### **Children's Programming**

Qubo Kids Corner is a block of regularly scheduled E/I Programming addressing educational topics of interest to children. The featured shows in "Qubo Kids Corner" are *Secret Millionaire's Club*, *Thomas Edison's Secret Lab*, and *Zoo Clues*.

*Secret Millionaire's Club* – The Secret Millionaire's Club is designed to stimulate curiosity about, interest in, and knowledge of the world of economics, business, and financial literacy among 8-12-year-olds. It invites children to follow the antics and adventures of four entrepreneurial teens as they discover the basics of smart, responsible money-management, then use that knowledge to help others. In this animated series, Warren Buffett acts as a mentor to this group of kids who have international adventures in business, and meet some very interesting guest stars along the way including Jay-Z, Shaquille O'Neal, Nick Cannon, Kelly Rowland, Bill Gates, and more.

*Thomas Edison's Secret Lab* – Thomas Edison's Secret Lab is designed to stimulate interest in and inspire excitement about science and technology among 8-11-year-olds as it introduces them to a broad range of basic scientific concepts, as well as to an eclectic array of famous scientists and inventors. The series aims to increase elementary school children's engagement with science by making it fun, exciting, comprehensible ... and most of all, cool. In this series, four kids stumble onto a secret lab left behind by famed inventor Thomas Edison. Guided by Edison's holographic image, and accompanied by their trusty robot sidekick Von Bolt, the kids learn about science through a series of informative - and hilarious - adventures.

*Zoo Clues* – Zoo Clues tackles the animal kingdom's most mind-blowing questions, like these: Can birds fly backward? Are whales fish? Do dogs sweat? Questions and clues are presented, giving viewers a chance to guess the right answers. The investigation of the answers takes viewers on a fast-paced and entertaining tour of the animal kingdom. Both older and younger audiences should find this look across the amazing world of animals fascinating. Beyond basic engagement, Zoo Clues leaves viewers with a meaningful perspective about animals and meaningful comparisons to their own human characteristics. The variety of the animal kingdom is truly odd and bizarre enough to read like fiction, but the clever narration of Zoo Clues links disparate information together in a way that always makes clear that what viewers see is real, natural, and relates to their own life in the real world.

**Issues Addressed:** Education, Children, Family, Financial Planning, Animals, Science
