

CHILDREN'S TELEVISION PROGRAMMING COMMERCIAL CERTIFICATION

KING TV ("Station") certifies that all 12-and-under children's TV programs carried during this quarter on its primary and multicast streams were formatted so that, as a matter of standard policy and practice, the programs would not exceed the "commercial matter" time limits of 73.670(a) of the FCC's rules: Weekdays: 12 minutes in any clock-hour children's programming (6 minutes in a stand-alone half-hour program); Weekends: 10.5 minutes in any clock-hour children's programming (5.25 minutes in a stand-alone half-hour program). Programming promos, with certain exceptions, count as commercial matter.

Program Title

List all network and non-network 12-and-under children's programs carried on primary and multicast channels.

There were no 12-and-under children's programs carried on the KING 5.1 primary channel, KING 5.2 (Justice Network) or KING 5.3 (Quest) for the quarter ending September 30, 2018.

1. Network-provided commercial limit certifications are attached in Appendix A.
2. Station certifies that there were no time periods during the quarter in which the "commercial matter" time limits stated above were exceeded during 12-and-under children's programming.

X _____
Yes No

If no, provide details of each such instance in Appendix B.

3. Station certifies that, during the quarter, it has complied with the commercial requirements of Sections 73.670(b), (c) and (d) of the FCC's rules regarding the display of Internet website addresses during 12-and-under children's programming.

X _____
Yes No

If no, provide details in Appendix C.

I hereby state, under penalty of perjury, that the foregoing is true, correct and complete to the best of my knowledge, information and belief.

October 3, 2018
Date

Michael Loranger, KING and KONG Programming Manager

3rd QUARTER 2018
EDUCATIONAL OBJECTIVES and SHOW SUMMARIES
[AGE TARGET 13-16]
July 1, 2018 – September 30, 2018

In the 3rd Quarter of 2018, NBC continued airing The More You Know Educational/Informational programming block, designed for older adolescent children, ages 13-16. Each of the six shows has a hosted format, featuring non-fiction, informative programming that extends NBC's iconic The More You Know brand to Saturday mornings. The audience views inspiring stories about the environment, social change, health and wellness, and community engagement.

THE VOYAGER WITH JOSH GARCIA

The Voyager with Josh Garcia is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. The Voyager with Josh Garcia takes viewers on an exciting and immersive journey around the globe with world traveler and host, Josh Garcia. Each episode gives audiences access to the world's most incredible destinations as Josh seeks out the truly authentic experiences one can only find when shown by a knowledgeable and passionate guide. In each episode, Josh learns how to prepare an authentic, regional meal, visits a local artisan to learn about their trade and craft, and samples the culture while learning about the heritage of the region's population, showing viewers what is so unique about each city he visits. The Voyager with Josh Garcia brings viewers on an enthralling adventure to explore the people and cultures that make our world so breathtaking.

WILDERNESS VET

Wilderness Vet is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Wilderness Vet follows veterinarian Dr. Michelle Oakley, and features compelling stories from one of the most rugged areas on the planet, the Yukon. Dr. Oakley travels to homes, farms, and wildlife preserves across the Yukon to help animals in need, while balancing life at her home clinic. Providing a glimpse into a fascinating career choice, Wilderness Vet will show viewers the hard work and dedication involved in the rescue and rehabilitation of animals, while imparting tips to help keep all furry friends healthy.

JOURNEY WITH DYLAN DREYER

Journey with Dylan Dreyer is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Journey with Dylan Dreyer is a wondrous celebration of nature. Hosted by meteorologist Dylan Dreyer, this series features breathtaking cinematography that will bring viewers up-close and personal with creatures big and small, from the black bears of Montana to polar bears in the Arctic. Audiences will have a unique platform to see animals living in their natural habitat, and will learn about the circle of life along the way. Journey with Dylan Dreyer also explores natural wonders of the world, including the migration of 1.5 million animals traveling over 500 miles across the Serengeti in Tanzania and Kenya. Viewers will uncover these amazing facts of nature, and learn why it's so important to protect Earth's natural resources and all its inhabitants.

NATURALLY, DANNY SEO

Naturally, Danny Seo is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Naturally, Danny Seo is a series about seeking a healthier lifestyle by learning the science behind eating well, exercising your mind and body, and caring for our planet. Host Danny Seo is a leading authority on eco-friendly living, and has devoted his career to the idea that caring for the environment can go hand-in-hand with enjoying time with family and friends, sharing delicious and healthy meals, while creating an environmentally friendly home. In each episode of Naturally, Danny Seo, viewers will be introduced to inspiring ideas from fun and healthy recipes, to easy and sustainable crafts. Viewers will learn how to embrace a natural lifestyle, easily and beautifully, along with quick tips on green living.

4th QUARTER 2018
EDUCATIONAL OBJECTIVES and SHOW SUMMARIES
[AGE TARGET 13-16]
October 1, 2018 – December 31, 2018

In the 4th Quarter of 2018, NBC plans to continue airing The More You Know Educational/Informational programming block, designed for older adolescent children, ages 13-16. Each of the six shows has a hosted or narrated format, featuring non-fiction, informative programming that extends NBC's iconic The More You Know brand to Saturday mornings. The audience views inspiring stories about the environment, social change, health and wellness, and community engagement. There will be two new series joining the lineup beginning October 1, 2018. *Vets Saving Pets* will replace *Wilderness Vet*, and *Consumer 101* will replace *Journey with Dylan Dreyer*.

THE VOYAGER WITH JOSH GARCIA

The Voyager with Josh Garcia is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. The Voyager with Josh Garcia takes viewers on an exciting and immersive journey around the globe with world traveler and host, Josh Garcia. Each episode gives audiences access to the world's most incredible destinations as Josh seeks out the truly authentic experiences one can only find when shown by a knowledgeable and passionate guide. The Voyager with Josh Garcia brings viewers on an enthralling adventure to explore the people and cultures that make our world so breathtaking.

VETS SAVING PETS

Vets Saving Pets is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Vets Saving Pets examines the interpersonal stories of veterinary professionals working to save the lives of animals in need of urgent medical care. Vets Saving Pets takes place at the Emergency Veterinary Trauma Center in Toronto, one of the busiest veterinary facilities in Canada. Each week, viewers will be exposed to new emergency cases that will teach audiences about a wide array of specialties within veterinary medicine such as critical care,

oncology, cardiology, neurology, anesthesiology, dermatology, dentistry, and surgery. Audiences will witness first-hand the dedication and determination of these veterinary specialists as they work tirelessly to save their animal patients.

CONSUMER 101

Consumer 101 is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Hosted by Jack Rico with the help of experts and scientists from the Consumer Reports labs and testing facilities, Consumer 101 will give viewers a behind-the-scenes look into the science used to test every kind of product— from the obscure, to the fascinating, to the everyday. Each week, audiences will discover more about the surprising intricacy of product testing, learn more efficient ways to get the most out of everyday items, as well as catch a glimpse into a unique career path in the fields of science and technology. Consumer 101 is an empowering series aimed at giving teens the tools they need to make smarter choices as consumers, exploring the how, where, when, and why we spend our resources so we can all make educated decisions when it counts.

NATURALLY, DANNY SEO

Naturally, Danny Seo is a live action, half-hour television program designed to meet the educational and informational needs of children aged 13-16. Naturally, Danny Seo is a series about seeking a healthier lifestyle by learning the science behind eating well, exercising your mind and body, and caring for our planet. THE VOYAGER WITH JOSH GARCIA

OLYMPIC-SIZED ADVENTURE [VJG215]

Host Josh Garcia sails to Athens, Greece to explore this ancient capital city. Athens is named after Athena, the Greek goddess of wisdom and courage. Dating back more than 3,000 years, Athens is one of the oldest cities in the world. Upon arriving, he learns how traditional prayer beads have been transformed into a popular part of Greek culture, known as worry beads. Called Komboloi, translating to mean knots in a line, these traditional prayer beads originated from knotted prayer ropes used in monasteries. Although now,

these are not exclusively religious, they are used to ease worry or stress. Then, he travels to the countryside and makes a signature Greek dish using vegetables from the land. Moussaka is an eggplant dish that originated in the Middle East, and is popular in Greek cuisine. Mezze are small dishes in Greek cuisine that are meant to be shared by a group, including dishes like tzatziki, hummus, and eggplant salad. Josh's final excursion is a once-in-a-lifetime event as he meets an Olympian who teaches him to throw the javelin like a world-class athlete. At the site of the 2004 Olympic Games, Josh learns the basics of some track and field events. The Olympic Games were held every four years, and in antiquity this period was used by Greeks as a unit of time measurement.

[Educational Message: Visiting an ancient city that has been historically maintained while updated in some ways for modernity, can be an incredible experience, and in some ways can feel like a trip back in time.]

WILDERNESS VET

DANGEROUS JOBS [WDV215]

As a wildlife vet, not every appointment happens in the safety of an office, and sometimes heading into the patient's world is the only option. For Dr. Oakley, who handles everything from feisty musk oxen to grumpy bears, every exam becomes a risky procedure. First, Dr. Oakley and her family are heading to a horse ranch to assist in locating a group of missing horses. Dr. Oakley and the team will have to use a combination of all-terrain vehicles and an airplane to try and spot the wayward horses. Once successfully captured, Dr. Oakley will need to perform a surgical procedure on one of the horses in order to treat a hernia. Next, Dr. Oakley is visiting the Yukon Wildlife Preserve to check on an ailing musk ox. Record setting high temperatures in the Yukon area are giving the musk ox heat stress. Heat stress, or hyperthermia, is a condition that will quickly become dangerous for an animal that's meant to live in sub-zero temperatures. Dr. Oakley will have to race against the clock to help treat the musk ox successfully. Finally, Dr. Oakley is visiting a black bear in need of an examination before it's moved to a new enclosure. Dr. Oakley and her team work together to safely sedate and extricate the bear for its health exam and eventual relocation.

[Educational Message: We must always strive to get out of our comfort zones. When we push ourselves to take risks, we can find new opportunities for success.]

JOURNEY WITH DYLAN DREYER

ADVENTURES IN ICELAND [JDD224]

Join host Dylan Dreyer on an adventure to the edge of the arctic circle to explore the wonders of Iceland. We'll learn about the first communities who left Europe behind to make this unforgiving land their home. We'll visit new landscapes bubbling, changing and growing before our very eyes, and discover the modern challenges that threaten this ancient island nation. First up, we'll learn how Iceland was first settled in the 9th century by Vikings from Norway. The area was soon after settled by Celtic monks and Scots, who arrived from old Europe in the 10th century to create a new way of life and a new form of government. Fast

forward a thousand years later, we'll learn how Iceland became the first country to elect a female head of state in 1980. Next, we'll discover how there are two elements that have always characterized Iceland's landscape, fire and ice. We'll learn that huge volcanic eruptions frequently occur underground, and how most of Iceland runs on renewable energy such as geothermal and hydroelectric power. From a geological perspective, Iceland, at just 10-15 million years of age, is one of the youngest regions on Earth. Next, we'll learn how Iceland is home to more than 800 hot springs and how these natural bath tubs are found all over the island. Next, we'll learn about some of the modern challenges facing Iceland. Despite generally having an ecological approach, Iceland is more wasteful than almost every other country on Earth. Per capita, only the U.S. consumes more electricity and owns more cars than Iceland. Finally, we'll learn that for decades, Iceland's economy has relied on fish export. In recent years, however, tourism has overtaken it as the most important export industry as Iceland receives over 1 million visitors every year.

[Educational Message: Even at 15 million years old, the island of Iceland is still changing and growing. As more people visit the nation and the economy continues to shift, the future looks bright. The people of Iceland will find a way to survive here for generations to come.]

NATURALLY, DANNY SEO

VEESTRO [NDS215]

Host Danny Seo visits a chef that started a plant-based meal service to help people with busy schedules eat healthier, and he learns how to make vegetable empanadas. Empanadas, which originated in a northwest region of Spain, can be baked or fried and are made by folding dough over a stuffing. Next, Danny creates a yogurt strawberry oat mask with bentonite clay. Strawberries are rich in vitamin C, oats help exfoliate, honey is an antioxidant that can reduce inflammation, and organic yogurt can help even skin tone. Bentonite clay, a detoxifier, is made from volcanic ash and contains iron, sodium, and calcium. Then, Danny makes kulfi pops using just three ingredients--sweetened condensed milk, evaporated milk, and regular milk. Kulfi is a frozen dairy-based dessert from India, and it's creamier and denser than ice cream. Then, Danny teaches a scientific way to repurpose nail polish by adding a few drops to hot water and dipping items on the surface to create colorful, marbled accessories. Nail polish contains a petroleum-based solvent, like oil, which is lighter than water; and it will adhere to non-porous surfaces like porcelain, glass and metal.

[Educational Message: Trying new recipes is a fun way to learn about different cultures. Items you have in your kitchen can also be used to benefit your skin. Old nail polish doesn't have to be thrown out-- it can be used to create art. The combination of two simple materials, like nail polish and hot water, can result in a beautiful reaction, allowing you to decorate accessories in a unique way.]

THE VOYAGER WITH JOSH GARCIA

UN-BELIZE-ABLE! [VJG216]

Host Josh Garcia is ashore in Belize, and he kicks off his day with a local chef who teaches him how to make a traditional Belizean stew using unique culinary tools native to the country. Using a hana, a traditional mortar and pestle, they make hudut, mashed plantains customarily served with Belizean coconut

stew, made with coconut, herbs, and fish. Next, he ventures into the jungle and discovers Mayan ruins that date back more than 3,000 years. The High Temple at Lamanai reaches a height of 108 feet from the plaza floor. The Maya built their temples to house their deities and bury their kings. The name Lamanai was recorded by the Spanish in the 16th century. The structure goes back as far as 100 B.C, but the beginning of the city goes back as far as 1,500 BC. Lamanai is the longest continually-occupied site in Mesoamerica. Finally, Josh enjoys a breathtaking underwater adventure swimming with sharks. The Hol Chan Marine Reserve was established in 1987, and is a protected area for nurse sharks and other wildlife. Nurse sharks have teeth set further back, so they eat with a sucking motion. Nurse sharks are important to the fragile marine ecosystem and reefs.

[Educational Message: Venturing safely into the wild to witness the majesty of creatures in their natural habitat can be both an educational and also an enlightening experience, and can leave you in wonderment.]

Time:

Duration: 30:00

WILDERNESS VET

TINY HEARTS [WDV216]

In the Yukon, large animals aren't the only ones that require Dr. Oakley's expertise, little creatures depend on her as well. But don't let their size fool you because these tiny patients tend to have the largest personalities. First, Dr. Oakley visits a bald eagle for its annual checkup. After carefully restraining the eagle, Dr. Oakley notices that there is some abnormal wear and inflammation in the raptor's foot. Dr. Oakley thoroughly cleans the eagle's feet and utilizes a moisturizer and antibiotics to help heal the injured foot. Next, Dr. Oakley visits with a puppy named Dixie who may be suffering canine parvovirus, a highly contagious infection. Dixie will be prescribed an antibiotic and be isolated from all other animals while she recovers. Next, Dr. Oakley visits with Maggie, an Australian shepherd suffering from a severe laceration on her paw. Although a difficult injury to treat, Dr. Oakley thoroughly cleans the area and applies stitches to close the wound. Finally, Dr. Oakley visits a rescued pet tropical parrot named Buzz that was previously kept under poor conditions. Dr. Oakley performs a physical exam and discovers that Buzz is actually a wild caught parrot that is at least 25 years old. Because Buzz did not grow up in the wild, he will remain in human care.

[Educational Message: We are always faced with obstacles in life, big or small. We must face all challenges with the same effort and enthusiasm in order to overcome.]

JOURNEY WITH DYLAN DREYER

AROUND THE WORLD [JDD225]

Join host Dylan Dreyer on an epic journey across the globe to experience natural wonders of the world. We'll begin on the ancient Galapagos Islands and come face-to-face with the only lizards who swim in the ocean. We'll travel to remote islands off the coast of Mexico, and explore the wild lands of western Europe. First up, we'll journey to the Galapagos Islands to learn more about the land iguanas that washed up on shore around the same time the islands were formed. Some iguanas went inland, and others adapted to life

on shore. We'll learn that what makes the Galapagos marine iguana truly unique is that it's the world's only seagoing lizard. Next, we'll travel to the Sea of Cortez, which is located between the Baja California peninsula and the Mexican mainland. Here we'll learn more about the mighty cardon, a species of cactus that can live for hundreds of years and grow as tall as sixty feet. We'll discover more about the cardon's symbiotic relationship with native pallid bats and how both organisms depend on each other for survival. Next, we'll meet the dolphins that inhabit the Sea of Cortez and learn how they prefer more shallow, coastal waters in order to find food. We'll also discover that the closest living land-relative to dolphins is the hippopotamus. Next, we'll journey on an exploration of one of the oldest and most beautiful cities in Germany: Cologne. We'll learn more about the native bird species of Cologne such as the mighty swan and we'll also learn about the non-native species. Non-native birds like the Egyptian goose or parakeet established themselves in Cologne after their ancestors escaped from local zoos. Finally, we'll discover more about the world's largest fish, the whale shark. We'll learn that the whale shark can average thirty feet in length, weigh as much as 20,000 pounds, and lives up to 70 years of age.

[Educational Message: From the Galapagos Islands, to the rivers of Europe, to the deserts of Central America, our world is filled with amazing species that deserve our protection. Our world is a beautiful place and we should strive to keep it that way.]

Time:

Duration: 30:00

NATURALLY, DANNY SEO

CHLOE DAO [NDS216]

Host Danny Seo travels to Houston to visit fashion designer Chloe Dao and learns how to macramé using leftover fabric. Macramé is the art of tying knots to create designs, and it is believed to have originated with Arab weavers in the 13th century. In the 19th century, sailors helped spread the art of macramé by making macramé hammocks and belts, calling the process "square-knotting," and bartering or selling their creations at various ports. Next, Danny makes a peel-off charcoal mask using egg whites, activated charcoal and gelatin. Egg whites help tighten pores and are high in protein, which absorbs oil; and activated charcoal helps detoxify skin and is made from wood, coal or other substances that have been processed at high temperatures. Then, Danny prepares two different meals featuring yogurt. A typical serving of yogurt has a few billion "good" bacteria, which can aid in digestion; and when yogurt is frozen, the cultures become dormant, but once ingested, they become active again. Then, Danny makes wooden letters using twigs found outside and butyl. Even in extreme weather, butyl retains elasticity and adhesion; one of the first uses of butyl rubber was to make tire inner tubes.

[Educational Message: Macramé is a creative, easy way to make one-of-a-kind pieces, such as fashion accessories and art, while also practicing an ancient technique. Instead of spending money on a charcoal mask at the store, you can make one at home with just three ingredients that provide benefits for your skin. You can do more with yogurt than just eating it as-is, it can be used to enhance a recipe as a substitute for milk that provides more flavor. You can create personalized art using something you see everyday and wouldn't expect, like sticks found in your own backyard.]

Airdate: 7/21/2018

Time:

Duration: 30:00

THE VOYAGER WITH JOSH GARCIA

ASIAN ADVENTURE [VJG217]

Josh rereads some of his favorite journal entries from his thrilling tour of Asia. In Ho Chi Minh City, Vietnam, he ventures into the lush rice fields, learning first-hand about the country's most important crop. He learns to harvest rice by hand one grain at a time, and realizes that rice harvesting isn't easy and requires much time and careful work, spanning across about three cropping seasons per year. In Shanghai, China, Josh discovers the city's hottest specialty, little pillows of joy called soup dumplings. Soup dumplings are typically filled with pork, shrimp, or crab, and this dish dates back to the 1800s in a town outside of Shanghai. Meat is steamed inside a pocket of thin, dumpling dough, locking in the broth. Dumplings are shaped through a technique called pleating. Finally, in Taipei, Taiwan he explores a majestic tea farm high above the city and learns how to make Taipei's celebrated elixir, Oriental Beauty. The process of harvesting tea begins by picking specific portions of the plant and then the leaves are left out in the sun to wither to remove any excess water and prepare the leaves for oxidation. Then the tea leaves are roasted, folded, and rolled to release the tea's natural flavors and aromas.

[Educational Message: Paying attention to small details can have great reward, whether that's the meticulous details in a time and labor intensive process or appreciating the small things in life.]

Airdate: 7/21/2018

Time:

Duration: 30:00

WILDERNESS VET

OH DEER! [WDV217]

With so many species of deer roaming the Yukon, no two encounters are ever the same. But whatever size, age, or color - these creatures can always rely on Dr. Oakley to be there when they need her. First up, Dr. Oakley is visiting a local farm to check on a young reindeer with a serious injury. After sedating the patient, Dr. Oakley discovers the reindeer has a fractured leg and a massive infection. For this nasty injury to fully heal, it will take some time, antibiotics, and plenty of rest. Next, Dr. Oakley is heading to the Alaska Wildlife Conservation Center to test a herd of elk before they are released to the wild. To test these animals for diseases, Dr. Oakley will need to sedate the elk, and collect blood samples. Dr. Oakley will be checking for adenovirus, a disease that can turn fatal quickly, and is extremely contagious. Next up, Dr. Oakley is checking in on an orphaned moose calf suffering from a broken leg. Due to the weakened condition of the animal, Dr. Oakley will provide I.V. fluids and pain relief to help treat the ailing moose calf. Finally, Dr. Oakley heads out to a local farm to check in on a newborn reindeer calf that may be suffering from conjunctivitis. However, after a quick examination, Dr. Oakley discovers that the calf actually has entropion, a medical condition in which the eyelid folds inward. Luckily, Dr. Oakley is joined by a group of veterinarian students, so this procedure will be an excellent teaching opportunity.

[Educational Message: Never stop learning and never stop sharing. We must constantly seek new knowledge and do our part to share it with others.]

Airdate: 7/21/2018

Time:

Duration: 30:00

JOURNEY WITH DYLAN DREYER

ADAPT AND SURVIVE [JDD226]

Join host Dylan Dreyer for an up-close look at how some of our planet's most amazing species adapt and survive. We'll explore dark caves full of bats in the jungles of Thailand, meet a pack of wolves in the wilderness of Canada, and come face-to-face with Alligators in the swamps of Georgia. First up, we'll learn more about the Okefenokee Swamp in Georgia, and how this corner of the Earth is home to the largest most ecologically diverse wetland ecosystems on the planet. The Okefenokee Swamp is brimming with wildlife and is home to over 60 species of reptiles and at least 200 species of birds. Next, we'll meet the American Alligator, one of the oldest and most dominant predators to have ever lived. We'll learn how alligators and dinosaurs both shared common ancestors more than 220 million years ago. We'll also discover how alligators are highly sophisticated and very complex animals that are superbly adapted for their life as apex predators in wetland ecosystems. Next, we'll journey to the mountains of Yellowstone, where we'll follow a mother grey wolf that has just given birth to a litter of pups. Here we'll learn how the entire wolf pack helps with the feeding, protection, training and socialization of the pups. Next, we'll travel to the volcanic island of New-Britain off the coast of Papua New Guinea. Here we'll meet a strange prehistoric bird called a megapode, which buries its eggs in warm volcanic ash to incubate its chicks. Finally, we'll journey through Thailand's breathtaking Khao Sok National Park. Here we'll witness an incredible and dangerous treasure hunt that takes place high up the park's limestone rocks and deep within a cave. The treasure the locals are seeking is the edible Swiftlet nest. In China, these nests are a delicious delicacy and fetch a high market price. Here we learn how the Swiftlet birds construct these intricate nests from their own saliva.

[Educational Message: Nature can be unforgiving; we must always appreciate its beauty and power. We need to learn to adapt to changes in our world in order to survive.]

Airdate: 7/21/2018

Time:

Duration: 30:00

NATURALLY, DANNY SEO

SPILLING THE BEANS [NDS217]

Host Danny Seo travels to a factory in Indiana to learn how beans, which are a good source of iron and potassium, are produced. The process consists of soaking the beans for 18 to 22 hours; removing water by centrifugal force, which is the action of drawing a rotating body away from the center of rotation; steam blanching to remove oxygen; seasoning and canning. On average, Americans consume about 7.5 pounds of beans each year. Next, Danny makes different types of hummus using exotic ingredients, such as za'atar and preserved lemons. The word hummus means chickpeas in Arabic, and chickpeas are an excellent source of fiber, protein, iron and zinc. Za'atar is a Middle Eastern spice blend that was used for medicinal purposes in the 12th century and can be traced back to biblical times. Preserved lemons, a Moroccan staple, have a silky texture and a mellow, citrus flavor. Then, Danny turns rocks found in the yard into marbled works of art using paint and glaze, which is a binding solution that gives decorative finishes depth and dimension. Marbleizing, originally called "ebru" or "cloud art," began in Persia, India and Turkey in the 15th century.

[Educational Message: A nutritious food starts with the soil in which it is grown--providing nutrients like nitrogen and potassium instead of synthetic fertilizer helps ensure healthy produce. Beans contain nutrients such as iron, potassium, magnesium, folic acid and zinc. Adding an exotic

ingredient to a seemingly plain recipe or applying an ancient technique to decorate a seemingly plain object is a great way to show creativity and gain insight into a different culture.]

THE VOYAGER WITH JOSH GARCIA

SWEET PARADISE [VJG218]

Host Josh Garcia docks in the captivating Spanish island of Mallorca. First, Josh takes a scenic ride through the countryside on a one-of-a-kind wooden train built over a century ago. The Sollar Train has been in service since 1912 and at one time was used to transport goods and passengers from Sollar to Palma. It's a narrow gauge train which refers to the width of the track being 3 feet compared to the standard 4.5 feet. Then, at a gourmet sausage lab, he learns how to make *sobrasada*, a world-famous Mallorcan delicacy. Sobrasada has been a delicacy since the 17th century and is a combination of spices and pork meat. Once it has been filled into casings, it cures for approximately six weeks. Later, Josh visits a historic bakery where he tries his hand at creating an *ensaimada*, the island's most beloved pastry. This pastry is made with lard, a cooking fat used to make pastries crumbly in texture. Ensaimada can be made to have different flavors, both sweet and savory.

[Educational Message: Traditions can be passed down through different generations of a family, and these traditions can evolve with modernity while retaining some of the original techniques. When it comes to cooking and baking, many recipes are handed down across generations, showing how certain ingredients and techniques are preserved in history through practice.]

WILDERNESS VET

CLAWS, PAWS, AND HOOVES [WDV218]

Having a diverse range of clients is what Dr. Oakley loves most about her job. She can be playing with puppies one minute, out in the field with wild wolverines the next, or simply working with pigs back at her office. First up, Dr. Oakley is visited by a pet pot bellied pig suffering from eye issues. After an examination, Dr. Oakley determines that the pig's sore eyes are being caused by pressure from its growing tusks, which will be easily treatable with anti-inflammatories. Next, Dr. Oakley is heading out to an emergency call to check on a couple of dogs that had a run-in with a porcupine. To treat the patients, Dr. Oakley will have to carefully remove all of the porcupine quills. Next, Dr. Oakley is on her way to the Alaska Wildlife Conservation Center to check in on their newest arrival, a wolverine. Before moving the wolverine to its new enclosure, Dr. Oakley will be performing a castration. This procedure will ensure the healthy Alaskan population of wolverines will not be introduced to the foreign genetics of the new arrival. Finally, Dr. Oakley is visiting a group of sled dog puppies to ensure they are healthy and able to compete in sled dog racing. Here, Dr. Oakley will perform standard physical exams while enjoying some puppy playtime in the process.

[Educational Message: We are presented with new challenges every day and we must not let ourselves be defeated. We learn more from failure than we do from success.]

JOURNEY WITH DYLAN DREYER

FIRE ANTS [JDD218]

Join host Dylan Dreyer on an exploration of the fearless and fearsome fire ant. We'll discover the amazing ways these tireless creatures have survived over the eons and witness their incredible ability to overcome nearly every challenge that comes their way. We'll also meet the scientists hoping to unlock their secrets and come face-to-face with a tiny world like you've never seen before. First up, we'll learn that of the twenty-two species of fire ants, the most feared and reviled of them all is the red imported fire ant. We'll discover how the fire ant is native to the floodplains and savannas of South America, but that sometime in the mid-1930s, the ant hitched a ride on a cargo ship to North America where it quickly spread. Next we'll learn how fire ant colonies work together and how each ant has its own role and responsibility. We'll also discover more about the impact of fire ants, such as how fire ants are among the worst invasive species due to their destruction of farmland. Next, we'll learn about the amazing survival skills and adaptability of the fire ant, such as its ability to survive extreme cold temperatures, and how they use teamwork to link together and form a floating raft during floods. We'll discover more about how ants use swarm intelligence, which is the same principle that helps schools of fish avoid a predator, or helps a large flock of birds fly as one. We'll also learn how fire ants use their incredible strength to survive. Depending on the species, ants can lift between 20 and 100 times their own weight. Finally, we'll learn how scientists are studying the species and how they're working towards an environmentally-safe solution to eradicate the non-native fire ant from North America.

[Educational Message: Although small, the fire ant has proven to be a dominant and prevalent invasive species in North America. We can do our part to limit the spread of other invasive species by cleaning our outdoor recreation gear and not releasing any unwanted pet or fish into the wild.]

NATURALLY, DANNY SEO

AVOGANIC [NDS218]

Host Danny Seo visits an organic avocado tree-to-table farm to learn how organic avocados are produced and how to make avocado key lime pie. A tree-to-table supplier offers fresh produce direct from a farm without using a grocer or distributor; and being organic means alternatives to synthetic fertilizers are used, such as fish emulsion fertilizer that feeds plants and the healthy microbes that live in the soil. Next, Danny makes homemade makeup remover using two all-natural ingredients, witch hazel and jojoba oil. Witch hazel is a natural astringent derived from the leaves, bark and twigs of the witch hazel plant; and jojoba oil has moisturizing and sun-protecting effects. Then, Danny makes cauliflower cheddar bread with a healthy twist by substituting butter with yogurt. Cauliflower has high levels of vitamins C and K. Then, Danny gives old tile and plates a new look by reglazing them. Ceramic glaze is an impervious coating that can be heat-fused to porcelain, and additional decoration applied on top of a layer of glaze is referred to as overglaze. The earliest discoveries of glazed pottery came from the 8th or 9th century BC in China, Egypt, Mesopotamia and Greece.

[Educational Message: Avocados are not only good for eating, but they also contain nutrients that can be used to make cosmetics, shampoo and dog food. Some makeup remover wipes contain parabens

and alcohol, which can dry out skin; so a more natural option is to make all-natural makeup remover wipes at home with plant-based ingredients. Yogurt is a good alternative to butter that has less fat and provides more protein. Reglazing pottery is an affordable and creative way to rejuvenate old pieces without the hassle of using a kiln.]

THE VOYAGER WITH JOSH GARCIA

SOUNDS OF LISBON [VJG219]

Host Josh Garcia spends the day ashore in Lisbon, Portugal, discovering the food, culture, and music of this Portuguese hot spot. First, at a traditional artisan workshop, Josh learns the ancient art of handcrafting Lisbon's iconic, decorative tiles. He sees firsthand how these tiles, locally known as *azulejo*, are made using techniques dating back to the 18th century. *Azulejo* comes from an arabic word meaning "polished stone." Next, he gets a master class in making vegetable tempura, the world-famous dish that originated in Portugal. Tempura means battering ingredients in a batter made of flour, water, herbs, and cornstarch, before frying in oil. Later, Josh is introduced to Fado music and learns about the unique instrument behind its haunting melodies. The Portuguese guitar has twelve strings, giving the sound a different tone. The body of the guitar is made by molding thin strips of wood to bend the uniquely pear shape of the Portuguese guitar.

[Educational Message: Music can serve as a universal language, and can be an expression of emotion that everyone can understand regardless of their spoken language.]

WILDERNESS VET

QUALITY TIME [WDV219]

Being the only wildlife vet for hundreds of miles means always being on the road, and for Dr. Oakley, that much time away from home can be difficult. So, in order to see her family, she often likes to recruit them to help out with her appointments. First up, Dr. Oakley, along with her daughters Maya and Willow, are on the way to a local ranch to see a horse in need of a neutering. This horse is being retired from breeding, so Dr. Oakley will need to anesthetize the horse and perform a castration procedure. Next, Dr. Oakley is visiting a farm with a pregnant cow that cannot give birth. Dr. Oakley will have to give the cow an internal exam to check on the unborn calf and ensure there are no complications. Next, Dr. Oakley receives a surprise visit from her daughters and their family dog, Daisy May. Daisy May is having eye issues and will need a thorough exam to confirm whether or not she suffers from glaucoma. Dr. Oakley uses this moment to teach her daughters more about the tools used to test for glaucoma, such as a tonometer. Next, Dr. Oakley is visited by an ailing puppy that may have ingested a toxic caterpillar. After a quick exam, Dr. Oakley confirms the puppy is suffering from a case of parasitic worms and will be prescribed a de-wormer to recover. Finally, Dr. Oakley and her family take a camping trip to a very remote location in Alaska where they'll spend some quality time together as a family.

[Educational Message: Bonding with family and spending quality time together is important in life. When we have each other, we have everything we need.]

JOURNEY WITH DYLAN DREYER

SPAIN NORTH [JDD219]

Join host Dylan Dreyer on a breathtaking tour of Northern Spain. Over treacherous cliffs and majestic mountains, through ancient cities and rich culture, we're on an adventure where surprises wait around every corner and history reveals itself like never before. First up, we'll discover more about Spain and how it's home to over 47 million people, making it the sixth largest country in Europe. Next, we'll learn about the dangerous coastline of Northern Spain, and how a tragic shipwreck gave way for the first electric lighthouse on Spanish coasts. We'll discover that before the invention of the lighthouse, seaside residents in Spain and across the globe would burn large fires to warn sailors. Next, we'll learn more about the fishing industry in Northern Spain and how their inlets make up the most important region for traditional fishing and seafood fishing in all of Europe. Next, we'll journey to San Sebastian, founded in the year 1180, where we'll see how tradition and modernity go hand in hand. We'll discover that Spain hosts over 58 million tourists every year, making it one of the most visited countries on Earth. Next, we'll learn more about the geology of the region's coastlines, such as how the cliffs of Northern Spain were formed by layers of rock that date back to the time of the dinosaurs. Finally, we'll visit the Pasajes Inlet and learn more about the rich history of the natural canal that's been a starting point for international routes for centuries.

[Educational Message: The world we recognize today is billions of years in the making. Vibrant cultures today have rich histories to discover.]

NATURALLY, DANNY SEO

SWEET CREAMS [NDS219]

Host Danny Seo travels to Houston, Texas to learn how to make uniquely flavored homemade frozen custard, which contains at least 1.4% pasteurized egg yolk solids, creating a thicker consistency than ice cream. Next, Danny shares how to upcycle old sponges by turning them into ice packs using a zip-lock bag, water and rubbing alcohol. Rubbing alcohol prevents the water from freezing completely; while water freezes at 32 degrees, rubbing alcohol freezes around -128 degrees. Then, Danny uses Brussels sprouts, cauliflower and radicchio to cook meals that are meat-free alternatives to popular dishes, like General Tso's chicken—which is named for the 19th century Hunanese General Tso Tsung-t'ang. Radicchio is Italian chicory with a sharp, bitter flavor which mellows and sweetens after grilling. Then, Danny creates coffee ground soap using glycerin, which is an organic compound that, when liquefied, is clear and odorless. He also uses coffee grounds to create a body scrub with coconut oil, which is naturally antibacterial and antifungal. Lastly, Danny explains which font types are the most ink efficient—printing 25 pages a week using Times New Roman instead of Arial could save nearly \$20 each year.

[Educational Message: Growing your own ingredients or using local ingredients to make fresh food is a great way to practice sustainability. Using uncommon ingredients to create unique flavors that resonate with you can be a way to express yourself and show creativity. Many household ingredients have multiple purposes.]

THE VOYAGER WITH JOSH GARCIA

BAY OF DREAMS [VJG220]

Host Josh Garcia cruises into Kotor, Montenegro, one of the most beautiful bays in the world. Josh spends his day exploring the medieval city. First, he meets a local chef who shows him the ancient method for preparing *sac*, a flavorful specialty native to the country. A sac is a large metal lid in the shape of a shallow bell, and the dish of its same name means “the meal prepared under the bell,” and consists of a roasted meat stewed with potatoes, root vegetables, and herbs. Then, inspired by the city’s limestone landscape, Josh travels to the countryside to learn more about this ubiquitous natural treasure. Limestone terraces are built without any mortar or concrete, but instead by stacking limestone slabs in a tight arrangement. Limestone is a sedimentary rock commonly used in ancient architecture, including the Great Pyramid of Giza. Finally, Josh teams up with some of the country’s top-ranked water polo athletes and makes a big splash learning Montenegro’s national sport.

[Educational Message: When traveling an ancient, historic city, walking the historic streets and footpaths can be a great way to walk through history, experience a city like a local, and be physically active while away from home.]

WILDERNESS VET

COLD CASES [WDV220]

Living in the Yukon means living amongst beautiful landscapes, amazing wildlife, and some of the harshest weather conditions in the world. Luckily, Dr. Oakley doesn’t mind bundling up and heading out into the cold to help any animal that needs her. First up, Dr. Oakley and her daughter Willow are heading out to Moose Mountain to catch wild boar. Wild boars are an invasive species and can be quite destructive to the environment. The team has identified a male wild boar that they will need to capture and castrate. Next, Dr. Oakley is joining a research project by working with a team that is tracking wild populations of wolverines in Alberta, Canada. After successfully trapping a female wolverine, Dr. Oakley will have to sedate the animal in order to attach the GPS tracking collar and collect a blood sample. Here we’ll learn more about the fierce wolverine species as the team works carefully to successfully complete the procedure.

[Educational Message: In life, the ability to work with others as a team to problem-solve is crucial. More often we can accomplish great things together than when working alone.]

JOURNEY WITH DYLAN DREYER

ALLIGATORS [JDD220]

Join host Dylan Dreyer on a grand tour through the one of the most ecologically diverse wetland habitats on Earth: the mighty Okefenokee Swamp of southern Georgia. We’ll trek deep into the heart of this protected wilderness to explore a tangled web of life that will do anything to survive. Along the way, we’ll come face-

to-face with the American Alligator, witness the regenerative power of fire, and discover plants that bite. First up, we'll learn more about the Okefenokee Swamp and how this corner of the Earth is home to the largest most ecologically diverse wetland ecosystems on the planet. The Okefenokee Swamp is brimming with wildlife and is home to over 60 species of reptiles and at least 200 species of birds. Next, we'll meet the American Alligator, one of the oldest and most dominant predators to have ever lived. We'll learn how alligators and dinosaurs both shared common ancestors more than 220 million years ago. We'll also discover how alligators are highly sophisticated and very complex animals that are superbly adapted for their life as apex predators in wetland ecosystems. Next, we'll learn more about the diverse plant life in the region, including one of the strangest carnivores in the world, the sundew. We'll see how the sundew plant uses its tentacle-like hairs to secrete a sweet, sticky syrup that attracts insects that become entrapped and eventually consumed. Finally, we'll discover how nature has an amazing way of taking care of itself and keeping the environment in check through fire. Here we'll learn how forest fires are cyclical and essential to the health of the entire ecosystem.

[Educational Message: The Okefenokee Swamp and other wild wetlands are becoming increasingly rare as human populations grow. In our ever-changing world, better understanding of biologically diverse wetlands is an important step towards protecting them, and the incredible animals that live there.]

Airdate: 8/11/2018

Time:

Duration: 30:00

NATURALLY, DANNY SEO

PASTA FACTORY [NDS220]

Host Danny Seo travels to Detroit to learn how Kamut pasta is made. Kamut is a whole grain, and farmers in Turkey call the grain "Camel's Tooth" because of its shape. To make pasta, the Kamut is ground into flour, mixed with dehydrated vegetables and water, squeezed through an extruder to get its shape, and then dried. Next, Danny creates a healthy alternative to risotto using sunflower seeds. By soaking sunflower seeds overnight in water, they develop a texture similar to risotto. Risotto is traditionally prepared with short-grain Arborio rice, and sunflower seeds are one of nature's highest sources of vitamin E. Then, Emily Shuman joins Danny and shows how a reusable bag, which has a lifespan equal to that of more than 700 disposable plastic bags, can be transformed into a personalized tote by using paint and a stencil. Around 105 AD, the Chinese were the first to develop a paper-based stencil. Lastly, Danny teaches how to personalize wooden objects through the technique of wood burning. Firewriting, or "pyrography," is the art of burning a pattern on a wood surface.

[Educational Message: Kamut pasta is a great source of protein and fiber without additives. Ingredients, such as sunflower seeds, that are more commonly used for a snack or seasoning can also be used to replace carbohydrates, such as pasta, in a hearty meal. Painting a reusable bag is a way to express personal style while also preventing waste. Wood burning is a creative way to turn something plain into something unique and personal while also practicing an ancient technique.]

Airdate: 8/18/2018

Time:

THE VOYAGER WITH JOSH GARCIA

TROPICAL DELIGHTS [VJG221]

Host Josh Garcia rereads some of his favorite journal entries from his exciting voyages through the Caribbean Sea. In Havana, Cuba, Josh steps ashore and learns a celebrated dance style born in this famous city. Cuban Salsa, or Rueda de Casino, became popular in Miami in the late 1980s. Josh learns the basics of Cuban Salsa and starts to feel the rhythm in his feet with practice and the help of some new friends. In this style of dance, the dance takes you full circle as you trade partners to make your way around a circle of other dancers. In Belize, he experiences the thrill of a lifetime, swimming with sharks in one of the longest barrier reefs on earth. The Hol Chan Marine Reserve was established in 1987, and is a protected area for nurse sharks and other wildlife. Nurse sharks have teeth set farther back, so they eat with a sucking motion. In Ocho Rios, Jamaica, Josh visits a restaurant famous for its jerk chicken and discovers the signature spicy flavors that make this specialty a world-wide favorite. Jerk chicken is seasoned with a mixture of dry seasonings instead of being marinated in juices and oil. In Jamaica, it is roasted on logs of allspice wood for added flavor. It takes approximately an hour and a half to roast jerk chicken.

[Educational Message: When you are traveling to a new place, or even a place you have been before, take time to stay present in the current moment and take in the sights, sounds, and experience of where you are. At the end of the day write down a list of what you did and saw, so later you can recall those experiences, and maybe one day revisit them.]

Duration: 30:00

WILDERNESS VET

FAR AND WIDE [WDV221]

The Yukon is a large place, which for a veterinarian means having clients both near and far. But Dr. Oakley is one dedicated doc and will go to extreme lengths and distances if it means helping her patients. First up, Dr. Oakley is on her way to assist with the transportation of a group of caribou to the Alaska Wildlife Center. They'll have to travel over 1,500 miles on their journey from British Columbia, so it's important to have a veterinarian on hand in case of emergencies. Only a few hours into their trip, Dr. Oakley notices a problem with one of the caribou behaving strangely. To help keep the caribou relaxed, each one of them was given a light tranquilizer prior to the trip, this abnormal behavior could be an indication of a bad reaction. To help the ailing caribou, they'll have to give an injection to counteract the tranquilizer. After a long journey, the team arrives at their destination and all caribou are in good health. Next, Dr. Oakley is heading out to a remote farm to check on a bull calf in need of a castration. Also, Dr. Oakley will be visiting with several horses on the farm to perform dental procedures. Dr. Oakley and team will be working with Fjord horses, one of the world's oldest and purest breeds. Finally, Dr. Oakley and her family take a kayaking trip together where they get to view a group of sea lions in their natural habitat.

[Educational Message: We are presented with new challenges every day and we must not let ourselves be defeated. We must always stay focused on our goals and push ourselves to overcome the obstacles.]

Airdate: 8/18/2018

Time:

Duration: 30:00

JOURNEY WITH DYLAN DREYER

WILD COLOGNE [JDD221]

Join host Dylan Dreyer on an exploration of one of the oldest and most beautiful cities in Germany: Cologne. Renowned for its gothic architecture and designs, this famous tourist destination has been home to proud communities for more than two thousand years. We'll uncover the people, culture, and history that make this region so special, and witness the amazing wildlife that have made this urban jungle their home. First, we'll meet a variety of water birds that live on a lake placed in the center of the large city of Cologne. We'll learn more about the native bird species of Cologne such as the mighty swan and we'll also learn about the non-native species. Non-native birds like the Egyptian goose or parakeet established themselves in Cologne after their ancestors escaped from local zoos. Next, we'll learn more about the common swift, a migratory bird that comes to Cologne all the way from Africa. Here we'll meet a woman who has dedicated her life to caring for and rehabilitating injured swifts. We'll witness how she patiently feeds the ailing birds and monitors their recovery for their eventual release back into the wild. Next, we'll explore the dense, green forests that surround the city of Cologne, known as the Konigsforst. This region is home to a healthy population of red deer, a species with a fossil record that dates back over 12 million years ago. Here we'll discover that red deer were among the first animals to ever be depicted by humans in cave paintings. We'll also learn how Cologne has implemented wildlife pathways that cross over busy highways. This solution allows humans to live alongside nature, increasing the available habitat for animals while protecting the populations of red deer and other native species.

[Educational Message: As our world grows and our cities expand, we must realize the impact we have on our environment. We must find ways to protect our surrounding nature and wildlife for future generations.]

Airdate: 8/18/2018

Time:

Duration: 30:00

NATURALLY, DANNY SEO

GREEN SEED VEGAN [NDS221]

Host Danny Seo travels to Houston to visit a 100% vegetarian restaurant and learns how to put a vegetarian twist on a popular meat dish by making chicken fried cauliflower, which is in the same plant family as broccoli, cabbage and Brussels sprouts. While vegetarians typically avoid meat, poultry and fish, vegans exclude any animal-derived ingredients. Next, Danny teaches how to make antibacterial wipes at home using old cotton t-shirts, distilled water, white vinegar, rubbing alcohol, and castile soap. Castile soap, which is made from potassium and oils, is a surfactant, meaning it tends to reduce the surface tension of a liquid in which it is dissolved. Then, Danny makes cheesecake using a unique ingredient: spirulina, which is a blue-green algae that contains over 60% protein. Lastly, Danny shows how to turn an old accessory, like a leather belt, into something new by using the technique of embossing, which is the art of creating raised patterns on the surface of leather, metal and other textiles.

[Educational Message: Some meats can be harder for bodies to digest, so incorporating a vegetarian meal into your routine allows your body to cleanse and is an opportunity to try new recipes. Making your own antibacterial wipes is both ecological and economical. Forgotten accessories can be upcycled

into new found treasures, and the art of embossing allows the opportunity for personalization and creative expression.]

Duration: 30:00

THE VOYAGER WITH JOSH GARCIA

MONKEYING AROUND [VJG222]

Host Josh Garcia heads to the country of Panama and transits through its famous canal, an impressive feat of modern engineering. Upon arriving, he tours the historic district of Panama City, exploring the area's beautifully preserved, old-world charm. Josh learns how the city continues to change and reinvent itself with time. Panama City is the only capital city that has a rainforest within its city limits, and Josh visits Monkey Island, where he gets up-close and personal with the country's most adorable, and sometimes mischievous, inhabitants. The white-faced capuchin is the main species that lives on this island, and is believed to be one of the most intelligent monkeys in the world. Finally, he meets the Embera people, an indigenous tribe, currently living in the Chagres National Park located 25 miles from Panama City. Josh tours their structures and learns about their traditional lifestyle in the remote regions of Panama's rainforest. The Embera tribe has lived in this exact location for over fifty-five years, and in Panama for about five hundred years.

[Educational Message: The Panama Canal is an engineering marvel, built on the narrowest part of Central America, allowing for a direct line of travel from the Atlantic to Pacific Ocean. Visiting remote locations to learn about a simpler way of life can help you gain a new appreciation for modern conveniences we often take for granted.]

Airdate: 8/25/2018

Time:

WILDERNESS VET

ALWAYS ON CALL [WDV222]

As a wildlife vet, being prepared for anything is all part of the job. First up, Dr. Oakley receives an urgent call regarding a pregnant sheep showing poor signs of health. Due to the pregnant sheep's large size, Dr. Oakley fears pregnancy toxemia is the likely cause. Overweight sheep are most at risk because there is little room for the stomach to expand and take in nourishment. Dr. Oakley performs a glucose test and a physical exam to rule out pregnancy toxemia. Next, Dr. Oakley travels to Haines, Alaska to perform vaccinations on local canines. During this visit, Dr. Oakley treats a pet Sphynx cat that has a fish hook lodged in its paw. Next, Dr. Oakley heads to a house call to check on a goat with a suspicious lump on its face. Here we'll learn how goats were one of the first animals to be domesticated over 9,000 years ago. After a thorough examination, Dr. Oakley identifies the lump as an abscess, so she drains and flushes the growth and provides antibiotics to help the wound heal. Finally, Dr. Oakley is having a home clinic day to check up on many of the local dogs and cats in her area. Today, Dr. Oakley's daughter Sierra is assisting her mother with the checkups, which is a great opportunity for her to learn valuable veterinary skills.

[Educational Message: Never give up when the odds are against you. With determination and hard work, we can do anything we put our minds to.]

Airdate: 8/25/2018

Time:

JOURNEY WITH DYLAN DREYER

AMAZING ANIMALS [JDD222]

Join host Dylan Dreyer for a unique look at some of the most incredible and successful animals on Earth. From elephants living in the jungles of Thailand, to sprawling underground cities of ants in the western United States, to communities of playful sea lions off the coast of California, we'll experience some of the planet's most iconic species from their own point of view. First up, we'll travel to Khao Sok National Park in Thailand. Here we'll follow a group of conservationists and biologists who have been caring for a juvenile elephant that was separated from its herd by a group of poachers. The team is hoping that another elephant herd will take the juvenile as their own, but in order to bring them together, they'll have to better understand the natural patterns of the elephants living inside the park. Next, we'll journey to the Pacific Ocean where we'll come face to face with Great White sharks. We'll discover how Great Whites can grow as big as 20 feet long and weigh as much as 7,000 pounds. Next, we'll follow a group of California sea lions and learn how they can eat between 5-8% of their entire body weight in a single day. We'll also learn how sea lions are related to bears, weasels, and raccoons. Next, we'll travel to North America to learn more about an invasive species of fire ants. We'll discover how the imported red fire ant is native to the floodplains and savannas of South America, but that sometime in the mid-1930s, the ant hitched a ride on a cargo ship to North America where it quickly spread. We'll also learn about the amazing survival skills and adaptability of the fire ant, such as its ability to survive extreme cold temperatures. Next, we'll journey to Germany where we'll discover more about the various species of birds, amphibians, reptiles, and mammals that call the Wupper River home.

[Educational Message: Our society can have a big impact on the nature and wildlife that surrounds us. We must protect and treat our own environment with respect and hard work to ensure it thrives for generations to come.]

Airdate: 8/25/2018

Time:

Duration: 30:00

NATURALLY, DANNY SEO

MAGPIES AND PEACOCKS [NDS222]

Host Danny Seo visits a non-profit design house in Houston whose message is to be a responsible consumer. They collect unwanted textiles, diverting post-consumer textiles from landfills, and turn them over to designers to make fashion pieces. Approximately 32.4 billion pounds of textile trash are disposed of each year in the U.S. Next, Danny teaches about different types of exotic fruits, such as horned melon and dragon fruit, and the appropriate way to consume each. Horned melon, which also goes by the name kiwano, is native to Southern Africa; and like the pomegranate, horned melon seeds are safe to eat. Dragon fruit is produced by a fruit-bearing species of cacti, native to Central and South America. Then, Danny meets a fitness coach to learn the appropriate way to use simple workout tools, like tubing and a foam roller, and the importance of stretching to relieve daily stress placed on the body-- constantly looking down at a mobile device can place up to 60 pounds of pressure on the spine. Tubing is used for resistance training, which helps strengthen the core, and a foam roller is used for myofascial release, which is the process of rolling out tight muscles and relieving tension.

[Educational Message: Just because something is trash to you doesn't mean it can't be used to create something new and unique. Being a responsible consumer helps lessen environmental costs by making environmentally friendly purchases. Trying new fruits and vegetables, even if they are exotic and unusual to you, is a great opportunity to learn about different cultures, try new recipes, and expand your palate. Stress is placed on the body even when we don't realize it, so it's important to have a healthy routine of stretching and exercising.]

THE VOYAGER WITH JOSH GARCIA

MEDIEVAL MAGIC [VJG212]

Host Josh Garcia sails to the stunning, medieval city of Dubrovnik, Croatia. He visits a silk museum where he learns about the little creature behind one of the city's most celebrated traditions. Humans began using silk approximately 5,000 years ago, and the first production of silk started in Dubrovnik's Konavle region in the 15th century. Silk comes from the cocoons of silkworms. Silk cocoons are soaked in hot water to unwind the threads, and then it is brushed out by hand to collect this material for textiles. Next, Josh ventures into the turquoise waters of the Adriatic and discovers a seafood delicacy found only in this part of the world. The bay of Mali Ston is home to the largest oyster cultivation facilities in the Adriatic. The famous European flat oyster is cultivated here. Later, he explores the area's famous salt flats and uncovers the incredible history behind this prized commodity.

[Educational Message: Over time, different materials and resources take on new forms and uses. It's hard to believe that years ago the salt we now use to season our food was at one time used to preserve food, before electric refrigeration.]

WILDERNESS VET

SEARCH PARTY [WDV223]

For animals living in the Yukon, there are thousands of square miles to call home. This can pose a serious challenge for Dr. Oakley when she goes out into the field because sometimes, before she can help a creature in need, she has to find them first. First up, Dr. Oakley and her family are heading to a horse ranch to assist in locating a group of missing horses. Dr. Oakley and the team will have to use a combination of all-terrain vehicles and an airplane to try and spot the wayward horses. Once found, Dr. Oakley will need to perform a surgical procedure on one of the horses in order to treat a hernia. Next, Dr. Oakley is on her way to the Alaska Wildlife Conservation Center to perform a check on two black bear residents. Dr. Oakley will have to work on each black bear one at a time, which will soon prove to be difficult, and dangerous. Dr. Oakley and her team struggle to separate the bears safely in the rugged and wooded terrain. After some tense moments, Dr. Oakley and team successfully sedate one of the bears and perform the routine checkup, but the day proved too long for the team, and Dr. Oakley will have to return another time to check on the other black bear.

[Educational Message: Every day offers new challenges. We must always seek to overcome obstacles and challenges in life to grow, learn, and succeed.]

JOURNEY WITH DYLAN DREYER

THE WILDERNESS OF INDIA [JDD223]

Join host Dylan Dreyer on a breathtaking tour of India's Kaziranga National Park. Located in the shadows of the Himalayan Mountains, we'll trek deep into the pristine wilderness of this World Heritage Site to come face-to-face with some of the most extraordinary and endangered mammals on Earth, including elephants, rhinoceros, and tigers. First up, we'll learn that Kaziranga National Park is home to Asia's "Big 5" mammals, all of which are endangered. The "Big 5" consists of the Indian one-horned rhinoceros, the Eastern swamp deer, the Asian elephant, the Bengal tiger, and the wild Asian water buffalo. We'll also learn more about the hard work that goes into keeping the park free of poachers. Here we'll see how the caretakers at the park use a wide network of informants to alert them of poachers and protect the endangered animals from harm. Next, we'll meet an orphaned baby elephant that is being caring for by an animal keeper at a local wildlife rescue center. Here we'll watch as the keeper and his team use unique strategies to attempt to reunite the baby elephant with its herd. Next, we'll meet local residents living on the edge of Kaziranga National Park and learn more about their day-to-day lives and how they live alongside the elephants. Due to the extreme damage that elephants can inflict upon local villages and farms, we'll see how the locals use non-lethal methods in order to scare the elephants away if they ever get too close. We'll also learn more about India and how it is home to more than 1.3 billion people, and that it is also the world's largest producer of many fresh fruits and vegetables, milk, and major spices.

[Educational Message: The Kaziranga National Park is designated as a World Heritage Site by the United Nations, which means the area is recognized as being of profound natural or cultural importance to all humanity. The amazing plants and animals living in this area deserve our respect and protection.]

NATURALLY, DANNY SEO

KITCHEN AND BEAUTY GENIUS [NDS223]

Host Danny Seo discovers new uses for everyday ingredients and uses them to create recipes with a healthy twist and homemade beauty products that are also eco-friendly. First, Danny uses yogurt and honey as a healthy alternative to ice cream to make yogurt bark. A typical serving of yogurt has a few billion "good" bacteria, which can aid in digestion; and when yogurt is frozen, the cultures become dormant, but once ingested, they become active again. Next, Danny introduces an alternative to sports drinks, which can contain up to 34 grams of sugar in one beverage, by using water, lemons, Himalayan pink salt and raw honey. Lemons contain natural electrolytes, which are essential to hydration, regulating the flow of water in and out of cells; and raw honey is filled with plant nutrients that can provide anti-inflammatory benefits. Then, Danny makes a peel-off charcoal mask using egg whites, activated charcoal and gelatin. Egg whites help tighten pores and are high in protein, which absorbs oil; activated charcoal helps detoxify skin and is made from wood, coal or other substances that have been processed at high temperatures. Then, Danny shows how to make an exfoliating soap with reused coffee grounds as well as a homemade makeup remover using two all-natural ingredients, witch hazel and jojoba oil. Witch hazel is a natural astringent derived from the leaves, bark and twigs of the witch hazel plant; and jojoba oil has moisturizing and sun-protecting

effects. Lastly, Danny cooks up fudgy brownies using coconut sugar, cacao powder, and a surprising ingredient, eggplant. Eggplant is part of the Solanaceae family, which includes tomatoes, potatoes and peppers.

[Educational Message: Many household ingredients have multiple purposes. Using your imagination to incorporate usual ingredients in an unusual way can help save money, cut down on waste, and provide a healthy alternative to use in a daily routine.]

THE VOYAGER WITH JOSH GARCIA

TWO TO TANGO [VJG224]

Host Josh Garcia spends the day ashore in Buenos Aires, Argentina exploring the history, culture, and cuisine of Argentina's glamorous capital city. Upon arriving, Josh joins a culinary class, and learns why empanadas come in all different shapes and sizes. An empanada is typically a pastry filled with a variety of meats and vegetables. The slightly sweet empanada dough is known as masa, and the pattern of the dough's fold is called a repulgue. Next, he heads to the countryside and hops into the saddle, where he learns polo, Argentina's most celebrated sport. Although the English brought polo to Argentina, Argentinians have embraced the sport and begin learning how to play at a young age. Mastering balance is an important part of the sport, and it's imperative that a rider keep their balance during a game. In polo, there are three types of swings including the half swing, full swing, and backhand. A polo game consists of four to eight 7-minute periods called chukkas. For his final adventure, Josh steps out of his comfort zone and embraces the country's most iconic dance – the tango! Now hugely popular in Buenos Aires, early tango was known as tango criollo which means "Creole tango." While there are a few basic steps, improvisation is a signature feature of this dance.

[Educational Message: Stepping out of your comfort zone can be an important growing moment for just about everyone. When you step out of your comfort zone, you learn something new and ultimately gain confidence to face new experiences.]

WILDERNESS VET

FIERCE AND FURRIEST [WDV224]

Whether small, medium, or large, there are plenty of fierce creatures to be found in the Yukon. And although Dr. Oakley recognizes some of her patients may be dangerous, that doesn't stop this doctor from doing her job. First up, Dr. Oakley is visiting an exotic wildlife center to check on a jaguar suffering from arthritis. Arthritis is an inflammation of the joint which causes pain and stiffness. To safely examine the jaguar, Dr. Oakley will have to sedate the big cat. The plan for today is to inject plasma into the jaguar's joints, but his old age makes the procedure complicated. After some issues stabilizing the jaguar's blood pressure, Dr. Oakley completes the injection procedure successfully. Over the next few weeks, animal keepers notice an incredible improvement in the jaguar's mobility which greatly increases its quality of life. Next, Dr. Oakley is heading out on an emergency call involving a pet ferret having bladder problems. Dr.

Oakley suspects bladder stones may be causing the issue. Due to the location of the suspected culprit, she'll have to perform a surgical procedure to treat the ferret. Next, Dr. Oakley is heading to the Alaskan Wildlife Center to check in on a lynx with a recurring problem with trembling. Dr. Oakley will need to perform a head-to-toe exam to diagnose the cause of the shaking, so she'll first need to sedate the patient. After a thorough exam, Dr. Oakley notices no obvious physical issues, so she'll have to take a blood sample to test for any other potential causes.

[Educational Message: It's important that we always treat animals with compassion and respect. All life is important, no matter its age or size.]

JOURNEY WITH DYLAN DREYER

ADVENTURES IN ICELAND [JDD224]

Join host Dylan Dreyer on an adventure to the edge of the arctic circle to explore the wonders of Iceland. We'll learn about the first communities who left Europe behind to make this unforgiving land their home. We'll visit new landscapes bubbling, changing and growing before our very eyes, and discover the modern challenges that threaten this ancient island nation. First up, we'll learn how Iceland was first settled in the 9th century by Vikings from Norway. The area was soon after settled by Celtic monks and Scots, who arrived from old Europe in the 10th century to create a new way of life and a new form of government. Fast forward a thousand years later, we'll learn how Iceland became the first country to elect a female head of state in 1980. Next, we'll discover how there are two elements that have always characterized Iceland's landscape, fire and ice. We'll learn that huge volcanic eruptions frequently occur underground, and how most of Iceland runs on renewable energy such as geothermal and hydroelectric power. From a geological perspective, Iceland, at just 10-15 million years of age, is one of the youngest regions on Earth. Next, we'll learn how Iceland is home to more than 800 hot springs and how these natural bath tubs are found all over the island. Next, we'll learn about some of the modern challenges facing Iceland. Despite generally having an ecological approach, Iceland is more wasteful than almost every other country on Earth. Per capita, only the U.S. consumes more electricity and owns more cars than Iceland. Finally, we'll learn that for decades, Iceland's economy has relied on fish export. In recent years, however, tourism has overtaken it as the most important export industry as Iceland receives over 1 million visitors every year.

[Educational Message: Even at 15 million years old, the island of Iceland is still changing and growing. As more people visit the nation and the economy continues to shift, the future looks bright. The people of Iceland will find a way to survive here for generations to come.]

NATURALLY, DANNY SEO

GREEN LIVING [NDS224]

Host Danny Seo meets entrepreneurs who are so passionate about green living that they've turned that obsession into their occupation. First, Danny visits a non-profit in Los Angeles that uses food that has been thrown out for cosmetic reasons to make meals for the less fortunate— in the U.S. alone, three million tons of “ugly” produce reportedly goes to waste each year. Next, Danny meets a couple who founded a non-

profit that takes vacant lots and turns them into mini farms that benefit the community. They teach Danny how to make a pallet garden to save space; a pallet is a wooden platform designed to hold and carry heavy loads. Then, Danny travels to Brooklyn, New York to visit with entrepreneurs practicing urban farming by building indoor vertical farms in steel shipping containers. Specialized growing equipment and careful climate control enable container farms to produce crops year-round. Whereas outdoor farms rely on natural white light, urban farmers use colored LED lighting—blue light prompts vegetative growth while red light results in flowering. Lastly, Danny travels to Maine to meet a farmer turned high school teacher who decided to start making his own tofu when he couldn't find any locally. Tofu is an excellent source of calcium and iron, and the texture of tofu is determined by its liquid content—the more liquid, the softer the tofu.

[Educational Message: Being passionate about something is the first step to success. Always try to see the potential in something, whether it be a space, an idea, yourself, or others. Turning an empty space into a community garden is a great way to save money, help others, and turn something overlooked into something beneficial.]

THE VOYAGER WITH JOSH GARCIA

FLAVOR OF THAILAND [VJG225]

Host Josh Garcia sails into Thailand's capital city and explores the rich culture of Bangkok, Thailand. Built on the city's famous canals, the magical floating market offers Josh an array of exotic produce and a glimpse into its local history. A floating market is a market where goods are sold from boats. Josh takes a bite out of a mangosteen, the national fruit of Thailand. Next, he takes cooking class and learns the art of balancing the signature flavors of the country's iconic dish, pad thai. Pad thai is a sweet and salty noodle dish made from rice noodles, tofu, shallots, radishes, fried shrimp, peanuts, and eggs. Most Thai dishes have a combination of the classic five seasonings, star anise, cloves, Chinese cinnamon, Sichuan pepper, and fennel seeds. Finally, he visits an ancient village where generations of craftsmen are keeping a lost tradition alive. The Baan Bat community, also known as Monk Bowl Village, produces traditional monk bowls, originally used by Buddhist monks. This craft has been passed down through generations, and they are made from stainless steel by hand.

[Educational Message: Mixing different flavor palates in one dish is more common than you might think. Sweet, salty, spicy, and aromatic flavors come in many forms, but across cultures many classic dishes are a combination of these very different flavors.]

WILDERNESS VET

SECOND CHANCES [WDV225]

Dr. Oakley's job has plenty of ups and downs. While some clients require only simple care, others can be in dire straits. But losing hope isn't something Dr. Oakley knows how to do, because saving her patients and giving them new life is the ultimate reward. First up, Dr. Oakley is on her way to an emergency call at the Alaska Wildlife Center where a moose calf is suffering from a serious case of bloat; gastric bloat is when

the stomach fills with gas. Dr. Oakley will have to perform an exam on the moose calf to better understand the source of the problem. After an attempt to insert a tube into the calf to relieve the gas pressure fails, Dr. Oakley utilizes a probiotic drink. Probiotics are microorganisms of bacteria that provide health benefits when consumed. After 24 hours, the moose calf's condition has not improved. Now, Dr. Oakley will sedate the calf and insert a tube down its throat to release the built-up gas. Thankfully, the procedure proves successful and the moose calf is on the road to recovery. Next, Dr. Oakley and her daughter Maya are on their way to perform a follow-up exam on a puppy with a leg issue. The puppy was injured in a previous car accident and Dr. Oakley believes there is nerve damage in the leg causing the issue. Due to the permanent nerve damage, Dr. Oakley will unfortunately have to amputate the dog's leg.

[Educational Message: We are constantly faced with new circumstances and challenges in life. We must learn to do our best to adapt and improvise.]

Duration: 30:00

**JOURNEY WITH DYLAN DREYER
AROUND THE WORLD [JDD225]**

Join host Dylan Dreyer on an epic journey across the globe to experience natural wonders of the world. We'll begin on the ancient Galapagos Islands and come face-to-face with the only lizards who swim in the ocean. We'll travel to remote islands off the coast of Mexico, and explore the wild lands of western Europe. First up, we'll journey to the Galapagos Islands to learn more about the land iguanas that washed up on shore around the same time the islands were formed. Some iguanas went inland, and others adapted to life on shore. We'll learn that what makes the Galapagos marine iguana truly unique is that it's the world's only seagoing lizard. Next, we'll travel to the Sea of Cortez, which is located between the Baja California peninsula and the Mexican mainland. Here we'll learn more about the mighty cardon, a species of cactus that can live for hundreds of years and grow as tall as sixty feet. We'll discover more about the cardon's symbiotic relationship with native pallid bats and how both organisms depend on each other for survival. Next, we'll meet the dolphins that inhabit the Sea of Cortez and learn how they prefer more shallow, coastal waters in order to find food. We'll also discover that the closest living land-relative to dolphins is the hippopotamus. Next, we'll journey on an exploration of one of the oldest and most beautiful cities in Germany: Cologne. We'll learn more about the native bird species of Cologne such as the mighty swan and we'll also learn about the non-native species. Non-native birds like the Egyptian goose or parakeet established themselves in Cologne after their ancestors escaped from local zoos. Finally, we'll discover more about the world's largest fish, the whale shark. We'll learn that the whale shark can average thirty feet in length, weigh as much as 20,000 pounds, and lives up to 70 years of age.

[Educational Message: From the Galapagos Islands, to the rivers of Europe, to the deserts of Central America, our world is filled with amazing species that deserve our protection. Our world is a beautiful place and we should strive to keep it that way.]

Airdate: 9/15/2018

Time:

Duration: 30:00

**NATURALLY, DANNY SEO
SPILLING THE BEANS [NDS217]**

Host Danny Seo travels to a factory in Indiana to learn how beans, which are a good source of iron and potassium, are produced. The process consists of soaking the beans for 18 to 22 hours; removing water by centrifugal force, which is the action of drawing a rotating body away from the center of rotation; steam blanching to remove oxygen; seasoning and canning. On average, Americans consume about 7.5 pounds of beans each year. Next, Danny makes different types of hummus using exotic ingredients, such as za'atar and preserved lemons. The word hummus means chickpeas in Arabic, and chickpeas are an excellent source of fiber, protein, iron and zinc. Za'atar is a Middle Eastern spice blend that was used for medicinal purposes in the 12th century and can be traced back to biblical times. Preserved lemons, a Moroccan staple, have a silky texture and a mellow, citrus flavor. Then, Danny turns rocks found in the yard into marbled works of art using paint and glaze, which is a binding solution that gives decorative finishes depth and dimension. Marbleizing, originally called "ebru" or "cloud art," began in Persia, India and Turkey in the 15th century.

[Educational Message: A nutritious food starts with the soil in which it is grown--providing nutrients like nitrogen and potassium instead of synthetic fertilizer helps ensure healthy produce. Beans contain nutrients such as iron, potassium, magnesium, folic acid and zinc. Adding an exotic ingredient to a seemingly plain recipe or applying an ancient technique to decorate a seemingly plain object is a great way to show creativity and gain insight into a different culture.]

THE VOYAGER WITH JOSH GARCIA

EUROPEAN WONDERS [VJG226]

Host Josh Garcia rereads some of his favorite journal entries from his spectacular voyages in Europe. His adventure begins on the Spanish island of Mallorca, where Josh takes a scenic ride through the countryside on a one-of-a-kind wooden train built over a century ago. The Soller Train has been in service since 1912 and at one time was used to transport goods and passengers from Soller to Palma. It's a narrow gauge train, which refers to the width of the track being 3 feet compared to the standard 4.5 feet. In Athens, Greece, Josh travels to the countryside and teams up with a local chef to make a signature Greek dish using vegetables from the land. Moussaka is an eggplant dish that originated in the Middle East, and is popular in Greek cuisine. Mezze are small dishes in Greek cuisine that are meant to be shared by a group, including dishes like tzatziki, hummus, and eggplant salad. Finally, in Lisbon, Portugal, at a traditional artisan workshop, Josh learns the ancient art of handcrafting Lisbon's iconic, decorative tiles. He sees firsthand how these tiles, locally known as *azulejo*, are made using techniques dating back to the 18th century. *Azulejo* comes from an Arabic word meaning "polished stone."

[Educational Message: Planning a trip that spans multiple destinations can be an opportunity to take note of the differences and similarities in geography and culture. You might be surprised to learn that some traditions appear in different cultures in new and unique ways.]

Time:

Duration: 30:00

WILDERNESS VET

A NEW CHAPTER [WDV226]

Every year Dr. Oakley's job offers new clients, challenges, and opportunities. But with her oldest daughter graduating from school, Dr. Oakley must face a new chapter in her job as a parent. First up, a bald eagle

with a potentially broken wing is brought into Dr. Oakley's clinic. The team will have to work carefully to avoid the raptor's strong beak and talons. Dr. Oakley examines the wing and discovers swelling between the bird's radius and ulna bones. Dr. Oakley stabilizes the wing and provides an anti-inflammatory to reduce the swelling. Next, Dr. Oakley is joining a special government project to help with a feral horse problem along a busy highway. To manage the wild populations, the government grants permission for residents to bring horses home, which clears the roadways and keeps horses and drivers safe. These wild horses will prove difficult to catch, so Dr. Oakley and her team will need to utilize a helicopter to track, capture, and relocate the animals safely. Next, Dr. Oakley is visiting a caribou at the Yukon Wildlife Preserve suffering from recurring growths on its face. Today's goal is to remove as much of the growths as possible. Finally, Dr. Oakley and family attend Sierra's graduation from high school, which proves to be an emotional day for the Oakley family.

[Educational Message: You are never too young or too old to follow your dreams. Dedication and hard work can help you achieve your passions and goals.]

Duration: 30:00

JOURNEY WITH DYLAN DREYER

ADAPT AND SURVIVE [JDD226]

Join host Dylan Dreyer for an up-close look at how some of our planet's most amazing species adapt and survive. We'll explore dark caves full of bats in the jungles of Thailand, meet a pack of wolves in the wilderness of Canada, and come face-to-face with Alligators in the swamps of Georgia. First up, we'll learn more about the Okefenokee Swamp in Georgia, and how this corner of the Earth is home to the largest most ecologically diverse wetland ecosystems on the planet. The Okefenokee Swamp is brimming with wildlife and is home to over 60 species of reptiles and at least 200 species of birds. Next, we'll meet the American Alligator, one of the oldest and most dominant predators to have ever lived. We'll learn how alligators and dinosaurs both shared common ancestors more than 220 million years ago. We'll also discover how alligators are highly sophisticated and very complex animals that are superbly adapted for their life as apex predators in wetland ecosystems. Next, we'll journey to the mountains of Yellowstone, where we'll follow a mother grey wolf that has just given birth to a litter of pups. Here we'll learn how the entire wolf pack helps with the feeding, protection, training and socialization of the pups. Next, we'll travel to the volcanic island of New-Britain off the coast of Papua New Guinea. Here we'll meet a strange prehistoric bird called a megapode, which buries its eggs in warm volcanic ash to incubate its chicks. Finally, we'll journey through Thailand's breathtaking Khao Sok National Park. Here we'll witness an incredible and dangerous treasure hunt that takes place high up the park's limestone rocks and deep within a cave. The treasure the locals are seeking is the edible Swiftlet nest. In China, these nests are a delicious delicacy and fetch a high market price. Here we learn how the Swiftlet birds construct these intricate nests from their own saliva.

[Educational Message: Nature can be unforgiving; we must always appreciate its beauty and power. We need to learn to adapt to changes in our world in order to survive.]

Airdate: 9/22/2018

Time:

NATURALLY, DANNY SEO

DON'T BUY IT, DIY IT [NDS226]

Host Danny Seo shares creative ways to upcycle something ordinary into something unique to repurpose something old instead of throwing it away. First, Danny turns rocks found in the yard into marbled works of art using paint and glaze, which is a binding solution that gives decorative finishes depth and dimension. Marbleizing, originally called “ebru” or “cloud art,” began in Persia, India and Turkey in the 15th century. Next, Danny creates stickers using leaves found outside to create a mandala. Early forms of stickers can be traced back to ancient Egyptians; and the word “mandala” is Sanskrit for “circle” and is one of the most ancient art forms. Then, Danny teaches a scientific way to repurpose nail polish by adding a few drops to hot water and dipping items on the surface to create colorful, marbled accessories. Nail polish contains a petroleum-based solvent, like oil, which is lighter than water; it will adhere to non-porous surfaces like porcelain, glass and metal. Lastly, Danny shows how to reuse dated items, such as a keyboard and old DVDs and CDs, to create unique pieces. Old computer keys can be removed and used to personalize journals, make gift tags and create art; and old DVDs and CDs can be broken into small pieces, then glued in different patterns to create a mosaic. The earliest known examples of mosaics were found in Ubaid, Mesopotamia, dating back to the 3rd millennium B.C.

[Educational Message: Before throwing something away, consider ways it can be reused. Using your imagination to make arts and crafts with items found in your yard, such as leaves, is a great way to express yourself and explore different forms of art. Applying an ancient technique to decorate a seemingly plain object is a great way to show creativity and gain insight into a different culture. Just because something is out of date, doesn’t mean it has no purpose— get creative and find a way to upcycle it.]

THE VOYAGER WITH JOSH GARCIA

VINTAGE HAVANA [VJG207]

Host Josh Garcia docks in Havana, Cuba, where he gets in touch with his Cuban ancestry. One of the most recognizable symbols of Cuba is the classic car and Josh takes a spin along the waterfront in one of these vintage American cars. He learns how these Motor City classics became synonymous with Cuban culture. Next, he visits a grand restaurant inside a private home and meets with a local restaurateur to get reacquainted with Cuban cuisine. He sinks his teeth into the country’s national dish, Ropa Vieja, a beef and sofrito dish that originated in Spain. Sofrito is a richly flavored blend of herbs, spices, and finely chopped vegetables that serves as a base for many Latin dishes. Finally, Josh rubs elbows with Havana’s movers and shakers, and gets a master class in a celebrated dance style. Cuban Salsa, or Rueda de Casino, became popular in Miami in the late 1980s. In this style of dance, the dance takes you full circle as you trade partners to make your way around a circle of other dancers. Josh learns the basics of Cuban Salsa and starts to feel the rhythm in his feet with practice and the help of some new friends.

[Educational Message: Connecting with your family’s ancestry through cultural pastimes can provide a window into the past. Some pastimes like dance can transcend time and learning traditional dances can be fun and enjoyed across generations.]

ONE TOUGH DOCTOR [WDV201]

For Dr. Oakley a hectic schedule is a regular part of the job, but this week is sure to push her to her limits. When her daughter applies to an out-of-town school, Dr. Oakley must find a way cope with her changing family while still caring for her many patients. First, Dr. Oakley visits a herd of thinhorn sheep in need of identification ear-tags. Here we learn more about the agile and sure-footed nature of the thinhorn sheep species. Next, Dr. Oakley visits a very large and ailing potbellied pig. After a quick hoof trimming and checkup, Adventure Pig is now on the mend. Next, Dr. Oakley visits Patches, a dog with an extremely aggressive skin infection on his paws. Dr. Oakley suspects Patches is suffering from an autoimmune disorder. Here we learn about how there are many different types of autoimmune disorders, and how they are often difficult to treat. Dr. Oakley prescribes a series of antibiotics and steroids that soon lead to a full recovery for Patches. Finally, Dr. Oakley finds out that her daughter, Maya, is accepted to an out-of-town music, arts, and drama summer program. Dr. Oakley and Maya share a special moment together as her mother tells her the exciting news.

[Educational Message: When the going gets tough, the tough get going. When we are faced with adversity, we must always stay focused on our goals and push ourselves to overcome any obstacle.]

JOURNEY WITH DYLAN DREYER

FLIGHT OF THE BUTTERFLIES [JDD201]

Join host Dylan Dreyer on an epic natural history detective story. We'll follow Dr. Fred Urquhart over his 40-year career as he works to discover the secrets of monarch butterflies-- and reveal the most incredible animal migration on Earth. From the forests of central Mexico to the mountains of Canada, this is an experience like you've never seen before. First, we'll learn how Dr. Urquhart's fascination with monarch butterflies soon lead to an incredible group effort to discover more about the species and its migration patterns. Next, we'll take a closer look at the monarch butterfly species and learn about the stages of metamorphosis that occur throughout its lifespan. Then, we'll learn how Dr. Urquhart and his team came up with a clever solution to use grocery store stickers as identification tags for monarch butterflies. Word quickly spread about this experiment and many others across the United States soon joined the effort to tag monarch butterflies. Finally, Dr. Urquhart travels to central Mexico where he discovers indisputable evidence of the monarch butterflies' incredible journey. Their lifelong experiment revealed a monarch migration that covers over 4,800 miles from start to finish.

[Educational Message: Teamwork is necessary for great achievement. When we work together as one, we can accomplish almost any task.]

NATURALLY, DANNY SEO

HOME HACKS [NDS225]

Host Danny Seo explores simple, creative solutions to household problems that can also help save money. First, Danny shares how to upcycle old sponges by turning them into ice packs using a zip-lock bag, water and rubbing alcohol. Rubbing alcohol prevents the water from freezing completely; while water freezes at 32 degrees, rubbing alcohol freezes around -128 degrees. Next, Danny explains the benefits of reusing old aquarium water to hydrate plants. The water has nutrients from old fish food as well as fish waste and beneficial bacteria that can help plants thrive. Some nutrients found in used aquarium water include phosphorus, nitrogen, potassium and iron. Then, Danny teaches the appropriate way to recycle scrap metal and how to determine if a metal is ferrous or non-ferrous. Ferrous metals contain iron and non-ferrous metals contain little to no iron. Then, Danny explains which font types are the most ink efficient—printing 25 pages a week using Times New Roman instead of Arial could save nearly \$20 each year. Lastly, Danny shares helpful tips to prevent unwanted encounters with wildlife. Apple cider vinegar and peppermint oil work as natural animal deterrents because their strong scents can irritate the sensitive nose of an animal. Sticking tape or hole protectors to windows will help prevent birds from flying into them; most birds will avoid glass with a vertical stripe pattern spaced 4 inches apart.

[Educational Message: Many household ingredients have multiple purposes. Finding a way to reuse or recycle something instead of throwing it away prevents waste from going to landfills, which is good for the environment and can also help save money. Some habits may be more wasteful or harmful than we realize, and making a small change can often add up to big benefits for the environment.]

NBC NETWORK NON-BROADCAST EFFORTS**July - September, 2018****NBCUniversal's *The More You Know* website:**

Since 1989, *The More You Know* has brought the nation's most important social issues to the forefront, and remains a trusted voice for sharing knowledge to improve lives and inspire action. *The More You Know's* comprehensive website (themoreyouknow.com) includes in-depth resource and referral information on the campaign's important focus issues including:

- HEALTH – fighting childhood obesity, encouraging nutrition and physical fitness
- ENVIRONMENT – encouraging everyday actions that reduce environmental impact
- EDUCATION – recruiting new teachers and promoting their long-lasting impact
- DIGITAL LITERACY & INTERNET SAFETY - sharing online safety tips and information
- DIVERSITY – embracing differences and promoting inclusion, tolerance and respect

Also featured on site is The More You Know Learning series' *Growing Up Online*, a free eBook on digital literacy and Internet Safety. *Growing Up Online* is an important tool to initiate conversation with children about online safety. The eBook is a media-rich, two-part learning resource that provides easy-to-use information about navigating the digital world in a unique and engaging way. Part one includes safety tips, discussion questions and key takeaways for parents and teachers. Part two features four entertaining video comic books for children, focused on real situations that come up when kids go online.

Additional content on the site includes public service announcements, behind-the-scenes videos, a general overview, a talent directory, and a list of the campaign's accolades such as the prestigious Emmy and Peabody awards.

CERTIFICATION OF COMPLIANCE WITH
CLOSED CAPTIONING REQUIREMENTS FROM
JULY 1, 2018 THROUGH SEPTEMBER 30, 2018**

I, Jean Dietze, President, Affiliate Relations, NBC Television Network, a division of NBCUniversal Media LLC, (the “Network”), hereby certify that, during the above-titled calendar quarter, all programming transmitted by the Network pursuant to the Network’s affiliation agreement complied with the rules and policies relating to closed captioning of the Federal Communications Commission (47 C.F.R. §79.1, et al).

Date: OCTOBER 1, 2018

Teen Kids News

Emmy Award Winning TV Show

Now in our 15th season, this groundbreaking program airs weekly on more than 150 TV stations nationwide; carried by education channels reaching 10,000 schools; and available to all US Military families around the world via the American Forces Network.

Programming for the young generation requires a special skill set. Teens have notoriously short attention spans. Younger kids can't be expected to grasp concepts if the explanations aren't age-appropriate. Communicating with millennials is in our DNA ;)

"Teen/Kids News is a fast-paced program in the 13-16 year old FCC Children's Programming category composed of shorter segments that "fit" the visual learning style of today's students..."

National Governor's Association & the Council of Chief State Officers

"Brilliance. Absolute brilliance. A televised version of a school newspaper. What great TV."
Dave Ornauer, Stars & Stripes

"In my 21 years as a Program Director in educational television, I have rarely seen a series as educational, entertaining and accessible as Teen/Kids News."

Lucy Griggs, Program Director, The Education Channel

Teen Kids News – FCC Credentials

Teen Kids News meets FCC requirements for “core children's programming” by providing educational features such as, “**Flag Facts**” (info on our state flags); “**College and You**” (tips for choosing and getting into college), “**Word**” (vocabulary skills training), as well as informational features for teens, such as reports about healthy eating; driving tips for new drivers, and internet predators. The show has been designed to meet needs of children and young adolescents with a unique curiosity about their world. The Program stimulates the 13-16 year olds' curiosity, develops their learning and cognitive, listening and thinking skills, and serves as an enhancement of their academic and educational experience.

More than 10,000 schools are using TKN as part of their school curriculum and affiliate stations have already contacted school systems in that regard. The full scripts are available to provide easy access for teachers to use in their classrooms.

Advocacy group Children Now says broadcasters follow letter, not spirit of FCC's educational/informational standards.

By John Eggerton -- Broadcasting & Cable, 11/12/2008

Advocacy group Children Now says that only one in eight kids TV shows offered up by broadcasters as meeting the educational/informational (E/I) requirements of the FCC meet “high quality” standards for educational shows, and it wants the FCC to make its educational guidelines stronger and clearer.

It also wants the commission to monitor compliance and respond “quickly” to public complaints (like those filed by Children Now). The group called on broadcasters to improve the quality and availability of kids shows, including applying the six key criteria to their offerings (see below). It also asked parents to become more involved in their kids' TV watching and to complain if they think an E/I-certified show is not sufficiently E/I.

Children Now concedes that broadcasters are meeting “the letter” of the law, airing three hours of E/I programming, and even applauds them for it. But the group asks whether “their efforts truly live up to the spirit” of the Children's Television Act and its children's programming requirements, overseen by the Federal Communications Commission.

The FCC essentially allows broadcasters to self-certify that their E/I programs meet FCC requirements, including that the shows have education as “a significant purpose,” that they are at least a half hour, that they air between 7 a.m. and 10 p.m. and that they air weekly.

That has produced some questionable, even embarrassing calls, like billing *The Flintstones* as a history lesson or a baseball pre-game show as educational because it teaches how to throw a curve ball.

TV stations are required to air at least three hours a week of educational/informational programming and to identify the shows to the FCC and in their public files.

The report, which is scheduled to be unveiled at a press conference in Washington Wednesday, at which FCC Commissioner Jonathan Adelstein is scheduled to speak, looks at the "quality" of the shows offered up as educational, something the FCC reporting requirement does not address.

Children Now says it measured the shows according to six criteria:

1. clarity, meaning how explicitly is the educational element presented
2. integration, or how often the lesson is repeated
3. involvement, which means how engaging is the educational element
4. applicability, or how the lesson is connected to the real world
5. importance, meaning not how important to the story but how important is the lesson to children's development
6. positive reinforcement, or to what degree is learning rewarded.

Each show--120 episodes from 24 "representative markets" were analyzed--was given a up to three points in each category, with an 0-6 score labeled "minimally educational," a 7-10 score deemed moderately educational, and an 11 or 12 score considered highly educational. Media researchers Dale Kunkel of the University of Arizona and Kristin Drogos of the University of Illinois did the analysis.

By that measure, only 12 shows got the highest score, while 21 were minimally educational, with the rest getting the lowest score. Children Now also says most broadcasters are only doing the minimum three hours (59%).

Kunkel is a familiar figure to broadcasters. He is a long-time critic of broadcasters' children's programming and has testified numerous times about the need for more educational "educational" children's shows.

One station singled out with high marks was Raycom's MyNetworkTV affiliate in Honolulu, KFVE, which airs 5.5 hours per week, with shows like *Where on Earth is Carmen Sandiego* and *Beakman's World*, and programming every day but Sunday.

The eight shows that were determined to be of the highest educational content were evenly divided among commercial and noncommercial shows with four apiece: *Sesame Street*, *Between the Lions*, *Cyberchase*, and *Fetch! With Ruff Ruffman* (PBS) and *Beakman's World*, *3-2-1 Penguins*, *The Suite Life of Zack and Cody*, and ***Teen Kids News***.

Dear Station,

Pursuant to the Children's Television Act of 1990, "BIZ KID\$" will satisfy the FCC Children's programming requirement and can be classified as either core or non-core programming. "BIZ KID\$" serves the educational and informational needs of children 13 to 16 years of age with its program content, including the importance of understanding the economy and basic business principles. The series features teens starting their own businesses, actively solving problems and developing important life skills.

"BIZ KID\$" as delivered is formatted to allow for no more than 14 minutes of total commercial time per broadcast hour (7 minutes per half-hour). "BIZ KID\$" does not display any Internet web site address or host selling during or adjacent to the program, and is otherwise in compliance with Sections 73.670(a) through (d) of the Commission's Rules.

To facilitate your FCC filings, episode synopses are available on line at our website, www.telcoproductions.com. Also available on-line are testimonials from our educational advisory review board, consisting of educators and other professionals who have reviewed the series (see the following letters for details).

If you have any other questions, please don't hesitate to contact us.

Sincerely,

A handwritten signature in cursive script that reads "Alex Paen".

November 18, 2012

Alex Paen
Telco Productions, Inc
2730 Wilshire Boulevard, Ste 200
Santa Monica, CA 90403

Dear Mr. Paen,

I have reviewed and designed curriculum for the series "BizKid\$," and find the financial and entrepreneurial content of the show to be of very high quality, and of high educational value. I have extensive experience in the fields of finance and financial education, including designing my own curriculum and working with PBS on lesson plans that correspond with programming, and on original financial programming. The BizKid\$ series does an excellent job of providing engaging content for teen viewers that also meets the most highly regarded educational standards. The series does a comprehensive job of explaining financial and entrepreneurial concepts thoroughly, but in a language that a teen audience could easily understand and retain. Specifically, the 13-15 age group is sophisticated enough to understand the concepts, but also young enough to enjoy the engaging humor and pop cultural references on the show.

I have a great appreciation for the approach the series has taken to a range of topics from credit to saving to foreign exchange to entrepreneurship. This is a very wide range of topics, with a varying level of difficulty of comprehension. However the BizKid\$ series approaches all content very creatively, in a way that both engages viewers and educates them.

The BizKid\$ series plays a very important role in teaching financial and entrepreneurship education to teenagers. While it is clear that financial literacy is a critical need in any society, most schools do not have the resources to provide any kind of comprehensive financial education. The BizKid\$ series fills an educational void in the U.S. education system, and keeps its viewers interested and engaged while educating them.

All the best,

Melissa Donohue, Ed.D.

Alex Paen
Telco Productions, Inc.
2730 Wilshire Boulevard, Suite 200
Santa Monica, Ca 90403

Dear Mr. Paen,

I teach a Family and Consumer Science course in a large and diverse middle school in suburban Chicago, Illinois, and I believe BizKid\$ appeals to a wide audience and seeks to communicate somewhat advanced concepts in the field of financial literacy in a manner, not only for young teens, but even for my middle school students in the 6th grade that they can understand and relate to.

The wide variety of topics covered on Bizkid\$ allows educators to target specific needs and use the episodes as a springboard to deeper understanding of crucial financial lessons that are too often left out of today's school curriculum. As a Career and Technical Education educator, I appreciate the tremendous value of presenting concepts such as the value of money, interest, credit, and entrepreneurship in a visual media that is engaging and leaves a lasting impression on students, and that is what BizKid\$ delivers best. With many states moving to common core standards and incorporating financial literacy within those standards, BizKid\$ is well positioned to be a valuable programming asset to any television station in America and I believe the series fulfills the FCC requirement for stations to provide an educational and informational show for children aged 13-16 years of age.

Sincerely,

Thomas Kidwell

Thomas Kidwell

Dear Alex,

After reviewing several episodes of "Biz Kid\$," I find this exceptional program a "must-see" television experience for all children, especially targeting 13 to 16-year-olds. I believe the program's content meets the FCC's educational and informational requirements for its Children's Programming E/I Act. The series offers teenage viewers practical advice and information on a wide variety of financial, business and monetary topics. The episodes include teens starting their own businesses, showing how to properly manage money, creating budgets and financial goals—all important steps in learning to become responsible adults and citizens. I highly recommend "Biz Kids\$" to television stations who want to enhance the quality of their programming.

Sincerely,

A handwritten signature in cursive script, appearing to read "Brian A. Peña".

Dear Station,

Pursuant to the Children's Television Act of 1990 and the rules and regulations of the FCC, "ANIMAL RESCUE HEROES" satisfies the FCC's Children's programming requirements and may be classified as Core Programming as defined under Section 73.671 of the Commission's Rules. "ANIMAL RESCUE HEROES" furthers the educational and informational needs of children 13 to 16 years of age with its programming content, including safety tips and information about various animals and their habitats.

"ANIMAL RESCUE HEROES" as delivered is formatted to allow for no more than 14 minutes of total commercial time per broadcast hour (7 minutes per half-hour). "ANIMAL RESCUE HEROES" does not display any Internet commercial web site address or host selling during or adjacent to the program, and is otherwise in compliance with Sections 73.670(a) through (d) of the Commission's Rules. If you have any other questions or comments, please feel free to contact us.

Sincerely,

Alex Paen
President, Telco Productions

Alex Paen
Telco Productions, Inc.
2730 Wilshire Blvd., Suite 200
Santa Monica, CA 90403

Dear Alex,

I have reviewed several episodes of the program "ANIMAL RESCUE HEROES" and I am confident that the series meets the educational and informational needs of children 13 to 16 years of age with its program content. The series features real life in-the-field experiences of professional and ordinary people taking care of, treating and helping various animals, as well as exhibiting good social responsibility and promoting strong personal and community values. Episodes also include visits to all types of animal sanctuaries and zoos in the United States to explore the world of animals. Teenage viewers learn about the care and living habitats of these various animals and how they survive in the world.

"ANIMAL RESCUE HEROES" is educational, informative and entertaining, while providing information on the humanitarian efforts of dedicated individuals helping the various critters in the animal kingdom.

Sincerely,

A handwritten signature in cursive script, appearing to read "Brian A. Peña".

Dear Station,

Pursuant to the Children's Television Act of 1990, "Dog Tales" will satisfy the FCC Children's programming requirement and can be classified as either core or non-core programming. "Dog Tales" serves the educational and informational needs of children 13-16 years of age with its program content, including dog safety and care tips, as well as lessons on the responsibility of owning a dog. The show also provides informative segments on various dog breeds and showcases various veterinary experts explaining different issues affecting canines. The weekly series also includes recommended reading lists about dogs, and promotes children's writing and creative skills with essay and art contests.

To facilitate your FCC filings, episode synopses are available on line at our website, www.telcoproductions.com. Also available on-line are testimonials from our educational advisory review board, consisting of educators and veterinary professionals who have reviewed the program (see our website for details).

If you have any other questions, please don't hesitate to contact us.

DOG TALES

“Dog Tales” is a weekly half-hour educational/informational series showcasing all aspects of the canine world. The series, which is appropriate for family viewing and children ages 13-16 in particular, offering useful information on all kinds of dogs and the people who love them. The program also instructs young viewers on the proper care of pets and provides safety, health and training tips that are useful for all kinds of dogs. In addition to showcasing skilled and compassionate individuals helping dogs and dogs assisting people, the program emphasizes responsible pet ownership, compassion for all living creatures and promotes strong personal and community values, all in a manner that is as entertaining as it is informative. “Dog Tales” is closed-captioned for the hearing impaired and displays the “E/I” icon throughout the broadcast.

International Fund for Animal Welfare

FREDERICK M. O'REGAN, PRESIDENT

Dear Alex,

We at IFAW (International Fund for Animal Welfare – www.ifaw.org) believe the educational and informative content of “Dog Tales” is suitable for children 13-16 years of age. The show highlights the compassionate care of dogs while informing young viewers about the responsibilities of dog ownership.

We also feel the show provides guidance to young people in encouraging them to become involved in animal welfare. The show contains examples of various programs administered by professional animal workers as well as volunteers helping dogs. “Dog Tales” also includes various interactions of individuals and families with dogs and how these relationships foster a better understanding of our world today.

IFAW supports “Dog Tales” as a wonderful example of what young viewers should be watching on television and we highly recommend it to parents and educators as well.

Sincerely,

A handwritten signature in cursive script that reads "Nancy Barr". The ink is dark and the signature is fluid and personal.

Dear Alex,

It's my opinion that "Dog Tales" is a valuable educational and instructional television series for children 13 to 16 years of age. The program contains information on medical and health issues for dogs, as well as providing facts and histories of various dog breeds. As a teacher, lecturer and Doctor of Veterinary Medicine, I feel "Dog Tales" educates children about all types of dogs and showcases professional and non-professional people helping and caring for dogs as well as learning the responsibilities of dog ownership. By promoting compassionate behavior towards dogs, the show provides young viewers with a positive message about "man's best friend" and how they are a major part of our world.

As an Adjunct Professor at Western University School of Veterinary Medicine, a lecturer at UCLA Extension and a practicing veterinarian, I would recommend "Dog Tales" to parents, educators and broadcasters as an excellent example of informational programming serving families and especially young viewers.

Sincerely,

A handwritten signature in black ink, appearing to read 'Frank Lavac'. The signature is fluid and cursive, with a long horizontal stroke extending to the right.

E/I Program Descriptions

Dogs with Jobs: Each half-hour episode consists of two to three segments on individual dogs from around the world. The family-friendly series has featured service dogs, search and rescue dogs, police dogs, herding dogs, and others. Segments show footage of dogs on the job, and also include stories of their rescue, training, and relationships with their owners and handlers.

Whaddyado: Each episode is an educational life-lesson, based in reality, intended to prepare young people for potential situations that could easily crop up at any time, anywhere. Using a combination of actual dramatic footage, re-enactments, and demonstrations, "WHADDYADO" provides a compelling look at perilous situations that have occurred in real life. Then, using interviews with the participants, and instructions from experts, we learn what the proper reaction should be when faced with similar life-threatening circumstances

FCC OBJECTIVE LETTER

TO: NETWORK
FROM: STEVE ROTFELD PRODUCTIONS
DATE: JANUARY 2018
RE: **“WHADDYADO” - FCC OBJECTIVE LETTER**

“WHADDYADO” (What Do You Do) is a half-hour weekly educational series designed to inform, educate, inspire and entertain children 16 & under (**specific target audience is 13–16**) about the world around them. Each episode is an educational life-lesson, based in reality, intended to prepare young people for potential situations that could easily crop up at any time, anywhere.

Using a combination of actual dramatic footage, re-enactments, and demonstrations, **“WHADDYADO”** provides a compelling look at perilous situations that have occurred in real life. Then, using interviews with the participants, and instructions from experts, we learn what the proper reaction should be when faced with similar life-threatening circumstances. Also, in an effort to help young people make the *right* decision at the *right* time many episodes will feature a Moral Dilemma segment.

We provide a written synopsis of each episode for your FCC Children’s Television Report., each episode is close-captioned and E/I inscribed throughout.

If you need additional information, please feel free to contact us.

Sincerely,

Steve Rotfeld

Series Review
Program: WHADDYADO
Episodes reviewed: #7, #15

WHADDYADO, a half-hour weekly series designed to educate, inform, inspire and entertain, does an exceptional job educating teenagers. The show's target audience is between 13 and 16 years of age, the time period when children are making the transition to becoming adults. Both theory and research demonstrate that this is the stage of life where children begin to experiment with who they are who they want to be. It's a time which is typified by feeling invincible. This sense of invulnerability is commonly coupled with withdraw from parents and authority figures which leaves teenagers susceptible to poor decision making. Therefore, this time where insight and judgment are developing, but adult influence is limited, educational programming can make an immense impact on a child's decisions. WHADDYADO provides an excellent opportunity for teenagers to learn life lessons they likely are otherwise not open to receiving.

What makes WHADDYADO such a valuable resource for teenagers is that it exposes them to real life situations. The reenactments give the audience the opportunity to develop important life saving skills. By exposing the audience to perilous situations that have actually occurred, then, using interviews with the participants, and instructions from experts, teenagers are shown what the proper reaction should be when faced with similar life-threatening circumstances this show is perfectly positioned to educate its audience. Because research demonstrates that teenagers learn best from children their own age, this show is uniquely designed to get its lessons through to teenagers. It is likely that in addition to learning the life saving lessons contained in each episode, the show will also work to minimize a viewer's belief in their immortality, a priceless lesson for all teenagers.

WHADDYADO's moral dilemma segment is an invaluable addition to the series. In these segments, teenagers are given a scenario which raises moral questions. They are then provided with an expert's analysis of the costs and benefits of various courses of action. This portion of the show touches on sensitive areas that I have yet to find in other television shows being dealt with in such an up front, open nature. By tackling these challenging issues head on,

SRP STEVE ROTFELD PRODUCTIONS

WHADDYADO works to help develop the moral fiber of our nation's teenagers. These segments are a welcome educational opportunity for teenagers who are working to define themselves.

The following episode descriptions are offered to help provide concrete examples of the show's educational merit. In episode #7, a seasoned rafter gets caught in a river hydraulic and has to work out of it. The rafter compounds the problem by trying to hang onto the raft. Experts show the audience what to do if caught in the same situation: have someone throw you a rope; try to get on top of the overturned raft and curl into a ball and have the current expel you out from under the raft. In story two of that episode a young man uses his video camera as a tool in the fight against crime. He sees a man peeping into his friend's window. He calls the friend and she does not believe him. He grabs a video camera to get proof and records the peeping tom. The police are called and using the tape as evidence they are able to catch and arrest the man. Finally, in the moral dilemma segment academic dishonesty is presents and discussion of the downside of cheating on a test ensues.

In episode #15, a man is working on his car when one of the jacks gives way and the car falls on top of the man. His nephew who is nearby, hears the man's pleas for help and rushes to aid him. Small in stature, the nephew is somehow able to move the car enough for his uncle to get out. In story two of the episode a boy's leg is pierced by his bicycle brake and he removes the brake from his leg. The resulting wound is serious and the boy loses a lot of blood. Fortunately he is able to get to the hospital in time and the doctor realizing the extent of his injury is able to save his leg from permanent damage. In the tips from the expert the audience learns to: call Emergency services before doing anything; do not remove the object from the leg and to apply direct pressure to the wound. The moral dilemma involves dealing with a suspected stalker. The advice from the expert is to listen to your inner instinct, if you think you're being followed, you probably are.

As a licensed child/adolescent psychologist working in an outpatient setting with teenagers on a daily basis, I am thrilled to be able to refer families to WHADDYADO. Our teenagers need as much exposure as possible to media which helps to develop their insight and judgment both in physical and moral dilemmas. By providing teenagers with exposure to difficult situations that other teenagers have experienced and walking them through the steps to good decision making, this show's educational benefits are numerous.

PA Licensed Psychologist

To Our Affiliates,

Pursuant to the Children's Television Act of 1990 "Dogs with Jobs" will satisfy the FCC Children's programming requirement and be classified as with core or non-core programming. This series serves the educational and informational needs of children 13 to 16 years of age with its program content. The series profiles a fascinating array of dogs and how they serve many ways to make this world a better place.

Each half hour episode is limited to 7 minutes of commercial time. No Internet web site addresses or host "selling" takes place within or adjacent to the episodes. "Dogs with Jobs" is in compliance with Sections 73.670 (a) through (d) of the FCC's guidelines.

To facilitate your FCC filings, episode synopses are available. Also available is an endorsement from the Georgia State University College of Education and Human Development which includes a robust department of Middle and Secondary Education.
