							In "Climate Restoration: The Only Future That Will Sustain the Human Race", Peter Fiekowsky argues that we need to restore the Earth to a safe climate, rather than just trying to slow down our climate emissions, to ensure a livable planet for generations to come. This will require removing a trillion tons of excess CO2 from the atmosphere. The good news is that this task, while enormous and technically challenging, is eminently feasible.
6/26/2023	6:00 PM	EcoRadio KC	Craig Lubow	Environment/Energy	Peter Fiekowsky, author	n/a	
6/29/2023	9:00 AM	Cowtown Conversations	Joseph Jackson	Politics/Community Issues	Preston Smith	Community Advocate	Property Tax Appeal
