Radiolab - Saturdays at 3pm

January 4 - Time
This hour of Radiolab, we try our hand at unlocking the mysteries of time. We stretch and bend time, wrestle with its subjective nature, and wrap our minds around strategies to standardize it...stopping along the way at a 19th-century railroad station in Ohio, a track meet, and a Beethoven concert.

January 11 - Blood
From medicine to the movies, the horrifying to the holy, and history to the present day -- we consider the power and magic of the red liquid that runs through our veins. We meet an artist who opened his veins and got labeled a terrorist, douse ourselves in the meat and metaphors of blood in Shakespeare, wonder if clues to a gory fountain of youth could be lurking in the red blood cells of mice, and trace the complicated supply chain that gets blood from arms to operating tables.

January 18 - Stress
Stress may save your life if you're being chased by a tiger. But if you're stuck in traffic, it may be more likely to make you sick. In this hour, Radiolab takes a long hard look at the body's system for getting out of trouble. Stanford University neurologist (and part-time "baboonologist") Dr. Robert Sapolsky takes us through what happens on our insides when we stand in the wrong line at the supermarket, and offers a few coping strategies. Plus: the story of a singer who lost her voice and an author stuck in a body that never grew up.

January 25 - Help
What do you do when your own worst enemy is...you? Radiolab looks for ways to gain the upper hand over those forces inside us--from unhealthy urges, to creative insights -- that seem

to have a mind of their own. We meet a Cold War negotiator, in order to quit smoking, backs himself into a tactical corner, and we visit a clinic in Rwanda where patients turn to a radical treatment to help fight their demons. Plus, author Ethel Gilbert on doing battle with your muses.
