Barry Robinson- Founder of C.S.I.- both are co-owners of these companies and Servispros in the Fredericksburg area.

Subject or Topics Discussed: How bugs affect the environment and ultimately the property value of your home. The perception that kids have of bugs versus how their parents feel and react. The reasons for learning about them are different, but both groups are doing so at "The Bug Box" and those efforts are helping support programs in local schools. Cracks around windows or doors, a lack of insulation, mold and radon can make it cost more to keep homes cool or warm and affect people's pocketbooks. The issues can also cause health problems and, in the end, be far more costly than testing for and addressing the issues early.

What are the most important needs and problems facing your community? What are the major needs and problems facing your community as they concern your group or organization?

Many people that have been in jail before know that they can get a place to sleep and food. They start to feel safe and after they are released, they commit a crime to come back to what they know, "inside." Education of these former inmates is important. It is also needed for employers and others in the community to not treat them differently and "stereotype" them for a certain behavior for the rest of their life. Keeping someone in a local jail or state prison costs taxpayers money, reforming them instead adds to the local and state economic base.
