

### **EEO Public File Annual Report Posting Notice**

The EEO Public File Reports for licensee's West Virginia and Ohio Stations, WRVC, WMGA and WXBW, are posted annually on their respective online public inspection files by April 1. The April 1 posting deadline date was adopted by the licensee for WRVC, WMGA and WXBW, rather than the stations' West Virginia and Ohio June 1 license renewal anniversary date, because of the Commission's policy permitting employment units with stations licensed to states in different renewal groups to select the license renewal deadline of any station in the unit for the entire unit's EEO Public File Report. In this case, the WRVC, WMGA and WXBW licensee selected April 1 for all of its stations' annual EEO Report posting date, since the licensee's employment unit also includes its Stations WCMI(AM), WCMI-FM and WDGG licensed to communities in Kentucky, which have an April 1 license renewal application anniversary deadline.
