Slogans like "If you love me, you'd accept me for who I am" or "Christians hate LGBTQ people." that leave Christians silent or shamed today are, at root, different ways of saying the same thing-that truth and love are incompatible. For people to tell the truth, especially when it comes to issues of sexuality and gender, is to be unloving and intolerant. And to love someone is to affirm all their choices. Maundy Thursday directly confronts this mentality.

Among examples are the Native American "2-spirit," Ancient Middle East's "Sal-zikrum," the "Fa'afafine" of Samoa, the "Hijra" of India & the "Muxe" of Southern Mexico. However, a quick look at so-called "3rd" gender people reveals that they are not based on the same presuppositions as modern transgender ideology

A year ago, after 49 years of Roe v. Wade straitjacketing legislatures and courts into a draconian pro-abortion regime, the U.S. Supreme Court overturned the infamous 1973 ruling. In Dobbs v. According to Ryan Burge, the group of people in American society most likely to be highly engaged in political action are not evangelicals, as we've been led to believe. They are in fact atheists. "Let me put it plainly," Burge wrote, "atheists are the most politically active group in American politics today, and the Democrats (and some Republicans) ignore them at their own peril."

What does music mean? Most people today, without realizing it or giving much of a second thought, think of music and art along the lines of 18th-century philosopher David Hume>Beauty, in other words, is in the eye of the beholder, and nothing more.

Under this new law, people convicted of attempting to engage in homosexual behavior could face 10 years behind bars. Reaction in the West was quick and fierce.

Few subjects seem less political than math. There is little room for subjective judgment because its truths are universal. No matter what you look like or where you're from or how you feel about it, two plus two will always equal four, and the area of a circle will always be πr^2 . A growing chorus of progressive voices insists that racism and sexism are the biggest problems we face in how to teach math.
