Animal Science – Animal Science is a half hour educational and informational program that provides interesting factoids about a variety of animals. It is specifically produced for the 13 to 16 year old age group, but is also a highly entertaining program for a more general audience, in particular younger children ages 8 to 12. The program's quick moving segments, and cool graphics is sure to capture the interest of the intended audience.

Look Kool – Look Kool is a 30 minute program designed for children 6 to 9. On every episode, the male host, Hamza, interacts with an animated robot cat, a historical guest (played by Hamza in costume), children, and other animated creatures. The basic premise of the show is the idea that math is everywhere and each episode includes real children who help Hamza solve mathematical or scientific curiosities. Look Kool works hard to highlight for learners the link between the lesson and real life in order to activate and keep the children's interest. Live action children in real world settings put the lesson of the episode into action by seeking its value within everyday life. Look Kool is a highly educational program and speaks to the curious minds and active imaginations of elementary age kids and encourages the transfer of knowledge out into one's everyday life.

Giver – Giver is a live action series suitable for children 6 to 9. In each episode the young adult host enlists the help of children in the area to work together to improve playgrounds in their community. Together, the children select a theme for the new playground and make decisions on how to make their park great. The lesson of this series support a child's social and emotional development and encourages volunteerism and teamwork.
