----------	---	--------------	----------	----------

Good intentions can interfere with positive results. Until recently, for example, federal and state funding available to help disadvantaged youth successfully navigate graduating high school and transitioning to higher education or employment was structured in ways that precluded many students in need from taking advantage of available benefits. The new federal Performance Partnership Pilots, or P3, targeting youth at risk of dropping out of school, provides waivers from some of the federal rules in a way that we hope will make a huge difference in the lives of many youth.

 Success for Youth Through Boss BECON 00:27:26
 Good intentions can interfere with positive results. Until recently, for example, federal and state funding available to help disadvantaged youth successfully navigate graduating high school and transitioning to higher education or employment was structured in ways that precluded many students in need from taking advantage of available benefits. The new federal Performance Partnership Pilots, or P3, targeting youth at risk of dropping out of school, provides waivers from some of the federal rules in a way that we hope will make a huge difference in the lives of many youth.

 The Supported Training and Employment Programs also known as STEP offers year-round development and employment opportunities for youth ages 16-22 with physical, developmental or behavioral disabilities. The late Dr. Herm Fischbein, then a member of staff at CSC, led the creation of the original summer only version of the program known as STEPS in 2006. Since then, the CSC has funded a number of agencies to help deliver STEP services, and over the years we have added additional components, such as a yearly Transition to Adult Life Summit and, in partnership with Service Source, Youth Work Incentive Counseling, also known as Y WIC. Guests: Cathea Comiskey, Amilcar Urro, Elijah Friesen and Clara Alevy.
