.]

Duration (hh:mm:ss): 00:30:00

EARTH ODYSSEY WITH DYLAN DREYER

LOST ALONG THE LOIRE [EDD517]

Host Dylan Dreyer takes us along the river's edge to find the wonderful and unique wildlife of the Loire. First, we'll learn more about a unique bird that calls this region home, the kingfisher. Here, we'll witness how a male kingfisher attracts a potential mate by building a nesting burrow. We discover that kingfishers catch their prey blind, closing their eyes as they dive into the water. We also find out that the kingfisher's beak is so aerodynamic, the Japanese bullet train is modeled to mimic it. Next, we travel down the Loire to an estuary where we learn about another impressive avian family, storks. Since the first storks were spotted here around thirty years ago, their numbers have kept on growing. This spring, there are more than one hundred mating pairs nesting around the active estuary. We find out that stork nests are reused for

generations, increasing each year in both size and weight. The fields by the Loire offer storks and their hatchlings a varied menu of small crustaceans, insects, and frogs. We learn that stork hatchlings become independent and leave the nest at around eight to ten weeks old.

[Educational Message: In this episode, we discovered that the Loire River is ancient, beautiful, and critical to both French society and Europe's wildlife. It may not be as well known as the Eiffel Tower, but this 600-mile stretch of water is a big part of what makes France so magnificent.]

Airdate: 13 May 2023

Duration (hh:mm:ss): 00:30:00

WILD CHILD

WONDERS OF THE WATER [WLC319]

Host Sheinelle Jones takes us on an underwater adventure to find the world's wildest water babies. First, we visit with a colony of fur seals. Female fur seals give birth almost every year of their adulthood. Here, we spend the morning with fur seal pups while their mother goes hunting for breakfast. We learn that pups start to feed on solid food after about one year. Fur seal pups spend a large proportion of time playing with other pups and objects such as seaweed and reef fish, attaining skills they'll need later in life. We find out that fur seals are most at home in the water, spending months away from land at a time. Next, we learn more about an aquatic animal that stands out from the rest, the cuttlefish. Not actually a fish, we discover that cuttlefish are part of the same group as octopus and squids known as cephalopods. Along with being impressive ink squitters, these creatures are renowned for their camouflaging abilities and high levels of intelligence. We learn that these animals are so brilliant they can even count and remember what, where, and when they last ate. As hatchlings, cuttlefish are completely independent and are capable of using their tentacles to hunt and feed.

[Educational Message: In this episode, we took a deep dive into Earth's wet wilderness to get a closer look at the most wonderful water babies around. Life in our oceans, rivers, and lakes is fast paced and changes as often as the tide, but it's full of amazing animals that have learned to react and adapt to their free-flowing environment.]

HARLEM GLOBETROTTERS: PLAY IT FORWARD

WELCOME HOME [HGL119]

Host Craig Robinson takes us to Chicago where Jet and Cheese learn about an amazing inner-city youth program that's fighting back against violence. Then, we follow the Globetrotters as they check out a community of microhomes in Atlanta, Georgia. First, we discover more about Project Swish, an organization that helps Chicago's youth turn tragedy to triumph. We find out that Chicago has a long history of gun violence with over 4,000 shooting victims in 2020 alone. We learn that shockingly, one in five of those victims is under twenty years old. We find out that these programs take place during the highest crime hours in the highest crime areas of Chicago. We learn that Project Swish not only provides kids a safe place to gather and play basketball, but the program also teaches kids about yoga, meditation, and other life-saving educational courses. Then, we join Wham, Torch, and Hammer as they learn about a unique micro-community in Atlanta, Georgia. We learn that a micro-community is a small neighborhood of densely built tiny homes that are affordably priced. Here, we find out more about the impact of gentrification and how micro-communities can be an opportunity to reverse that trend by providing more affordable and sustainable homes for the community.

[Educational Message: In this episode, we learned more about a unique organization that's helping educate and empower Chicago's inner-city youth. We witnessed the incredible impact of having a safe location for kids to gather and play basketball during high crime hours. Also, we learned about the importance of mental health and how practicing yoga and meditation can be beneficial.]

Time:

Duration (hh:mm:ss): 00:30:00

**ONE TEAM: THE POWER OF SPORTS
HELPING THE COMPETITION [TPS320]**

First, the trailblazing woman whose passion for Raiders football took her from college intern to the first female CEO in NFL history. The NFL's Raiders hired the first black and Latino head coaches in football, and in 1995, they hired Amy Trask, the first female CEO in the game's history. Amy fell in love with football in junior high, and eventually joined the Raiders as an intern while attending grad school. She was promoted to full-time, where she devoted herself fully to the organization and its fans. She spent almost thirty years in the National Football League with the Los Angeles Raiders and is now a football analyst for CBS sports and CBS sports network. Next, how the son of a former slave became America's first professional golfer. John Shippen was first exposed to the game of golf at the age of thirteen. He started to work as a caddy making golf clubs on the Shinnecock reservation, when he learned the game and became very good at it. When the club was hosting the second U.S. Open in 1896, he and another caddy, Oscar Bunn, a Native American of Shinnecock descent, decided that they would represent the club and play. Despite objections from the other players, Shippen went on to win the tournament, becoming the first American golf professional.

[Educational Message: Coming in first doesn't always mean winning a gold medal. Being the first can also mean changing a cultural paradigm and making history. Viewers learn that pioneering can have ripple effects; and when one person wins, it's a win for others.]

**EARTH ODYSSEY WITH DYLAN DREYER
SRI LANKA [EDD107]**

Today on Earth Odyssey, host Dylan Dreyer takes us to the island nation of Sri Lanka, located near the Southern tip of India. Although roughly the size of Pennsylvania, Sri Lanka is packed with enough wildlife to rival a vast continent. Because of its unique climate, we'll find a staggering array of creatures both large and small. Here we'll learn how Sri Lanka is home to both the world's largest land and aquatic mammals, the elephant and the blue whale. First, we'll travel to the Lowland plains, which cover more than two thirds of the island of Sri Lanka. We'll discover that this region is home to over 2,000 wild elephants, one of the largest populations on Earth. Here we'll learn more about the elephant's habitat and how they prepare for the upcoming dry season. We'll also discover that, with their specialized feet, elephants can communicate with each other using seismic signals, or ground vibrations. Next, we'll journey to Yala National Park where we'll learn more about the spotted deer that inhabit the area. Here we'll learn how the spotted deer have adapted their bodies and behaviors to the tempestuous Sri Lanka climate. We'll also learn about the unique relationship between the spotted deer and native monkeys living in the park. Allies of the deer, grey langurs warn the deer of approaching predators like the ferocious Sri Lankan leopard. Next, we'll see how toque macaques have taken to the ruins of Polonnaruwa. Once the capital of Sri Lanka, Polonnaruwa is home to Parakrama Samudraya, the largest ancient man-made lake in Sri Lanka. Here we'll follow a group of toque macaques and learn more about the strict social system and hierarchy adhered to within each group. Finally, we'll learn more about mugger crocodiles and the unique relationship they have with painted storks. Here we'll discover the fascinating symbiotic relationship that exists between these two very different animals.

[Educational Message: In Sri Lanka we find examples of animals working together to ensure their survival. Symbiotic relationships are essential to many organisms and ecosystems. Relationships like these provide a balance that can only be achieved by working together.]

Time:

Duration (hh:mm:ss): 00:30:00

THE VOYAGER WITH JOSH GARCIA
RHYTHMS OF ARUBA [VJG306]

Host Josh Garcia sails to Aruba where he is excited to explore the island and its interesting culture and history. First, Josh heads for a lesson in the steel pan, a unique instrument responsible for the distinctive Caribbean sound. The steel drum, or steel pan, originated on the island of Trinidad in the 1930s, and was introduced to Aruba by a Trinidadian around 70 years ago. This instrument is used to create a variety of rhythms, and musical notes are created by different sized indentations in the steel pan's surface. Steel pans are classified as idiophones, instruments that vibrate to produce sounds when struck, shaken, or scraped. Then, Josh heads to a pepper farm to learn how Aruban hot sauce is made. Josh picks fresh papaya, for an unlikely pairing, and is introduced to Madame Jeanette peppers, one of the hottest peppers in the world, similar to Scotch-bonnets and habaneros. Papaya is used in Aruban hot sauce since it complements the flavor of the peppers without masking it. Then, Josh visits Aruba's beautiful and diverse Arikok National Park where he explores the Fontein Cave with a park ranger and learns about the island's ancient people who created drawings on the walls of caves. This limestone cave was once a coastline and formed over 5.2 million years ago as a result of erosion and volcanic activity. Finally, Josh visits an aloe farm to learn how this plant is grown and harvested. Aloe became so important to Aruba's identity and economy that it's now depicted on the country's coat of arms.

[Educational Message: Walking through historic sites can be a unique experience in how communication has evolved over time. For example, the way we now document stories and traditions through text were once depicted in cave drawings made with red rock.]

Airdate: 20 May 2023

EARTH ODYSSEY WITH DYLAN DREYER
NEW YEAR'S NEWBORNS [EDD518]

Host Dylan Dreyer takes us on an adventure back to Africa where we'll meet a new generation ready for the new year. First, we'll learn about the wonderful wading birds that call Africa home. We'll witness how birds like grey herons wade in the shallow waters to find their prey. Experts at fishing, we'll learn that herons can eat over half their body weight in a single day. Another impressive avian with a big appetite that calls this region home is the red-breasted swallow. While there are roughly one hundred different species of swallow, we'll learn that the red-breasted swallow is one of the largest at eight inches long. We'll also find out that when food and conditions are ideal, red-breasted swallows can lay up to six eggs at a time. Next, we'll spend time with a mother spotted hyena and her pups to discover more about their fascinating behaviors. Here we'll witness how hyena pups instinctively gnaw on logs and other pieces of wood to strengthen their jaws. We'll find out that when fully grown, a hyena's jaw is capable of breaking massive bones. We'll also learn that hyena mothers are more invested in their young than any other terrestrial carnivore on Earth.

[Educational Message: In this episode, we took a journey back to Africa to find the incredible newborns of the summer sun. Life below the equator may seem upside down, but for these incredible creatures it is an opportunity to find their mate, fill their bellies, and learn the ways of the wild.]

Airdate: 20 May 2023

Time:

Duration (hh:mm:ss): 00:30:00

WILD CHILD

TALK OF THE TOWN [WLC320]

Host Sheinelle Jones takes us on a journey to find the amazing baby animals that live in our cities and animal parks. First, we'll discover more about a unique animal from down under, the grey kangaroo. We'll learn that at birth, joeys are only about the size of a jellybean. Grey kangaroo joeys will use their mother's pouch for about eleven months, even after growing to be about three feet long. In the wild, grey kangaroos like to browse open grassland and woodland areas. We'll find out that when feeding, kangaroos move with all four feet on the ground using their tail as support. Next, we'll meet an animal that's wholeheartedly embraced the urban lifestyle, the Canada goose. Baby Canada geese, known as goslings, can dive up to forty feet deep at just one day old. We'll also learn that Canada geese are monogamous and will typically mate with just one partner for life. Canada Geese usually forage in groups and on land, where they mostly feed on a variety of plants including grass, seeds, and berries. We'll discover that Canada geese can eat up to three pounds of grass each day.

[Educational Message: Endangered animals are so rarely seen in the wild, so their daily lives and habits can be a complete mystery to us. Studying them in protected sanctuaries gives biologists an incredible opportunity to understand them in ways we never could before, helping us protect and ensure their survival into the future.]

Airdate: 20 May 2023

HARLEM GLOBETROTTERS: PLAY IT FORWARD

BEATS, BRAVERY, & BASKETBALLS [HGL120]

Host Craig Robinson shows us a group of aspiring teen-girl music producers, then we see how Coach Lou and the players help create a greenspace in southside Chicago. First, we'll learn more about a program in Los Angeles called "Girls Make Beats" that teaches young girls how to be music producers, DJs, audio engineers, and more. We'll find out that only about three percent of professional music producers in the industry are female. Here we'll witness Jet, Bulldog, Wham, and Cheese as they compete to see who can create the best music beats, of course, with the help of some talented young girls. Next, we'll learn about an inspirational program that's turning empty sites into greenspaces. We'll discover that greenspaces and urban beautification projects can improve quality of life and help decrease depression and thoughts of worthlessness. We'll witness how this uplifting initiative turns once dilapidated spaces into beautiful places for the whole community to share and enjoy.

[Educational Message: In this episode, we learned about the importance of creating greenspaces in urban areas. We discovered that being in green environments is known to boost various aspects of thinking, including attention, memory, and creativity. We should all do our part to create and keep greenspaces in our everyday lives.]

Duration (hh:mm:ss): 00:30:00

ONE TEAM: THE POWER OF SPORTS

WHEN FATES ALIGN [TPS321]

First, U.S. figure skater Ilia Malinin deals with the pressures of rigorous Olympic training and physics homework. Ilia Malinin is the 2022 U.S. silver medalist in men's figure skating. He's also a twelfth grader whose favorite subject is physics. Malinin primarily trains in western Virginia where his parents Tatiana and Roman are his coaches. In 2022, Malinin became the first skater to land a quad axle in

competition, the most difficult and elusive jump in figure skating. Next, how a seven-year-old created a community for para-athletes while making his way to the Paralympics. Angel City Sports is a non-profit organization in Southern California that the Frech family started a decade ago when their son Ezra was just seven years old. Ezra was a young, ambitious boy with dreams of going to the Paralympics one day but struggled to find equal opportunities for sports. So, he and his family created a way to provide year-round sporting events in support for people with disabilities. In his first Paralympic games, just 16 years old, Ezra Frech finished fifth in high jump, and he continues to be a great ambassador for this sport.

[Educational Message: The expression “eyes on the prize” is often used in reference to achievement and goal setting. Viewers learn the importance of mental discipline when it comes to maintaining focus, especially under pressure, to curb obstacles and keep up momentum.]

EARTH ODYSSEY WITH DYLAN DREYER

CAMBODIA [EDD108]

Today on Earth Odyssey, host Dylan Dreyer takes us to the watery kingdom of Cambodia. Bordered by the countries Thailand, Laos, and Vietnam, Cambodia is part of a region known as Indochina. Cambodia is home to an incredibly diverse group of wildlife, including over 120 species of mammal. Most of Cambodia is low-lying plains, with mountains in the north, and hills to the east. Nearly 2,500 miles long, the Mekong River feeds the largest inland body of water in Southeast Asia, the Tonle Sap. Home to giant carp, giant catfish, and stingrays, we learn that the Mekong River boasts more large fish species than any other river on Earth. First, we'll visit with a group of Asian elephants, which reside primarily in the eastern plains of Cambodia. Here we'll learn how elephants forage for food using a specially adapted finger-like appendage at the tips of their trunks. We'll also discover how the migration routes of elephants have been drastically impacted by human expansion and development. Next, we'll travel to the ancient Kingdom of Angkor, a city once inhabited by more than a million human residents over 800 years ago. Today, these ruins are now inhabited by troops of macaques that have made this ancient city their home. Here we'll learn about some of the amazing habits and behaviors of these wild macaques. We'll discover that in addition to cleaning their food before eating, some macaques have been observed seasoning their food with salt water. Above the ancient ruins of Angkor, the black-shanked doucs can be seen swinging from branch to branch. We'll learn that this rare and endangered species can only be found in Cambodia and neighboring Vietnam. Next, we'll visit with an Asiatic black bear that resides in the forests of Cambodia. Nicknamed the “moon bear,” the Asiatic black bear sports a creamy white mark on its chest in the shape of a crescent moon. Able to walk up to a quarter mile on two legs, we'll learn that moon bears are the most bipedal of any bear species. Finally, we'll meet face-to-face with the elusive Indochinese tiger as it makes a brief appearance before retreating into the forest.

[Educational Message: Our society can have a big impact on the nature and wildlife that surrounds us. We must find ways to protect our surrounding nature and wildlife for future generations.]

Airdate: 20 May 2023

Time:

Duration (hh:mm:ss): 00:30:00

THE VOYAGER WITH JOSH GARCIA

SOUNDS OF LISBON [VJG219]

Host Josh Garcia spends the day ashore in Lisbon, Portugal, discovering the food, culture, and music of this Portuguese hot spot. First, at a traditional artisan workshop, Josh learns the ancient art of handcrafting Lisbon's iconic, decorative tiles. He sees firsthand how these tiles, locally known as azulejo, are made using techniques dating back to the 18th century. Azulejo comes from an Arabic word meaning “polished stone.” Next, he gets a master class in making vegetable tempura, the world-famous dish that originated in

Portugal. Tempura means battering ingredients in a batter made of flour, water, herbs, and cornstarch, before frying in oil. Later, Josh is introduced to Fado music and learns about the unique instrument behind its haunting melodies. The Portuguese guitar has twelve strings, giving the sound a different tone. The body of the guitar is made by molding thin strips of wood to bend the uniquely pear shape of the Portuguese guitar.

[Educational Message: Music can serve as a universal language and can be an expression of emotion that everyone can understand regardless of their spoken language.]

Airdate: 27 May 2023

Time:

Duration (hh:mm:ss): 00:30:00

**EARTH ODYSSEY WITH DYLAN DREYER
BRINGING UP BABY....BABOONS! [EDD514]**

Today on Earth Odyssey, host Dylan Dreyer takes us across the globe to join a troop of baboons and discover more about the fascinating life cycle of these mercurial monkeys. A baboon's life, much like humans, relies heavily on social connections and a deep sense of community. We'll learn that no baboon can survive successfully in the wild without its clan. This mutual dependence on one another has formed unique and sometimes unexpected habits from the day they're born. First up, we'll find out that infant baboons will feed from their mothers for about two years. We'll learn that even at a young age, baboons will wrestle, fight, and argue to establish a social hierarchy as well as dominance. At around seven years old, male baboons will move to new troops and often challenge the alpha upon arrival. We'll discover that alpha male baboons can weigh up to 80 pounds, which is double the size of an average member of the clan. We'll learn that baboon clans can be gargantuan with some groups having up to 300 members. Baboons spend the majority of their time on the ground but will use trees to sleep, forage, and hide. We'll also discover that female baboons inherit their social status within the troop from their mothers.

[Educational Message: Baboons are an iconic species recognized all over the world, but their lives are far more complex than meets the eye. We learned that from birth these fascinating creatures live in a precarious balance of play versus conflict. For these powerful primates, survival is only possible when they all work together.]

Airdate: 27 May 2023

Time:

Duration (hh:mm:ss): 00:30:00

**WILD CHILD
STARS OF THE SOUTHERN HEMISPHERE [WLC321]**

Host Sheinelle Jones takes us to the Southern Hemisphere to learn more about the amazing animals that call this part of Earth home. First, we'll travel to Antarctica to join a group of emperor penguins as they begin their day. At about forty-five inches tall and ninety pounds in weight, we'll learn that emperor penguins are the largest of all penguin species. We'll discover more about the habits of the baby penguins as they explore their new icy world. We'll learn that to try to stop further endangerment, all seventeen penguin species are protected from hunting and egg collection. Next, we'll learn about an incredibly fascinating insect, the monarch butterfly. Monarchs have a wingspan of about four inches and flap their wings slower than other butterflies. We'll learn that the bright orange coloring of a monarch butterfly's wings signifies to predators that they are dangerous. As harmless as they might look, these delicate insects are extremely toxic due to poisonous milkweed plants they feed on. We'll discover that monarch butterflies in North America will fly about twenty-five hundred miles to reach Southern California and Mexico for winter.

[Educational Message: In this episode, we learned more about some of the Southern Hemisphere's most wonderous wildlife. With over one million animal species thriving in this part of the world, the thriving wildlife certainly knows how to make the most of their southern home.]

Duration (hh:mm:ss): 00:30:00

**HARLEM GLOBETROTTERS: PLAY IT FORWARD
BACK TO THE MOON [HGL121]**

Host Craig Robinson shows us Cheese and TNT's visit NASA's Kennedy Space Center where they'll learn how teamwork gets a rocket to the moon and back. Then, we'll take a trip around the world to learn more about the incredible places the Globetrotters have visited. First, we'll tag along with Cheese and TNT as they visit NASA's Kennedy Space Center for the Artemis I space launch. We'll learn that the launch of Artemis I is the beginning of NASA's new mission to return astronauts to the surface of the moon. We'll find out that while there are no astronauts onboard Artemis I, future Artemis missions will carry the first woman and first person of color to the moon. Next, we'll learn interesting facts about some of the incredible places that the Globetrotters have visited over years. On Jet's trip to California, we learned the Golden Gate Bridge's distinctive color provides enhanced visibility for passing ships in the often-foggy conditions of the San Francisco Bay. On Hotshot's visit to Italy, we discovered that the Colosseum in Rome is the largest amphitheater ever built. On Torch's travels to France, we learned that Eiffel Tower was the centerpiece of the 1889 World's Fair.

[Educational Message: In this episode, we learned more about the interesting facts the players have discovered in their travels around the world as Globetrotters. We'll hear firsthand how traveling and being open to new experiences and cultures can have a profound impact on our understanding of the world.]

Time:

Duration (hh:mm:ss): 00:30:00

**ONE TEAM: THE POWER OF SPORTS
ON A ROLL [TPS314]**

First, Paralympian Brittani Coury embraces her journey to the top. As a young girl, Brittani Coury used snowboarding to escape her home life. But an injury threatened to keep her off the slopes for good. After multiple surgeries, she returned to snowboarding and eventually won the 2018 Paralympic silver medal in addition to five world cup medals. Inspired by the nurses who helped her, she also decided to study nursing in hopes of paying it forward. Today, Brittani continues to train for snowboarding competitions while maintaining her job as a registered nurse. Next, Corey Robinson visits an Olympic Teaching Kitchen to roll sushi with US Olympic Gold Medalist Tamyra Mensah-Stock. Athletes should be eating differently than the general population, based on their training load, their goals, and then phases of training. Too much sugar in an athlete's diet can cause blood sugar dips, affecting energy levels and overall performance. Athletes must make sure they are feeding their body with the right types of food, right amounts, and at the right times.

[Educational Message: From technology to a well-balanced diet, utilizing beneficial resources is a crucial step towards progress of any kind. Viewers learn the importance of support and knowing how it shapes peak performance in any aspect of life.]

Duration (hh:mm:ss): 00:30:00

**EARTH ODYSSEY WITH DYLAN DREYER
GHATS [EDD109]**

Today on Earth Odyssey, host Dylan Dreyer takes us to the Western Ghats Mountains of India. The Western Ghats Mountains stretch nearly a thousand miles from Mumbai to the southern tip of India, running parallel to India's west coast. While this mountain range covers only six percent of India's

landmass, it provides a home to more than thirty percent of its plant and animal species. We'll first meet the lion-tailed macaque, a rare primate that can only be found in the rainforests of the Western Ghats. Here we'll learn that the lion-tailed macaque's dark body and gray mane makes it difficult to spot in the shadows of the jungle. Next, we'll meet the largest venomous snake to inhabit the earth, the king cobra. Growing over fifteen feet long, king cobras are the only snakes in the world that build nests for their eggs and young. We'll also discover that king cobra's diet consists solely of other snakes. Next, we'll travel to the woodland plains on the eastern side of the Western Ghats Mountains. Here we'll follow along on a hunt with a pack of Indian wild dogs. We'll learn that Indian wild dogs live in tight knit groups and adhere to a strict hierarchy. We'll witness how these packs work and communicate as a team when securing their next meal. Finally, we'll travel along the rivers of the Western Ghats and discover the mighty Asian elephant. We'll learn that the largest population of wild Asian elephants can be found in this region.

[Educational Message: The Western Ghats Mountains are home to many unique and powerful animals. It takes strength and adaptation to survive in extreme climates. We must always respect the beauty and power of nature.]

THE VOYAGER WITH JOSH GARCIA
SWEET PARADISE [VJG218]

Host Josh Garcia docks in the captivating Spanish island of Mallorca. First, Josh takes a scenic ride through the countryside on a one-of-a-kind wooden train built over a century ago. The Sollar Train has been in service since 1912 and at one time was used to transport goods and passengers from Sollar to Palma. It's a narrow gauge train which refers to the width of the track being 3 feet compared to the standard 4.5 feet. Then, at a gourmet sausage lab, he learns how to make sobrasada, a world-famous Mallorcan delicacy. Sobrasada has been a delicacy since the 17th century and is a combination of spices and pork meat. Once it has been filled into casings, it cures for approximately six weeks. Later, Josh visits a historic bakery where he tries his hand at creating an ensaimada, the island's most beloved pastry. This pastry is made with lard, a cooking fat used to make pastries crumbly in texture. Ensaimada can be made to have different flavors, both sweet and savory.

[Educational Message: Traditions can be passed down through different generations of a family, and these traditions can evolve with modernity while retaining some of the original techniques. When it comes to cooking and baking, many recipes are handed down across generations, showing how certain ingredients and techniques are preserved in history through practice.]

EARTH ODYSSEY WITH DYLAN DREYER
CURIOSITIES OF THE CARIBBEAN [EDD515]

Today on Earth Odyssey, host Dylan Dreyer takes us on a tropical journey to the Caribbean to visit the one of the world's richest regions of biodiversity. First up, just a few steps away from the Caribbean shore, we'll find colonies of least terns building their nests. Least terns make their nests on the sandy ground, which brings hazards that each couple must face together. We'll discover that least terns live in groups to exchange information about food sources and detect predators. We'll also learn about another fascinating bird species that calls this region home, the Antillean nighthawk. With their unique plumage and an incredible ability to stay absolutely still, we'll find out that Antillean nighthawks are masters of camouflage. Next, we'll meet with one of the Caribbean's aquatic residents, the green sea turtle. We'll discover that female sea turtles have been known to travel up to 1,500 miles to reach their nesting site. In a single nesting season, females lay between two and six clutches of eggs, each containing 65 to 180 individual

eggs. We'll learn that eggs in the same nest all hatch within days of each other and the baby turtles will make their way to sea together.

[Educational Message: The Caribbean is a wealth of biodiversity with creatures as unique and beautiful as the land they call home. Through the generations, these animals have adapted to become Caribbean specialists, able to navigate the limited resources and bouts of extreme weather with expert precision, doing everything it takes to thrive in the wild.]

WILD CHILD

SNOW SEASON SUPERSTARS [WLC315]

Today on Wild Child, host Sheinelle Jones takes us into the snowy wilds to discover more about the animals that thrive in winter weather. First up, we'll travel to Antarctica to join a group of emperor penguins as they begin their day. At about forty-five inches tall and ninety pounds in weight, we'll learn that emperor penguins are the largest of all penguin species. We'll discover more about the habits of the baby penguins as they explore their new icy world. We'll learn that to try to stop further endangerment, all seventeen penguin species are protected from hunting and egg collection. Next, we'll meet an animal that has perfectly adapted to its winter environment, the snowy owl. We'll find out that the barren arctic tundra is where snowy owls choose to raise their families. We'll learn that it's dad's job to find the meals, while mom serves the chicks and ensures each baby gets a full tummy. It will take as long as seven weeks for even the boldest chick to venture out on its own. We'll also discover that snowy owls are the largest birds in the arctic with an impressive wingspan up to five feet.

[Educational Message: In this episode, we took an adventure across the globe into the snowy settings of winter. Life in Earth's colder climates isn't easy but the adaptations and survival skills that these animals have learned will help ensure their survival for generations to come.]

HARLEM GLOBETROTTERS: PLAY IT FORWARD

ART IN THE JET [HGL115]

Today on Harlem Globetrotters: Play it Forward, host Craig Robinson takes us to join a special program that is revitalizing inner city basketball courts. Then, Cheese gets a galactic lesson on what it takes to prepare food for zero gravity. First up, TNT, Torch, Wham, and Hammer shed light on the "Art in the Paint" initiative, which helps create artful basketball courts in communities that need them the most. We'll discover that basketball and art have a truly unique way of empowering communities and bringing people together. Next, we'll meet with NASA's Executive Chef to find out more about the latest innovations in space food. We'll learn that longevity and sustainability of the food are most critical when it comes to potentially lengthy space missions. We'll also discover that due to reduced gravity conditions, an astronaut's taste buds are not as effective when in space.

[Educational Message: In this episode, we learned about the incredible impact art can have on our neighborhoods and communities. We witnessed firsthand how art and basketball can combine to truly empower people and bring together all walks of life.]

Duration (hh:mm:ss): 00:30:00

ONE TEAM: THE POWER OF SPORTS
FRONT-RUNNER [TPS315]

First, Johnny Kelley proves that life isn't a sprint, it's a marathon. Running a marathon is one of the most grueling activities for any athlete. In the history of the Boston marathon, there is a legend among legends, John Adalbert "Johnny" Kelley. He won it twice, finished second a record seven times, was in the top ten 18 times, and twice represented the U.S. at the Olympic games. In addition to the Boston Marathon and the Olympics, one estimate placed Kelley at 15 races a year. In his career, Kelley ran 112 marathons, or nearly 3,000 miles. Next, after Ryan Straschnitzki's stand-up hockey career came to a halt, he pursued the game of sledge hockey to keep his dreams alive. In 2018, the Broncos junior team in Canada lost 10 teammates and their coach after a fatal bus crash. Those who survived the accident had severe injuries and faced long rehabilitations, but Ryan Straschnitzki was determined to not let anything keep him from returning to the rink. Ryan is still training on the ice, hoping to represent Canada in the Paralympics one day.

[Educational Message: Attitude is paramount above all when pursuing ambitions. Viewers learn how willpower can play a huge role in not just achieving goals but also in developing important life skills.]

Duration (hh:mm:ss): 00:30:00

EARTH ODYSSEY WITH DYLAN DREYER
FALKLANDS [EDD110]

Today on Earth Odyssey, host Dylan Dreyer shows us the rugged beauty of the Falkland Islands. Located three hundred miles off the coast of South America, the Falkland Islands are a chain of over seven hundred islands. Due to its windswept and wild landscape, we'll learn that there are no native land mammals or reptiles on the Falkland Islands. However, nature still finds a way as these islands become one of the largest breeding grounds for penguins on Earth. Here we'll learn more about the King penguin. The second largest species of penguin, the King penguin stands at three feet tall and weighs a whopping thirty-three pounds. We'll witness how King penguin parents raise their young from egg to chick in this harsh environment. We'll learn that King penguins can swim and hunt at depths of one thousand feet and can hold their breaths for up to ten minutes. Next, we'll meet the rockhopper penguin, named for its penchant for bounding along the rocky coastlines of the Falklands Islands. With their outrageous feathered faces, the rockhoppers are the smallest but perhaps the most fearless penguin species in the Falklands. Without hesitation, they plunge from terrifying heights into the churned-up waters of the South Atlantic Ocean below. Next, we'll meet the Gentoo penguin, the fastest swimming bird in the world. We'll learn that the Falkland Islands are home to over thirty percent of all Gentoo penguins, making it the largest known population of Gentoo on Earth. Finally, we'll meet the elephant seal. The largest amphibious mammal in the world, the elephant seal can grow up to twenty feet long and weigh almost nine thousand pounds. We'll learn more about the eating habits of these mammoth creatures and how they're known to hunt in the open water for up to ten straight months.

[Educational Message: The abundant fish and pristine coastlines of the Falkland Islands provide the perfect backdrop for some of the world's most unique animals. Areas such as these that support vast numbers of wildlife must be protected. We should all do our part to protect our world's natural habitats for generations to come.]

THE VOYAGER WITH JOSH GARCIA
TWO TO TANGO [VJG224]

Host Josh Garcia spends the day ashore in Buenos Aires, Argentina exploring the history, culture, and cuisine of Argentina's glamorous capital city. Upon arriving, Josh joins a culinary class, and learns why empanadas come in all different shapes and sizes. An empanada is typically a pastry filled with a variety of meats and vegetables. The slightly sweet empanada dough is known as masa, and the pattern of the dough's fold is called a repulgue. Next, he heads to the countryside and hops into the saddle, where he learns polo, Argentina's most celebrated sport. Although the English brought polo to Argentina, Argentinians have embraced the sport and begin learning how to play at a young age. Mastering balance is an important part of the sport, and it's imperative that a rider keep their balance during a game. In polo, there are three types of swings including the half swing, full swing, and backhand. A polo game consists of four to eight 7-minute periods called chukkas. For his final adventure, Josh steps out of his comfort zone and embraces the country's most iconic dance – the tango! Now hugely popular in Buenos Aires, early tango was known as tango criollo which means "Creole tango." While there are a few basic steps, improvisation is a signature feature of this dance.

[Educational Message: Stepping out of your comfort zone can be an important growing moment for just about everyone. When you step out of your comfort zone, you learn something new and ultimately gain confidence to face new experiences.]

Airdate: 10 June 2023

EARTH ODYSSEY WITH DYLAN DREYER
SUPERSTARS OF THE SAVANNAH [EDD516]

Today on Earth Odyssey, host Dylan Dreyer takes us on a safari to discover more about the iconic animals of Africa. First up, we'll learn more about the uncontested champion of Africa's large carnivores, the lion. Packing almost 500 pounds of muscle and measuring four feet from shoulders to rump, lions can overcome much larger animals such as buffalo and even giraffe. We'll discover they have even hunted adult elephants, which weigh 20 times heavier than lions. Next, we'll learn more about one of the tiniest champions of pure strength, the dung beetle. For its size, the dung beetle is the strongest insect on the planet, capable of shifting a mass 1,141 times its own weight. Dung beetles also use their immense strength to challenge other males when competing for the affection of females. We'll find out that whatever obstacle it may encounter, the dung beetle always makes a straight line towards its objective, taking the shortest path. We'll also learn that dung beetles thrive on every continent on Earth except for Antarctica.

[Educational Message: In this episode, we discovered more about the amazing animals that call Africa home. The African Savannah is teeming with celebrity creatures so iconic and loved, they've dazzled humans since the dawn of history. From the largest carnivores to the strongest insects, Africa's incredible wildlife needs to be protected for generations to come.]

WILD CHILD
WALKING AMONG US [WLC316]

Today on Wild Child, host Sheinelle Jones takes us back to the places where wild and urban collide to meet the adorable animals that have mastered both. First up, we'll visit the gardens of the urban jungle to learn about the lifecycle of a fascinating insect, the praying mantis. Females will carefully lay between 100

to 400 eggs on a sturdy leaf or branch. When conditions are warm enough, the egg cases crack, and babies begin to hatch. As they develop, praying mantis babies go through up to six molting stages before they reach maturity. Next, we'll hit the links and learn more about the animals that make their homes on urban golf courses and country clubs. We'll start the day with a mother hedgehog and her baby on a morning stroll in the rough. We'll learn that hedgehogs are named after their favorite foraging sites, hedges. Hedgehogs were originally called "urchins," which led to the naming of sea urchins. We'll also find a Eurasian coot with her hatchlings as they're foraging for breakfast. In just eight weeks, coot chicks will become independent and must fend for themselves. During their breeding and hatching season, Eurasian coots become overly aggressive and territorial to defend their young.

[Educational Message: In this episode, we took a safari into the cities to reveal the wild animals living in urban environments. Each one of these amazing creatures has learned how to thrive in our human made environments while passing along their urban knowledge to the next generation.]

**HARLEM GLOBETROTTERS: PLAY IT FORWARD
RUNNING TO GRANDMA'S PLACE [HGL116]**

Today on Harlem Globetrotters: Play it Forward, host Craig Robinson takes us to check out a gelato company where we'll learn some tips on successful entrepreneurship. Then, we'll follow Jet, Hotshot, and Cheese as they visit with local children and encourage literacy in Harlem, New York. First up, Hammer and Torch explore their entrepreneurial curiosities when they visit an Atlanta gelato company. Here we'll learn more about the process of developing a business plan and starting your own company. We'll also learn about the "Give Back" model of business that allows customers to make a positive impact on their community simply by purchasing local goods. Next, we'll travel to Harlem, New York where we'll learn about two community members who've committed their passion of reading to teaching children. We'll visit a literacy center called "Grandma's Place" and find out about the reading programs that are helping to educate local Harlem children. We'll join Jet, Hotshot, and Cheese as they participate in story time with a classroom of children and learn more about the history of their neighborhood.

[Educational Message: In this episode, Hammer and Torch learned some of the ins and outs of becoming an entrepreneur. We learned that small businesses can not only be profitable but can have a positive impact on the community as well. We'll learn that in entrepreneurship it's important to have big goals, but always start small and surround yourself with the right people.]

Duration (hh:mm:ss): 00:30:00

**ONE TEAM: THE POWER OF SPORTS
RING THE BELL [TPS316]**

First, we learn how Allyson Felix balances life as a mother and as an Olympian, and she explains how she found a new purpose to succeed after becoming a mother. The 100-meter sprint is the shortest race in the Olympics, and Allyson Felix is already the most decorated female athlete in U.S. track and field Olympic history. Next, when Zac Bell's dream of making it to the NHL was cut short by injury, he found ways to inspire with some amazing stick tricks. Zac took to hockey from a young age and signed a contract with the NCDC in Maine to pursue a future in the NCAA. Unfortunately, multiple head injuries resulted in a need to reinvent the path forward. Instead, Zac found a way to fill the void by creating content videos to inspire people to get involved in the sport. With hundreds of thousands of followers all over social media, Zac is bringing the love of hockey to new fans every day.

[Educational Message: Purpose can hold a powerful meaning and is something unique to everyone. Viewers learn the importance of finding that purpose, and how life-altering experiences can often bring about a journey of self-discovery.]

EARTH ODYSSEY WITH DYLAN DREYER

GENUS GENIUS [EDD111]

Today on Earth Odyssey, host Dylan Dreyer will take us on a journey around the world. We'll first travel to the watery kingdom of Cambodia. Cambodia is home to an incredibly diverse group of wildlife, including over 120 species of mammal. We'll visit the ancient Kingdom of Angkor, a city once inhabited by more than a million human residents over 800 years ago. Today, these ruins are now inhabited by troops of macaques that have made this ancient city their home. Here we'll learn about some of the amazing habits and behaviors of these wild macaques. We'll discover that in addition to cleaning their food before eating, some macaques have been observed seasoning their food with salt water. Next, we'll travel to the Galapagos Islands. A volcanic hotspot off the coast of South America, the Galapagos Islands are a living museum and showcase of evolution. Here we'll meet the only lizard in the world that's learned to fish for its dinner, the marine iguana. To brave the ocean currents, these cold-blooded reptiles spend time warming their bodies on sun-kissed rocks before taking the plunge. Each fishing trip for these creatures is a race against time. We'll discover how marine iguanas evolved over time to make the most of their underwater meal. Finally, we'll travel to the Caribbean Islands, a string of more than 7,000 islands between North America and South America. Here we'll learn about the hummingbirds that are found throughout this region. We'll discover that their hearts work like an engine, beating up to five hundred times per minute. To keep their energy up, they need to feed constantly. Always on the move, we'll learn that hummingbirds will consume almost three times their body weight every day.

[Educational Message: It's amazing to see how plants and animals have learned how to adapt no matter how challenging the environment. In this episode, we witnessed how life finds a way in many diverse and harsh regions of the Earth. We should all find ways to adapt and thrive in our surroundings.]

Airdate: 10 June 2023

THE VOYAGER WITH JOSH GARCIA

KUNG FU MASTER [VJG115]

Host Josh Garcia visits the port of Hong Kong where a local foodie takes him on an unforgettable tour of the city's nearly extinct foods, and Josh bravely tries some interesting dishes. Josh receives a lucky fortune at an ancient temple, and then gets a Kung Fu lesson from a master. First, Josh visits some of the oldest temples in Hong Kong and meets a cultural expert to learn the history and practices associated with Buddhism and Taoism. Then, Josh heads into town to learn how a craftsman is incorporating local materials into daily life, and he connects with a local foodie to try some unique dishes. Finally, he meets a living legend who trained under the same master as Bruce Lee and tries his hand at Kung Fu. The art of Kung Fu is said to be thousands of years old and dates back to the legend of Wing Chung, a nun who created the art to conquer an evil opponent.

[Educational Message: Visiting ancient landmarks can give you a glimpse into ancient practices and schools of thought. Ancient culture transforms in modernity through monuments, sculptures, and rituals.]

Airdate: 17 June 2023

Time:

Duration (hh:mm:ss): 00:30:00

EARTH ODYSSEY WITH DYLAN DREYER
LOST ALONG THE LOIRE [EDD517]

Today on Earth Odyssey, host Dylan Dreyer takes us along the river's edge to find the wonderful and unique wildlife of the Loire. First up, we'll learn more about a unique bird that calls this region home, the kingfisher. Here we'll witness how a male kingfisher attracts a potential mate by building a nesting burrow. We'll discover that kingfishers catch their prey blind, closing their eyes as they dive into the water. We'll also find out that the kingfisher's beak is so aerodynamic, the Japanese bullet train is modeled to mimic it. Next, we'll travel down the Loire to an estuary where we'll learn about another impressive avian family, storks. Since the first storks were spotted here around 30 years ago, their numbers have kept on growing. This spring, there are more than 100 mating pairs nesting around the active estuary. We'll find out that stork nests are reused for generations, increasing each year in both size and weight. The fields by the Loire offer storks and their hatchlings a varied menu of small crustaceans, insects, and frogs. We'll learn that stork hatchlings become independent and leave the nest at around eight to ten weeks old.

[Educational Message: In this episode, we discovered that the Loire River is ancient, beautiful, and critical to both French society and Europe's wildlife. It may not be as well-known as the Eiffel Tower, but this 600-mile stretch of water is a big part of what makes France so magnificent.]

Airdate: 17 June 2023

Duration (hh:mm:ss): 00:30:00

WILD CHILD
CONTINENTAL CHARACTERS [WLC317]

Today on Wild Child, host Sheinelle Jones takes us east of the Atlantic Ocean for a European baby animal safari. First up, we'll learn more about a familiar animal with a wild side, the feral pig. We'll discover that wild pigs are able to detect some odors up to seven miles away and up to ten inches underground. Also, while these super-sniffers may not have the best eyesight, their sensitive noses are excellent at leading the way to tasty morsels. Next, we'll venture deeper into the woods to get a closer look at the national animal of Finland, the Eurasian brown bear. Native to Europe, Asia, and North America, the brown bear has the largest geographical distribution of any bear species. Bears are omnivores, meaning they can enjoy both plants and meat in their diet. We'll find out that Eurasian brown bears can weigh up to 780 pounds. Brown bear cubs have about two years to enjoy their mother's care and learn the ways of the wild before they venture out on their own.

[Educational Message: In this episode, we took an adventure back to Europe to discover the young animals that call this diverse and incredible landscape home. We learned that it takes resilience and flexibility to survive in such a diverse environment with numerous changes throughout the seasons.]

Airdate: 17 June 2023

Time:

Duration (hh:mm:ss): 00:30:00

HARLEM GLOBETROTTERS: PLAY IT FORWARD
NEW TEAMMATES [HGL117]

Today on Harlem Globetrotters: Play it Forward, host Craig Robinson takes us to Chicago to learn about the humble beginnings and history of the Harlem Globetrotters. Then, we'll take a trip around the world to learn more about the incredible places the Globetrotters have visited. First up, we'll visit the Wendell Phillips Academy High School, the oldest Black high school in Chicago. We'll learn that in 1926, some of the school's former students started a basketball team that would soon become known as the Harlem Globetrotters. We'll learn that the Chicago-based team incorporated the Harlem name as a clever

marketing strategy. We'll also discover that the Globetrotters basketball team was created before the formation of the National Basketball Association. Next, we'll learn interesting facts about some of the incredible places that the Globetrotters have visited over years. On Jet's trip to California, we learned the Golden Gate Bridge's distinctive color provides enhanced visibility for passing ships in the often-foggy conditions of the San Francisco Bay. On Hotshot's visit to Italy, we discovered that the Colosseum in Rome is the largest amphitheater ever built. On Torch's travels to France, we learned that Eiffel Tower was the centerpiece of the 1889 World's Fair.

[Educational Message: In this episode, we discovered more about the history of the Globetrotters and some of the interesting facts the players have learned in their travels around the world. We'll hear firsthand how traveling and being open to new experiences and cultures can have a profound impact on our understanding of the world.]

ONE TEAM: THE POWER OF SPORTS

LONG ODDS [TPS317]

First, the emotional story of a boy and a horse and the relationship that makes them both winners. Cody Dorman was born with Wolf-Hirschhorn syndrome, and he spent a lifetime overcoming long odds. Every fall over the past 15 years Keeneland Racecourse has hosted Make-A-Wish Day. Cody got his wish with a visit to Gainsborough farm to meet a racehorse. They formed a connection, so the horse got the name Cody's Wish. That bond was front and center for the world to see at the 2022 Breeder's Cup, when, with Cody in attendance, Cody's Wish ran a miraculous race to victory. Next, see how the U.S. Army's world-class athlete program helps brave men and women reach their athletic goals. For some athletes, representing their country is a daily responsibility and honor. In the shadow of Pike's Peak just south of Colorado Springs is Fort Carson, a U.S. Army post and home of the army's world-class athlete program. Soldiers for the U.S. Army compete with the best Olympians and Paralympians in the world. The Army's world-class athlete program has sent over 40 soldiers to compete in the last 4 Olympics, with several soldiers ready to qualify for the 2024 Paris games.

[Educational Message: Discipline and training are not the only assets of a champion. Viewers learn the effect of hope, and how it can inspire one to push forward, through even the biggest struggles.]

Duration (hh:mm:ss): 00:30:00

EARTH ODYSSEY WITH DYLAN DREYER

GANGES [EDD112]

Today on Earth Odyssey, host Dylan Dreyer takes us down the Ganges River in India. The Ganges River flows more than 1,500 miles across the northern region of India before making its way to the ocean. We'll first travel to the source of the Ganges River, the Himalayan Mountains. Here we'll learn that the Himalayan Mountain Range is the tallest and one the youngest ranges on Earth. High in the Himalayas, few animals can weather the extreme temperatures. Here we'll meet the snow leopard, an animal well adapted for the year-round freezing wilderness. With powerful legs adjusted to the steep mountains, snow leopards can jump distances up to 50 feet. As the Ganges River makes its way down the foothills of the Himalayas, the weather warms up significantly. India's floodplains are home to one of the largest animals in the world, the Indian rhino. Here we'll learn that despite their bulky appearance, Indian rhinos are remarkably nimble and can run up to 30 miles per hour. Further down the river there's another animal that's a rare sight to see, the Gangetic river dolphin. Due to extreme low-visibility in the Ganges River, these dolphins are almost completely blind. Gangetic river dolphins rely on echolocation to locate other objects in the water, including food. Next, we'll meet a prehistoric creature over 60 million years in the making, the

gharial. One of the largest crocodile species in the world, a male gharial can grow up to 20 feet long. Reaching full maturity at 10 years old, gharials can live between 40 and 60 years in the wild. Next, we'll travel to the Sundarbans, the largest expanse of mangrove swamps and forests in the world. Here we'll meet the Bengal tiger, the national animal of India. Both revered and feared, the Bengal tiger's roar is so loud it can be heard as far as two miles away. We'll discover that these great cats are among the heaviest felines on Earth and can weigh nearly 500 pounds.

[Educational Message: In this episode, we've seen how this unique waterway of the Ganges River has supported life for millions of people and animals who live in its path. This is just another amazing example of how nature truly takes care of its own.]

Airdate: 17 June 2023

Time:

Duration (hh:mm:ss): 00:30:00

THE VOYAGER WITH JOSH GARCIA

MEDIEVAL TREASURE [VJG303]

Host Josh Garcia sails to Tallinn, Estonia, one of Europe's best preserved medieval cities. First, Josh steps back in time to learn the ancient craft of blacksmithing. In medieval times, every town had a blacksmith, and today a blacksmith is still a necessity to restore ancient ironwork in Tallinn. Josh learns that shaping, or forging, hot metal with a hammer is hard work. He apprentices for a blacksmith, often called a blacksmith striker, and learns to forge a horseshoe. The metal is heated to 2,000 degrees Celsius before it is shaped. Then, he visits the historic castle Rakvere where he trains in full armor as a castle guard. The Danes and The Livonian Order occupied this castle during the 1200s. The Livonian Order, also called the Knights of the Sword, ruled for over 200 years. Inside the castle walls, a group of reenactors dressed as foot soldiers practice moves with pikes, weapons used to defend against infantry and soldiers on horseback. Pikes vary in size from ten to twenty feet. Josh learns about medieval pike defenses, including the hedgehog defense requiring more than a few foot soldiers. Finally, he learns about traditional Estonian cuisine and gets a lesson in how to serve a feast to lords and ladies. During the medieval era when famine was common in Europe, having extra weight symbolized wealth and power. This style of feast includes different courses, some intended to expand the stomach and some intended to facilitate digestion.

[Educational Message: Historic crafts and trades live on through historic preservation. For example, when you maintain historic structures and landmarks, the historic practices may live on as well.]

Airdate: 24 Jun 2023

Time:

Duration (hh:mm:ss): 00:30:00

EARTH ODYSSEY WITH DYLAN DREYER

SHELL-BOUND [EDD519]

Host Dylan Dreyer takes us on a deep dive to find the planet's most curious crustaceans. First, we'll learn about a colorful crustacean with fascinating abilities: the mantis shrimp. We'll discover that mantis shrimp have the best eyesight in the marine world, and perhaps the entire animal kingdom. The mantis shrimp's eyes pivot independently which allow it to see in every direction. Both eyes are also divided into three sections, each with its own pupil, which see the size, shape, distance, and depth of objects. We'll discover that this means mantis shrimp essentially possess 3D vision, one of the most impressive adaptations in the wild. Next, we'll learn about another incredible crustacean with a unique adaptation: the porcelain crab. Although they sport huge claws, the porcelain crab has other more sophisticated appendages that help them survive. Like fishing nets, the porcelain crab can unfurl specialized, feathery mouth parts. We'll discover that this ingenious system enables these crabs to filter the microscopic plankton they feed on. We'll also find out that to flee from predators, porcelain crabs can detach a limb from their body if attacked.

[Educational Message: When it comes to survival in nature, it's all about doing whatever it takes, and crustaceans are a prime example. Whether relying on another in a symbiotic relationship or developing physical attributes that help protect, hunt, or blend in. Life for these shell-bound survivors is about getting a competitive advantage and finding their own tailored method of thriving in the wild.]

WILD CHILD

PRIMATE PALS [WLC322]

Host Sheinelle Jones takes us around the world to find the most amazing apes and magnificent monkeys that call Earth home. First, we'll journey to the thick jungles of Southeast Asia to learn about a vibrant primate resident, the orangutan. Orangutans are the world's largest arboreal mammal, spending most of their lifetime in the treetops. We'll learn that orangutans are unique from other primates because they are mostly solitary in the wild. Orangutans are extremely intelligent, known for using tools and even learning to communicate with sign language. Next, we'll stay in the jungle to discover more about another playful primate, the Assam macaque. Like most other primates, Assam macaques are social animals and will live together in groups of ten to fifteen individuals. Here we'll witness the grooming and eating habits of a troop of macaques. Apart from fruit, we'll learn that macaques will eat flowers and leaves. Macaques are "matrilineal," meaning that social hierarchy is based on female-determined family lines. We'll also discover that macaques have one of the most expressive faces in the animal kingdom and are able to communicate using only looks.

[Educational Message: In this episode, we took an adventure around the globe to find the world's most remarkable primates. There is something undeniably special about these animals that have so many similarities to humans. Being equipped with a problem-solving mind, primates are all about working smarter and not harder.]

HARLEM GLOBETROTTERS: PLAY IT FORWARD

COMMUNITY COMPASSION [HGL122]

Host Craig Robinson takes us to Florida where Torch and Cheese learn about the importance of mentorship for teens in the tech industry. Then, Bulldog, Jet, and Hotshot learn about the value of financial literacy while discovering the game of golf. First up, we'll visit a makerspace in Florida that's creating tech opportunities for the local youth. We'll find out that makerspaces provide a safe place to experiment and acquire new skills through hands-on instruction. With over 585,000 tech companies in U.S. that employ over 12.2 million people, we'll learn that makerspaces like these are vital for helping teens discover their passions and plan their future careers. Next, we'll travel to the Country Club at Woodmore in Washington, D.C. where the Globetrotters will learn more about financial literacy from a local entrepreneur and neobank owner. We'll learn that typically, neobanks don't have physical locations and offer services through apps and mobile devices. We'll find out that having a better understanding of finance and budgeting will benefit you when applying for loans and planning for your future.

[Educational Message: In this episode, we joined the Globetrotters as they hit the golf links and met with a local entrepreneur to find out more about financial literacy. We learned there is increased earning power for college graduates versus high school graduates. Also, we found out why it's important to better understand finance to avoid taking on too much student loan debt.]

**ONE TEAM: THE POWER OF SPORTS
POWERFUL PARTNERS [TPS322]**

First, after a car accident left him paralyzed, former Yukon Husky basketball player Steve Emt spent twenty years coaching kids in his hometown of Hebron, Connecticut. One day, he found the sport of curling that reignited his athletic spirit. To date, Steve has been an eight-time national champion, competed in two Paralympic games and five world championships. Off the ice, Steve has become an author and travels to schools all over the country, motivating young people to conquer obstacles and achieve their goals. Next, golf pioneers Linda Vollstedt and Dale McNamara share how Title IX made a change for the better in women's golf. When Title IX was made law in 1972, it caused a massive increase of women playing college sports, including golf. Around that time, Linda Vollstedt earned an academic scholarship to Arizona State University where she joined the golf team and hoped to make it her career. During her 21-year coaching tenure, Vollstedt transformed Arizona State's women's golf program into a dynasty and captured six national championships, while in Oklahoma, the University of Tulsa's Dale McNamara did the same. McNamara remained at Tulsa for twenty-six years, collecting eighty-one career victories. More than five decades later, the impact of Title IX is felt by thousands.

[Educational Message: Adversity can be one of life's greatest teachers. Viewers learn how turning an obstacle into an advantage can yield even bigger results.]

**EARTH ODYSSEY WITH DYLAN DREYER
JAPAN [EDD113]**

Today on Earth Odyssey, host Dylan Dreyer takes us to Japan's volcanic islands. Situated in the Northwest Pacific Ocean, Japan consists of about 7,000 islands with weather ranging from one extreme to the next. Known as one of the most unstable places on Earth, Japan's islands are a volcanic hotspot with more than 1,000 earthquakes shaking the region each year. These islands are now home to many species of wildlife found nowhere else in the world. First, we'll travel to the island of Honshu where we'll meet the Japanese macaque. This snow monkey is the only primate besides humans that can survive in the high elevations of this subarctic region. Here we'll witness how these snow monkeys utilize natural hot springs, called onsens, to keep warm in the bitterly cold environment. Next, we'll meet the red-crowned crane, the largest bird in Japan. Here we'll learn how the graceful and elegant mating rituals of red-crowned cranes have earned them the nickname "snow ballerinas." Next, we'll meet a highly unusual animal, the Japanese serow. Also, known as a "wolf deer," the serow is said to have the legs of a goat, the body of a deer, and the fur of a wolf. We'll discover that these rare creatures only live on three of the 7,000 Japanese Islands. Finally, we'll learn more about the custom of usho fishing, an ancient tradition that's been practiced for more than a thousand years. However, we'll discover that these fishermen don't need fishing rods to catch their fish. Using trained sea cormorants, these fishermen let the birds do the fishing for them. Here we'll follow a group of fishermen and witness how the incredible hunting skills of sea cormorant birds have been utilized by locals for centuries.

[Educational Message: Today, we've seen firsthand how Japan's ancient customs have ensured its inhabitants' survival, even in the harshest of environments. It's amazing how the knowledge has been passed down through tribes and within the animal kingdom, all working together with nature to help the next generation.]

THE VOYAGER WITH JOSH GARCIA

HOT SALSA! [VJG104]

Host Josh Garcia heads to San Juan, Puerto Rico, returning to his family's roots. Josh visits a vejigante mask maker, stops into the kitchen of Chef José Santaella for Mofongo 101, and dances the salsa with 300 people! First, Josh checks out a local artist who makes traditional masks out of coconut shells. In the 16th century, Vejigante masks were first used in festivals honoring St. James, and remain an important part of Puerto Rican culture. Josh learns how the masks are made and finds it's not as easy as it looks. Next, Josh meets with a local chef to learn how to make the traditional Puerto Rican dish, Mofongo, reminding him of his own grandmother's cooking. Finally, Josh takes a salsa lesson, and joins others in the traditional dance, which combines many different Spanish and Afro-Caribbean styles.

[Educational Message: When you revisit somewhere you've already been, or try something you've already done, allowing yourself to have a new perspective can make it feel as though you are experiencing something entirely new.]

NBC NETWORK NON-BROADCAST EFFORTS

April - June, 2023

NBCUniversal's *The More You Know* website:

Since 1989, *The More You Know* has brought the nation's most important social issues to the forefront, and remains a trusted voice for sharing knowledge to improve lives and inspire action.

The More You Know's comprehensive website (themoreyouknow.com) includes in-depth resource and referral information on the campaign's important focus issues including:

- HEALTH – fighting childhood obesity, encouraging nutrition and physical fitness
- ENVIRONMENT – encouraging everyday actions that reduce environmental impact
- EDUCATION – recruiting new teachers and promoting their long-lasting impact
- DIGITAL LITERACY & INTERNET SAFETY - sharing online safety tips and information
- DIVERSITY – embracing differences and promoting inclusion, tolerance and respect
- COMMUNITY – contributing to the common good and create a positive impact on those around you
- CIVIC ENGAGEMENT - volunteering, voting or advocating are key to stronger communities, safer neighborhoods and happier citizens

Also featured on site is The More You Know Learning series' *Growing Up Online*, a free eBook on digital literacy and Internet Safety. *Growing Up Online* is an important tool to initiate conversation with children about online safety. The eBook is a media-rich, two-part learning resource that provides easy-to-use information about navigating the digital world in a unique and engaging way. Part one includes safety tips, discussion questions and key takeaways for parents and teachers. Part two features four entertaining video comic books for children, focused on real situations that come up when kids go online.

Additional content on the site includes public service announcements, behind-the-scenes videos, a general overview, a talent directory, and a list of the campaign's accolades such as the prestigious Emmy and Peabody awards.
