

Community Issues Report – WPNW

October 2015 – December 2015

Issue: House Fires

Station Response:

Fire Prevention Week was October 4 – 10, 2015 and we took that opportunity to educate the community on Smart911 and different steps that can be taken to prevent house fires and prepare people in the event of a house fire.

Issue: Diabetes

Station Response:

November is national diabetes month, in honor of that we talked with Julie Huisman on the show. Julie is from Holland Hospital and we had the chance to ask her questions that people frequently have in relation to diabetes. Things like: what are recent statistics on diabetes? What is happening in the way of preventing diabetes? What does Holland Hospital offer people with diabetes?
