Title: Attention Issues

Length: 15, 30 and 60 seconds

Brief Description: 15 million children ages 3-20, or 1 of every 5 kids in the U.S., have learning and attention issues and many may never receive a formal diagnosis. In the classroom, these students can appear distracted, disengaged, or even disrespectful, leading to the misperception that they lack interest, motivation, discipline or intelligence. If adults could see school through the child's eyes, they'd see the confusion, frustration and isolation that comes with their struggle to learn. With the right support from parents, educators and the community, kids with learning and attention issues can thrive academically, socially and emotionally. They have the same potential for success as their peers. A new PSA campaign helps parents understand the two sides of learning and attention issues, driving them to Understood.org for resources to foster support and success in school and life.

Issue: Safety

Title: Texting and Driving

Length: 30

Brief Description: Although most people agree that looking at a phone while driving is distracting and can increase the chance of an accident, a lot of drivers still think "it can't happen to me." That means drivers in your community are posting, liking, commenting and browsing while they are behind the wheel even though they know it's a bad idea. In fact, 25% of teens respond to a text message once or more every time they drive. No matter how confident a person is in their driving skills, there are no special abilities that make it safe to use a phone while driving. New PSAs aim to remind young adults 16-34 that being special in all other aspects of their lives does not make them special enough to text and drive.

Issue: Child Safety

Market: Tampa

Title: Their future

Length: 30" and 60"

Brief Description: Motor vehicle crashes are a leading cause of death for children age 1 through 12 years-old. Based on 2012 NHTSA crash data, each day an average of almost 2 children (age 12 and younger in a passenger vehicle) were killed and 332 injured. This fatality rate could be reduced by about half if the correct child safety seat were always used. This PSA uses anecdotal humor to show how parents today like to be up on the latest facts about their children, but many times forget about car seat safety. The PSAs encourage parents and caregivers with children ages 0-12 to visit safercar.gov/therightseat. The website helps parents find the right car seat for their child's age and size and also features NHTSA's best practices.

Motivate your community to learn more about what they can recycle and to make recycling an everyday habit. Think what we could create if we all worked together to turn trash into treasure.

Title: High Blood Pressure Control

Length: 10, 15 and 30 seconds

Brief Description:

New PSAs highlight that while most people know their blood pressure numbers, many don't follow their HBP plan because they feel fine, face real barriers, and don't fully understand the urgency of taking action. The campaign encourages people to talk with their doctor to create or evolve a treatment plan, and visit LowerYourHBP.org to learn more about high blood pressure. 85 million Americans (1 in 3 adults over age 20) have high blood pressure, but only half of those individuals have their condition under control. Uncontrolled high blood pressure can lead to heart failure, heart attack, stroke, vision loss, kidney disease, and even death.
