Three exceptional series continue to show how creative, entertaining, and informative public radio can be. Join 91.7 WVXU and 88.5 WMUB every Sunday night for a full evening of great radio.

SUNDAYS AT 8:00PM

The Moth Radio Hour continues with its new season. Moth storytellers stand alone, under a spotlight, with only a microphone and a roomful of strangers. The storyteller and the audience embark on a high-wire act of shared experience which is both terrifying and exhilarating.

Originally formed by the writer George Dawes Green as an intimate gathering of friends on a porch in Georgia (where moths would flutter in through a hole in the screen), and then recreated in a New York City living room, The Moth quickly grew to produce immensely popular events at theaters and clubs around New York City and later around the country.

July 1: A family of amateur detectives crack a case; a librarian takes a dance class to spice things up; a father and son come to terms in Newark Airport; a grandson brings joy to a nursing home; and a woman releases her grief and lets her passion take over.

July 8: A boy's Bar Mitzvah becomes a family battle ground, three literary pilgrims search for the author Paul Bowles in Morocco, and a novelist decides that the only way to cure her writer's block is to block out the world.

July 15: After many years in the legendary Blue Man Group, a performer makes a profound connection with an audience member; SNL alum Rachel Dratch meets a debonair man at a cocktail party and dares to think he might be Mr. Right; and a world-renowned neuroscientist identifies patterns in the brains of psychopathic killers.

Radiolab, with Jad Abumrad and Robert Krulwich,. The program weaves stories and science into sound and music-rich documentaries. It's a show about curiosity. It's a show where sound illuminates ideas, and the boundaries blur between science, philosophy, and human experience.

July 22 - Guts

This hour, we dive into the messy mystery in the middle of us. What's going on down there? We stick our hand in a cow stomach, get a window into our core through the story of a human science experiment, listen in on the surprising back-and-forth between our gut and our brain, and talk to a man who kind of went out of his mind when a medical procedure left him (for a little while) gutless.

July 29 - When Brains Attack!

In this episode of Radiolab, strange stories of brains that lead their owners astray, knock them off balance, and, sometimes, propel them to do amazing things. We hear from a kid whose voice was disguised from himself, relive a surreal day in the life of a young researcher who was hijacked by her own brain, and try to keep up with an ultra-athlete who, after suffering terrible seizures, gained extraordinary abilities through removing a chunk of her brain.

Song Travels with Michael Feinstein, Sundays, 9:00 PM:

Song Travels is a new series distributed by NPR and hosted by the renowned "Ambassador of the Great American Songbook," Michael Feinstein. As host and artistic director, Feinstein uncovers the intimate journey singers and songs take with one another, each changing the other through the

course of a lifetime. For Feinstein, American music is really a travelogue, with art that exists only because it has traveled through artists' lives, generations, and passions. Feinstein welcomes a new guest each week to explore the genre of American Popular Song, examining how these great songs have evolved through the years, changing with each interpretation and artist.

July 1 - French pianist **Jean-Yves Thibaudet** is one of the leading performers on today's classical music scene. He has over 40 albums to his credit, including interpretations of the classical repertoire as well as music by George Gershwin, Duke Ellington, and Bill Evans. Thibaudet's depth and breadth are on display in works by Spanish composer Federico Mompou and American popular song writer Alec Wilder. He and Feinstein bring their unique perspectives to Wilder's "I'll Be Around" and George Gershwin's "Embraceable You."

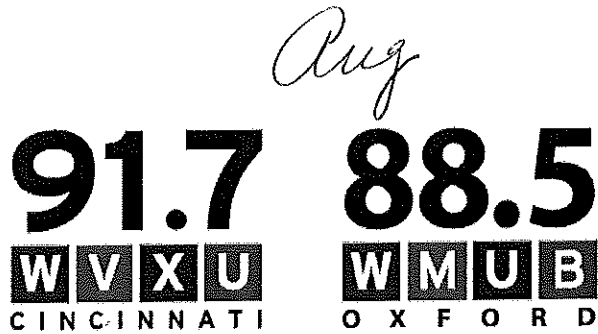

July 8 - Two-time Grammy-winning singer/songwriter **Rickie Lee Jones** has been pushing down musical boundaries for over four decades with her hauntingly beautiful voice and fearless experimentation. She has carved her own unique path, collaborating with artists from Alison Krauss to Dr. John. On this **Song Travels**, Jones employs her sultry, dynamic voice to sing some of the standards that have inspired her along the way.

July 15 - **Wayne Brady** became a household name improvising on the popular TV show, **Whose Line Is It Anyway?** The singer/actor/dancer/comedian has also appeared in the stage productions *Rent* and *Chicago*, and he became host of the game show **Let's Make a Deal** in 2009. On this week's **Song Travels**, Brady discusses his two major musical influences: Sammy Davis Jr. and Sam Cooke. With his musical director Cat Gray at the piano, Brady performs the Cooke classic, "You Send Me," and Feinstein joins Brady in a duet of "It's Only a Paper Moon."

July 22 - Songwriters **Marilyn & Alan Bergman** are a legendary power couple in American popular music. Their work includes the themes for television programs *Alice*, *Good Times*, and *In The Heat Of The Night*. They have earned multiple Emmys, Grammys, and Academy Awards, including Best Original Song for "The Way We Were," written with Marvin Hamlisch. And the hits keep coming, with a new, never before heard tune co-written with Feinstein, "There's You," which he sings on this program.

July 29 - With three Grammys to her credit, **Lari White's** multi-faceted career as an award-winning recording artist, hit songwriter, producer, independent record label owner, and versatile actress has earned her the title of Nashville's "Renaissance Woman." As the first female producer of a male superstar, Lari recently made music history by producing Toby Keith's platinum album *White Trash with Money*. Her songwriting credits include Tammy Wynette, Lonestar, Toby Keith, and Sarah Buxton, and Danny Gokey. She had a part in the blockbuster movie *Cast Away*, and has made her critically-acclaimed Broadway debut in "Ring of Fire." This "Renaissance Woman" joins host Feinstein to share her musical journey on this edition of **Song Travels**.

August may bring more hot and steamy weather, but it also brings one of the coolest new shows on public radio. The Cabinet of Wonders premieres on 91.7 WVXU/88.5 WMUB on August 5. Hosted by John Wesley Harding, it joins the ranks of The Moth Radio Hour and Radiolab as a show you'll only hear on public radio.

Radiolab, with Jad Abumrad and Robert Krulwich: Sunday evenings at 8:00 PM.

The 2012 series continues with new episodes on August 5 and 12, as well as a number of classic shows from season's past on August 19 and 26. The program weaves stories and science into sound and music-rich documentaries. It's a show about curiosity. Where sound illuminates ideas, and the boundaries blur between science, philosophy, and human experience.

Aug. 5 - Ghost Stories

Ghosts, ghouls, shades from the past ... in this episode of Radiolab, real-life people try to pin down, and make peace with, mysterious figures that haunt them, prod them, and fade out of existence. One man finds a way to put the beatdown on his personal bogey man, a dead monk spurs a king to build a perfect prayer machine, an unknown face launches a thousand dummies (actually, a whole lot more than that), and a skeptic goes on a one-way to journey to find out whether spirits exist.

Aug. 12 - Lucy

Chimps. Bonobos. Humans. We're all great apes, but that doesn't mean we're one happy family. This hour of Radiolab: stories of trying to live together. A chimp named Lucy teaches us the ups and downs of growing up human, and a visit to The Great Ape Trust in Des Moines, Iowa highlights some of the basics of bonobo culture (be careful, they bite).

Aug. 19 - Stochasticity

Stochasticity (a wonderfully slippery and smarty-pants word for randomness), may be at the very foundation of our lives. To understand just how big a role it plays, we look at chance and patterns in sports, lottery tickets, and even the cells in our own body. And we meet two girls named Laura, whose unlikely meeting seems to defy pure chance.

Aug. 26 - After Life

What happens at the moment when we slip from life...to the other side? Is it a moment? If it is, when exactly does it happen? And what happens afterward? It's an episode full of questions that don't have easy answers. Radiolab stares down the very moment of passing, and speculates about what may lay beyond.
