

KISN, KMMS-FM, KXLB and KZMY Issues Program List Q1 2023

January 1st, 2024 – March 31st, 2024

Section 1. Issues

KISN, KMMS-FM, KXLB and KZMY have identified the following issues as significant issues facing our community in this quarter:

1. **Climate Change** – Concern regarding the impact of climate change to our local area. With historically low snowfall this past winter and increasingly warm and dry summer weather, there is a high concern of a very dangerous fire season harming people and property later this year. Additional concerns regarding drinking water reserves for growing communities, potential drought conditions for farmers and the agriculture industry overall along with possible negative impacts due to tourism decreases, hurting local businesses and communities that are dependent on this industry.

2. **Elections** – Concern regarding the upcoming elections and the current campaigning of the candidates regarding the extreme positions held by some candidates on both the left and the right. Also concerns regarding the apparent lack of communication between parties, government officials and candidates along with the perception of almost no bipartisan efforts to do what is in the best interest of area citizens, communities, the state and the nation.

3. **Education** – Concern regarding the continued teacher shortages in local schools and the impact on students. Also concerns about curriculum and the politicization of public schools. Additional issues regarding the influence of school board members' political agendas not reflecting that of the education and curriculum desired by the local residents and their families.

4. **Legalized Recreational Marijuana** – As legalized recreational marijuana continues in the state, concern with the impact of larger companies and even corporations becoming involved in the local marijuana dispensary business and what impact that may have on local communities and residents. Also concerns that, as legalized recreational marijuana continues, these bigger business entities are forcing out the small business dispensaries and their owners despite the intent of the original legislation legalizing recreational marijuana in the state. Continued concern of some residents regarding the overall long term health impacts of marijuana use.

5. **Mental Health** – Concern regarding increases in our communities of mental health issues and other problems associated with mental health. Also concerns regarding mental health and its relationship to increased homelessness, drug use and crime. Need for information in the area communities on how to deal with stress, depression and other mental health problems of residents, especially among children and young adults, as well as things that can be done by area residents to reduce and alleviate some mental health issues.

6. **Economy** – Concern continues regarding ongoing inflation for most goods and services in our area. Also the impact of higher fuel costs for residents, area businesses, especially agriculture-based business, as well as supply chain issues that are also driving up the cost of goods and services. Need for solutions to the area's continued, exceptionally high housing costs and rental prices, especially when compared against wages being earned in our area.
