Promotes Awareness of Opioid Abuse	Recorded PSA	1/22/19--1/23/20	ROS	:30s		(1/22/19--1/23/20, 26142, "Opioid Abuse Patient-Doctor") The United States accounts for 80% of the opioid consumption in the world. In 2017, an average of 130 people died from opioid abuse every day in America. Long-term addiction has become America's newest health epidemic. Opioids are one of the most effective medicines for moderate to severe pain, especially for managing short-term pain after orthopaedic surgery. They can also help to speed recovery from surgery or injury. However, opioids are a narcotic and because they can be addictive, it is critical to use opioids only as directed by a doctor and one should stop the use of these medications as soon as pain starts to improve. In orthopaedic surgery, there has been a recent trend toward combining different medicines with different methods to produce the most effective pain relief. In addition to improved pain management, a combined approach can reduce opioid use and the side effects associated with it. These PSAs illustrate how patients and physicians can work together to make a plan for pain relief that safely incorporates opioid medications, and how the careful use of these medications can help patients avoid addiction and other serious problems.

Supports Youth E-Cigarette Safety Awareness	Recorded PSA	6/1/19--12/31/19	ROS	:30s		(6/1/19--12/31/19, 26144, "One Brain") According to the Centers for Disease Control and Prevention (CDC), last year, more than 3.6 million U.S. youth, including 1 in 5 high school students and 1 in 20 middle school students, used electronic cigarettes, also known as "e-cigarettes." Between 2017 and 2018, e-cigarette use increased 78% among high school students and nearly 50% among middle school students. This rapid increase led the U.S. Surgeon General to call the use of these products by youth an epidemic in the United States. In adolescents, exposure to nicotine can harm brain development, which continues until about age 25. This is an urgent public health issue for your listeners because nicotine exposure during adolescence can impact learning, memory, and attention, and e-cigarette use among U.S. youth is skyrocketing. We believe that real and lasting change must be led by those directly affected by injustice, and for this reason community organizing and leadership development are the core strategies we use to realize our vision. We bring together diverse immigrant communities throughout the state to examine root causes, find common interests, and organize for better conditions. We strive to lift up the voices of directly affected people and invest in leaders at the grassroots level, and to ensure our theory of change is reflected in the way we make decisions, in the work we undertake today, and in the course we set for the future. TIRRC's mission to make Tennessee more inclusive, advocating for positive legislation and against negative legislation. They also teach English to immigrants and naturalization workshops as well work to educate native born Tennesseans on the importance and benefits of having immigrants in our state.
