2:46	10/4/2021	11:05p	accidents and Disasters	<p>all of that, plus we're still dealing with a significant oil spill. governor gavin newsom tonight issued a state of emergency on the spill that's closed beaches in orange county. this declaration will provide additional resources from the department of fish and wildlife and emergency services. and the first class action lawsuit has now been filed in federal court to recover damages for residents and businesses impacted by the oil spill. nbc4's hetty chang is following these developments. she joins us live right now from huntington beach. hetty. reporter: chuck, that's right. certainly a lot to unravel here. first we should tell you it's been raining pretty steadily here in huntington beach for the past few hours or so. it really was that intense lightning that put the cleanup efforts on hold. crews managed to make some progress. they've now collected 4,200 gallons of oil, and it appears the bulk of the spill has now moved about two miles offshore. much of orange county's pristine coastline shut down tonight by lightning and the continued cleanup of a weekend oil spill that huntington beach city leaders believe has now grown to 144,000 gallons, up from 126,000.</p>
2:41	10/4/2021	11:07p	accidents and Disasters	<p>our i-team is looking into the history of the company that operates the rig responsible for the massive spill. investigative reporter lolita lopez has those findings. i'm angry because we just got through dealing with a huge infrastructure failure at the aliso canyon and socal gas facility that left a trail of six years of litigation. reporter: santa monica attorney gary prag lan says the oil spill off the orange county coast appears to him like part of a larger pattern with some utility companies. we don't know yet whether it was failure to detect or inspect or repair or maintain or all of the above. but something went horribly wrong. reporter: gary's law partner says unlike the government's role in maintaining public infrastructure -- it's going to fall on the owners and operators because these aren't roads that the public uses. these are privately owned and maintained, and they are for-profit businesses. reporter: businesses that they say must keep up safety procedures and maintenance. federal inspectors then make sure safety tests are performed as seen in this video from the bureau of safety and environmental enforcement.</p>
0:26	10/4/2021	11:10p	accidents and Disasters	<p>wildlife experts are doing what they can to save animals impacted by the oil spill on the water and of course the oil gets into the sand as well. birds are especially at risk because oil gets into their feathers.</p>
0:44	10/5/2021	11:00p	accidents and Disasters	<p>we take you right out live now to commerce. that's where crews have been battling a recycling yard fire. eliana moreno live overhead for us in newschopper4 alpha. they've been battling this fire for about 40 minutes now. it's located just off of 61st street, which is near the majors of eastern and slauson, and adjacent to the 710 freeway here in commerce.</p>

2:26	10/5/2021	11:04p	accidents and Disasters	now to that developing story off the orange county coast. we are learning what might have caused more than 130,000 gallons of oil to leak into the pacific and more about the flawed response from the energy company that owns that ruptured pipeline. nbc4's hetty chang is in huntington beach tonight with the details for us. hetty. reporter: carolyn, that's right. nbc news obtained a federal report tonight that shows that the first signs of trouble happened in the middle of the night, and it may have been hours before anyone acted. three days after hundreds of thousands of gallons of crude oil spilled into orange county waters, newly released federal findings beg the question, could much of it have been prevented? preliminary findings reveal workers in beta offshore's control room received a low pressure alarm at 2:30 saturday morning, indicating a potential problem. but it wasn't until more than three hours later that the oil rig operators shut down the pipeline. and according to investigators, the company waited three more hours to notify the national response center.
1:06	10/11/2021	11:10p	accidents and Disasters	we continue to follow a story out of san diego county. a small plane crashed into a residential neighborhood hitting homes and killing at least two people. tonight we're getting a look at a doorbell camera. the video caught the moment of impact. take a look here. take a look on the right side of your screen. it's a twin engine cessna. it hit several homes in santee. it also hit a ups truck. one of the victims was the driver of that ups truck. the other was the pilot, identified as a cardiologist from arizona.

2:57	10/18/2021	11:00p	accidents and Disasters	well, it has now been two weeks and still no change. the odor in carson is still there, and tonight city leaders are calling on the governor to declare a state of emergency. good evening. i'm chuck henry. and i'm colleen williams. nbc4's hetty chang live in carson for us right now where tonight hundreds of residents are really staying out of the area. hetty. reporter: chuck and colleen, the odor has gotten so bad that carson's mayor says tonight more than 200 residents are now staying in hotel rooms. another 140 on the wait list to get into those hotel rooms and to get out of carson. is the stench still here? yes, it is, and residents say it's been too long. time has not been on carson's side. that lingering stench, the one like rotten eggs, is still here two weeks later. i feel like it's getting worse kind of. reporter: this boba shop manager says he sprays febreze each morning only for the odor to come creeping back. it gets pretty bad, the smell. reporter: those who live right near the dominguez channel where the hydrogen sulfide is coming from had hoped for some relief by now. since friday, l.a. county public works crews have been trying to neutralize the odor by spraying a solution along the channel.

0:33	10/11/2021	11:03p	severe weather	there were strong gusts in victorville today. in fact, just about everything was blowing across the high desert, making it especially tough on big rigs as many drivers decided to just wait it out. up in santa barbara county, strong winds tonight are still making it a tough go for fire crews.

2:09	12/13/2021	11:00p	severe weather	and route now at 11:00, rain, wind, and snow. a powerful winter storm moving into southern california right now. it's the biggest storm of the season so far, and it's packing quite a punch. we're talking an inch or more of rain for many of us, and that's much-needed rain for a state already dealing with a big drought. but it brings the potential for flooding and mudslides tonight. good evening, everyone. i'm colleen williams. and i'm carolyn johnson. chuck is off tonight. now, that rain is already here. newschopper4 alpha flew over van nuys and pacoima where there were some light sprinkles just before 9:00 tonight. and check out the foggy drive up to big bear tonight. we have team coverage this evening. hetty chang is in big bear, where the snow is on the way. but we're going to begin right now with meteorologist melissa magee. she has more right now on the timing of this storm.
1:53	12/13/2021	11:02p	severe weather	a winter storm warning begins in just a few hours for the mountain areas of san bernardino and riverside counties. nbc4's hetty chang just made it up to big bear, and she's live now with what's expected. hetty. reporter: hey there, carolyn. as we know, this is anticipated to be a very powerful storm. and, yes, we are already feeling it here in big bear. it is a very chilly 31 degrees and, yes, definitely on the way up, low visibility. very, very foggy. it's expected to get even worse tomorrow. but take a look around. it definitely is starting to look and feel a lot like christmas. and tomorrow even more so. our drive up to big bear tonight gave us a glimpse of what's to come. the fog so thick it was hard to see more than a few feet in front of us. overnight into tomorrow, tack on snow, wind, and rain.
0:22	12/13/2021	11:04p	severe weather	there are also mudslide concerns for the burn scars of l.a. county. many people who live near the san gabriel mountains are preparing, specifically those by the burn areas of the bobcat fire.
2:16	12/13/2021	11:05p	severe weather	in yucaipa there is an evacuation order for people living near the burn scar neighborhoods. reporter: several businesses in this area told us they will be closed tomorrow because of the weather but they'll hoping tools like k-rail barriers that the county put up will protect them. the communities of oak glen, forest falls, mountain home village, northeast yucaipa east of bryant street and north of state avenue are now subject to an evacuation order. reporter: businesses and homeowners in the community of oak glen and yucaipa have been getting phone calls and text alerts like this all day. evacuate because of possible flooding, that sort of thing. reporter: san bernardino county officials are warning people who live near the burn scars from last year's el dorado fire or flood prone areas to be ready for a possible disaster. many residents in oak glen are preparing, setting up sandbags and cleaning out gutters.
0:15	12/13/2021	11:07p	severe weather	northern california is still feeling the brunt of the storm system. right now the bay area is getting pounded by heavy rain.
0:24	12/13/2021	11:34p	severe weather	melissa is here now with another look at the timing of the storm for us. the heaviest will move in once we go throughout the overnight hours. the first alert radar network showing we are starting to see some light rain showers, even some drizzle move across areas in l.
1:07	12/15/2021	11:10p	severe weather	that storm was good news for the ski season. about a foot of fresh powder fell at big bear mountain resort yesterday.

#####	12/15/2021	11:10p	severe weather	now we turn to the cleanup after yesterday's storm drenched parts of orange county. people living in sill var rado canyon spent the day picking up. this is in an area that was burned by the bond fire last fall. most of those that we talked with today said they were determined to say where they are, despite evacuation warnings. there was also a similar story in the oak glenn neighborhood near yukipa. a few people were stranded and rescued yesterday. but nobody was hurt.
0:18	12/16/2021	11:07p	severe weather	turning now to our weather, some sprinkles out there in newbury park tonight as a weak storm system moves through southern california.
0:15	12/27/2021	11:04p	severe weather	today fast-moving storm took down a tree near el monte along the 60 and 605 freeways blocking the shoulder and right lane on the northbound side of the 605.
0:14	12/27/2021	11:04p	severe weather	in the mountains, the storm is isn't quite over yet. snow showers will continue on and off through tomorrow morning.
0:13	12/27/2021	11:04p	severe weather	and in san dimas, drivers had to slow down on those slick roads. while this storm is moving out tonight, we are tracking more rain and snow on the way.
0:51	12/27/2021	11:18p	severe weather	back to our weather now. a winter blast is stretching across much of the west and sls parts of the midwest with 25 million americans under winter weather alerts tonight. parts of oregon are getting pummeled while washington state prepares for an unusual cold snap. and in northern california, drivers are dealing with these whiteout conditions on the roads.
2:07	11/22/2021	11:00p	technology	and now at 11:00, you could call it a p.i.t. maneuver on an asteroid. nasa's rocket launch lighting up the southern california sky moments ago. good evening, everyone. i'm colleen williams. and i'm carolyn johnson. chuck is off tonight. it is a one-way mission designed to save earth from a future direct hit by an asteroid. nbc4's anoushah rasta with more on this. anoushah. reporter: this historic launch happened about 40 minutes ago. it was an incredible flash of light that momentarily lit up the night sky. three, two, one, and liftoff of the falcon 9 on nasa's first planetary defense test to intentionally crash into an asteroid. reporter: it's the moment scientists have been hoping for for a long time. a new test to try and push an asteroid off its collision course with earth. newschopper4 alpha caught the moment from afar, looking like a sunrise in the night sky.

2:13	10/19/2021	11:07p	transportation	<p>congestion, cargo, and now look at this, a crash. neighbors in wilmington say the pileup at the ports is turning their residential streets into an absolute nightmare. nbc4's hetty chang is in wilmington with how some of the neighbors are trying to stop the truck traffic. reporter: this sign that says no trucks has been here for years, but those who live in this neighborhood say it does not stop the truck drivers. they say the situation's gotten so bad, they've put up their own signs. this is every day, every morning, sunday to sunday. it's like this. trucks all the time. reporter: for most of the evening, we watched as truck after truck filled up the neighborhood streets in wilmington, waiting to unload at the ucti trucking company lot near east anaheim street. it sometimes sounds like the house is shaking, you know. it just rumbles as the trucks go by here. reporter: the pileup here the result of the backup three miles away at the port of los angeles.</p>
0:45	11/12/2021	11:17p	transportation	<p>as the holiday travel season ramps up, there are real concerns that federal vaccine mandates could bring airport operations to a crawl. federal employees have until november 22nd to get fully vaccinated. so far, only 60% of tsa workers meet that requirement. now, if it comes down to letting some employees go, some tsa workers have faith those vacancies can be filled.</p>
3:55	11/17/2021	11:14p	transportation	<p>let's take a live look at lax at this hour, as the thanksgiving travel season kicks off tomorrow and goes for the next ten days. this could be a very bumpy ride for a great many people. in fact, talking to people about 2 million are expected to pass through lax alone. and between a big storm, which is bearing down on the east coast and airline staffing shortages, delays and cancellations are likely. nbc 4's i-team reporter lolita lopez will break down the best way to prepare for your trip. reporter: crowds of people, endless lines and frustrations that will fray your nerves. flight delays and cancellations. and we haven't hit the first holiday of the season yet. everything was a shock. had to stay an extra night, more money spent. reporter: a sign of what you should expect for upcoming holiday travel and here's why. the airlines are trying to meet the surge, the demand that the public wants. reporter: kathleen baines works with flight aware, which tracks air travel. unfortunately, they're trying to do it with a lot less people. reporter: she says the pandemic left mothballed airplanes in the desert. pilots falling behind on training or deciding to retire among thousands of staff shortages, before the covid crisis. but today -- you have to have baggage handlers, fuelling the airplanes and driving the fuel truck. you've got to have crews out there cleaning the airplanes. reporter: in this unpredictable weather, kathleen says there is no wiggle room now for anything to be even a little off. we looked at the latest information and found cancellations in october jumped from less than 1% in 2019 to almost 2% this year.</p>
0:31	11/17/2021	11:18p	transportation	<p>and if you're driving, why are gas prices so high? even joe Biden wants to know the answer to that. he's asking regulators to investigate whether oil and gas companies are participating in illegal conduct by profiting from high prices.</p>

2:57	11/22/2021	11:07p	transportation	despite the surges, we are seeing travel not slowing down over the holiday weekend. now some of the lawmakers say more needs to be done to keep domestic travel safe. and tonight, robert kovacik joins us live from hollywood burbank airport. robert? reporter: as you've been talking about, there's been a surge in covid cases. at the same time, there's been a surge in airline travel. so what to do? we're here at hollywood burbank airport where we have seen ebbs and flows throughout the night, but that's not the case at lax, where it has been consistently packed, as we take a live look at lax right now. consider this, a letter to the cdc and the faa have a handful of senators saying airline capacity is on its way to returning to prepandemic levels, but the virus and omicron variant continues to present a major public health threat. and it's time for the white house to get involved. those arriving at bradley terminal at lax tonight needed to have shown proof of a negative covid test, regardless of vaccination status before their international departure. now, what if there were similar demands for domestic plane travel? well, better get a good car. reporter: lawmakers calling on the Biden administration to show proof you're vaxed or tested for all airline flights within the united states.
0:19	11/22/2021	11:10p	transportation	the holiday travel rush in full force tonight as thanksgiving now is really just a couple of hours away. here's a live look at l.a.
0:54	12/1/2021	11:04p	transportation	we want to give you a look at that fog from news chopper 4 alpha. eliana marino is overhead. reporter: at this point, lax is not affected. in fact, the plane i'm going to push in there is headed out as we speak. but two other airports are not so lucky, long beach and john wayne have had delays or cancellations tonight due to dense fog. john wayne in specific has had to divert seven flights over to the airport, and lax, and they have had to cancel four flights from even taking off the ground.
0:37	12/15/2021	11:18p	transportation	a new warning tonight about the possibility of widespread flight cancellations next few months. the 5g cellular networks would interfere with radar on planes. these send out a radio signal that measures the distance from the plane down to the ground. it's especially important in less than ideal landing conditions.
0:24	12/16/2021	11:19p	transportation	tonight out at l.a.x., the holiday travel rush is officially on. on the left side of your screen, that's what it looks like right now. that's a live picture. on the right, that's video from just a few hours ago.
