

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D.C. 20554

REVISED PRE-SUNRISE AUTHORIZATION (PSRA)
FEBRUARY 9, 1988

(Post this letter with your current authorization)

As a result of Public Law 99-359, which was enacted July 8, 1986, daylight savings time begins each year on the first, instead of the last, Sunday in April. This change has necessitated adjustments to the Pre-Sunrise operation (PSRA) permissible under Section 73.99 of the FCC Rules and Regulations.

Based on interim rules adopted by the Commission, a temporary authorization was issued for use in April of 1987.

Set forth below is your new authorization which takes into account the final rules adopted by the Commission. It is intended for use in April of 1988 and in April of subsequent years, unless modified.

The parameters listed below may be employed beginning the first Sunday in April and may be used through the end of April.

The parameters listed below are maximum values that may not be exceeded. However, operation with parameters less than those listed is permissible.

NOTE: For PSRA operation during the balance of the year, including the period from April 1 to the first Sunday in April, the station's existing authorization shall be employed.

CALL: KKOJ CITY: JACKSON STATE: MN CALCULATIONS BASED ON
ANTENNA: DAYTIME FREQUENCY: 1190 kHz LICENSE

PERIOD CONVERSION POWER
FROM 6:00 AM FACTOR IN WATTS
TO SUNRISE 0.2040 208

SUBJECT: Removal of PSRA authorization

STATUS OF PREVIOUS PRE-SUNRISE AUTHORITY

For the period of time affected, this notice and its parameters supersede any previous Pre-Sunrise authority. If these parameters are lower than those previously authorized, the power must be reduced within 30 days of receipt of this letter or PSRA must be terminated. PSRA operation may be resumed on completion of the reduction.

CALCULATION OF ANTENNA INPUT POWER

The nominal power listed is not necessarily the same as the Antenna Input Power. To determine the Antenna Input Power permitted during PSRA, multiply the INPUT POWER listed on the station authorization by the SQUARE of the ANTENNA CURRENT CONVERSION FACTOR. The Antenna Current or Common Point Current permitted during PSRA is obtained by multiplying the ANTENNA CURRENT CONVERSION FACTOR by the AUTHORIZED ANTENNA CURRENT or COMMON POINT CURRENT.

NATURE OF AUTHORITY GRANTED

PSRA is secondary to the basic instrument of authorization with which it is to be associated. The PSRA may be suspended, modified, or withdrawn by the FCC without prior notice or right to hearing, if necessary to resolve interference conflicts, to implement agreements with foreign governments, or in other circumstances warranting such action. Moreover, the PSRA does not extend beyond the term of the basic authorization.

NOTIFICATION PROCEDURE

Before beginning operation pursuant to this authorization, the following information is to be submitted:

1. Licensee name, station call sign and location
2. Indication that such PSRA operation is intended by the station
3. A description of the method whereby any necessary power reduction will be achieved.

Send to: Chief, AM Branch, Audio Services Division, Mass Media Bureau,
----- Room 342, Federal Communications Commission, Washington, D.C. 20554

-- PLEASE NOTE: The FCC will not acknowledge this notification. --

FOR ADDITIONAL INFORMATION
