*Don't Idle MIM locally produced PSA 11:15 12/22/21 32 seconds*

Americans waste 3.8 million gallons of gas by idling every single day. Idling for more than ten seconds actually uses more fuel and produces more emissions than stopping and restarting your engine. Vehicle exhaust contributes to smog, climate change, and poor air quality heightening the risk of developing asthma and lung disease. Kids and seniors are especially vulnerable to these health risks. So next time you're stopped for more than 10 seconds, at the train, getting coffee, or picking your child up from school, please turn your vehicle off. Brought to you by Missoula In Motion

"Montanans are awesome in my book, my experience here has been very positive to this point I don't think there has been a day where I've been in uniform where somebody hasn't just randomly walked up to me and thanked me for my service. Even if it's on a crash scene where somebody was completely in the wrong, you know I've actually been thanked for doing my job and being able to talk to the person in a professional manner.
