Film, music and art are often the best ways to capture the will and the mood of the people in times of turmoil. Art sometimes has the power to move millions where politics fails. On this edition of America Abroad, we identify some prominent artistic voices in the Middle East and in South Asia and evaluate their take on liberal ideals, on sectarian violence, on terrorism and how they're being received by audiences both Arab and Muslim and in the West.

Radiolab – Saturdays at 3:00pm

July 5 - What's Left When You're Right

Where does our sense of right and wrong come from? We watch chimps at a primate research center sharing blackberries; observe 3-year-olds fighting over toys; and tour Eastern State Penitentiary -- the country's first penitentiary. July 19 - Words

It's almost impossible to imagine a world without words. But this hour, we try to do just that. We meet a woman who taught a 27-year-old man the first words of his life, hear a firsthand account of what it feels like to have the language center of your brain wiped out by a stroke, and retrace the birth of a brand new language 30 years ago.

July 26 - Who Am I?

The "mind" and "self" were formerly the domain of philosophers and priests. But in this hour of Radiolab, neurologists lead the charge on profound questions like "How does the brain make me?" We stare into the mirror with Dr. Julian Keenan, reflect on the illusion of selfhood with British neurologist Paul Broks, and contemplate the evolution of consciousness with Dr. V. S. Ramachandran. Also: the story of a woman who one day woke up as a completely different person.

just put a crimp in a comfortable lifestyle, it is often a cause for war. On this edition of **America Abroad**, we'll hear reports from Somalia, Northwest Kenya, South Sudan, and the Sindh region of Pakistan where drought is a relentless part of life and population growth and the increasing pressure for food cultivation are making things worse. We will examine how access to clean water has become the central reason for local, regional and international conflict and what can be done to stop the bloodshed.

Is this kind of cross-species co-habitation an utterly stupid idea? Or might it be our one last hope as more and more humans fill up the planet? A chimp named Lucy teaches us the ups and downs of growing up human, and a visit to The Great Ape Trust in Des Moines, Iowa highlights some of the basics of bonobo culture.

August 16 – 60 Words

An acquaintance from the past thrusts himself into the yearly gathering, forcing them to re-examine their mundane yet seemingly idyllic existence, and the lives that have passed them by.

August 30 - The Explorers Club

Starring: Carson Elrod, David Furr, Lorenzo Pisoni, Jennifer Westfeldt

513-419-7104/kreynolds@cinradio.org

September on WVXU and WMUB will bring a rebroadcast of the popular two-hour tribute to local jazz singer and TV personality Mary Ellen Tanner, along with four new American RadioWorks documentaries.

American RadioWorks – Thursdays at 7PM

September 4 - *The Science of Smart*

Until recently, we didn't know much about the best ways to learn. Now that's changing. Over recent decades, experts working in cognitive science, psychology, and neuroscience have opened new windows into how the brain works, and how we can learn to learn better. In the American RadioWorks program, we look at some of the big ideas coming out of brain science. We meet the researchers who are unlocking the secrets of how the brain acquires and holds on to knowledge. And we introduce listeners to the teachers and students who are trying to apply that knowledge in the real world.

September 11 - *Greater Expectations: The Challenge of the Common Core*

There's plenty of controversy surrounding the Common Core, a new set of education standards adopted by most states. Getting less attention is what the standards actually say, and the fact that many teachers like them. This American RadioWorks documentary takes listeners into classrooms to explore how the standards are changing teaching and learning. Many teachers say those changes are desperately needed, but some are worried about new Common Core tests and whether they will help improve schools or get in the way of better education.

September 18 - *The New Face of College*

The 21st-century college student is likely to be older than traditional students. She's more likely to be female, working, and Hispanic or African-American. She's more likely to be a mom. She's less likely to attend college full time or finish in four years. This American RadioWorks documentary explores how universities are adapting to their new students. We see how the University of Texas-El Paso, where most undergraduates are Hispanic and low-income, is becoming a top-tier research university. And we travel to a

tiny college on an Indian reservation in eastern Washington that is trying to bring liberal arts to migrant farm workers.

September 25 -*Ready To Work: Reviving Vocational Ed*

Vocational education was once a staple of American schooling, preparing some kids for blue-collar futures while others were put on a path to college. Today that kind of tracking smacks of classism. "College for all" is the new mantra. But not everyone wants to go to college, and nearly half of jobs don't require a bachelor's degree. Many experts say it's time to bring career and technical education back. This American RadioWorks documentary explores how vocational education has changed and how its reshaping debates about the purpose of school.
