

# Community Issues Report – WPNW

*January 2018 – March 2018*

**Issue:** Patient care in homes

**Station Response:**

We interviewed a Holland Hospital representative about their new Tell Health Program which uses state of the art technology in patient homes now to better patient care. Making things that were previously only available in the hospital itself, also available in homes.

**Issue:** School Legislations

**Station Response:**

We had the chance to the Director of Curriculum and Technology from Zeeland Public Schools about the 3<sup>rd</sup> grade reading legislation, opening discussion and educating the community on that.

**Issue:** Environmental Care

**Station Response:**

The Outdoor Discovery Center came in to talk about their Ecosystems Exploration Day which was March 8<sup>th</sup>. Students, teachers and other community members had a chance to encounter opportunities to learn with naturalists, listen to experts, witness students learning, go outside, get hands on with nature, and create works of art. It was a chance to learn more about a nature-based learning environment.
