

**ISSUES AND PROGRAM REPORT
FOR**

**STATIONS KGMZ AM, KGMZ FM, KGMZ HD1
(And all the streams associated with these signals)**

**2nd QUARTER, 2018
(April – June 2018)**

Prepared by: Tim Jordan, Operations Manager CBS/Entercom San Francisco

PUBLIC AFFAIRS PROGRAMS

STATIONS KGMZ, KGMZ FM, KGMZ HD1 PROGRAMS THAT ADDRESS COMMUNITY ISSUES

1. KCBS In Depth Sundays at 6:30am. Locally produced commercial-free half-hour news interview program. Show produced by KCBS News San Francisco.

2. Bay Area Focus Sundays at 6:00am. Locally produced commercial-free half-hour news interview program. Show produced by KPIX Channel 5. "Bay Area Focus" concentrates on local issues and guest include Senators, Mayors, Supervisors and other high ranking city officials, including Police and Fire Chiefs, and other community leaders.

3. Bay Sunday Sundays at 6:00am. Locally produced, commercial-free, half-hour news interview program. Show produced by KPIX Channel 5. "Bay Sunday" is an eclectic mix of light news, arts and community information all tossed up in lively conversation.

4. Black Renaissance Sundays at 6:00am. Locally produced commercial-free half-hour news interview program. Show produced by KPIX Channel 5. "Black Renaissance" is the Bay Area's longest running news/interview show that focuses on issues of concern to the African American community. Hosted by KPIX 5 reporter, Christin Ayers, it is one of the few programs in the Bay Area specifically tailored to the needs and interests of the African American Community. It also profiles those in the community who are doing great things, and making a difference. Topics addressed include housing, politics, education, health, and the arts. Former guests have included Oprah Winfrey, Danny Glover, Street Soldiers Founder Joe Marshall, the Reverend Cecil Williams, rapper Chuck D, filmmaker Spike Lee, "The Color Purple Stars" Jeannette Bayardelle, Stephanie St. James, Latoya London, actress Terri J. Vaughn, and many others.

NOTE: Bay Area Focus, Bay Sunday and Black Renaissance are produced by KPIX TV Channel 5, and rotate weekly.

**ISSUES OF CONCERN TO THE SAN FRANCISCO BAY AREA
ADDRESSED IN RESPONSIVE PROGRAMMING IN THE
2nd Quarter, 2018**

- 37.Physical and Mental Illness**

QUARTERLY ISSUES/PROGRAMS REPORT

2nd Quarter 2018
(April - June 2018)

MOST SIGNIFICANT ISSUE-RESPONSIVE PROGRAMMING

ISSUE: The Business of Professional Sports

KCBS in Depth
April 1, 2018

6:00am
30 Minutes

The Bay Area is home to a handful of professional sports – fun entertainment, and big business as well. Zoning issues surround venues, traffic, congestion, and the influence of sports teams in the community. KCBS' Doug Sovern discusses with Dave Kalan and Joe Lacob, both professional sports team owners.

ISSUE: The Stanford School of Medicine, Understanding our Brains

KCBS in Depth
April 1, 2017
6:30am
30 Minutes

In the past few weeks, between natural calamities, passionate protests, the UN General Assembly, we have seen some pretty dramatic human behavior... heroism in the face of disaster, hatred and violence over our differences, posturing and personal threats between the leaders of nations. If ...in taking all this in...you've ever wondered...what makes people do what they do??... we have the perfect guest for you this week on KCBS In Depth.

Dr. David Eagleman is a neuroscientist and adjunct professor at the Stanford School of Medicine, a best-selling author of several books on the brain... including *The Brain-The Story of YOU*...which was the companion to his international PBS Series.

Along with 4 start-ups involving the latest in brain research and technology, Dr. Eagleman heads the Center for Science and Law, a national non-profit working to better our criminal justice and corrections systems by understanding brain damage and illness in crime... A favorite in TED talks, Dr. Eagleman recently presented some of his research at the Minimally Invasive Surgery Week conference in San Francisco.

Understanding our brains, and how we've developed as a species, can help us figure out why we do and feel the things we do... why we have to work at consciously overriding our brains' tendency to judgment and tribalism.

How what we eat, drink, medicines we take, affect our brains and therefore, ourselves.

Among his many messages about how better understanding our brains can mean a more productive and just world...Dr. Eagleman is putting that knowledge to work in the realm of criminal justice. He heads the Center for Science and Law, a national non-profit working to better our criminal justice and corrections systems by understanding brain damage and illness in crime and rehabilitation.

KCBS's InDepth is hosted by Jane McMillan.

ISSUE: Workplace Violence, High Tech Communities

KCBS in Depth

April 8, 2018

6:00am

30 Minutes

In the wake of a horrific shooting at YouTube headquarters on the Bay Area's peninsula, we consider culture, stress and the aftermath of what was a violent day, with a tech expert, Ian Sherr.

ISSUE: Immigration, Healthcare,

Bay Area Focus

April 8, 2018

6:30am

30 Minutes

What an important show we have for you today. From immigration to healthcare, we are covering all the important topics.

Joining us now are Executive Director Elisabeth Ward and historian Connie Young Yu. They are with the Los Altos History Museum and are here to share an exhibit showcasing an integral part of our history. Exhibit "I Want the Wide American Earth" describes the significant impact Asian Pacific Americans have had on this nation.

You will not want to miss this exhibit. Log onto [los altos history dot org](http://losaltoshistory.org) to find out more.

Next we are continuing this theme with an author drawing parallels from the past to immigration today. Our next guest is continuing the topic of immigration in this country. Author and federal court lawyer Peter Afrasiabi believes that we can learn an immense amount from what happened over eighty years ago. His book "Burning Bridges: America's Twenty Year Crusade to Deport Labor Leader Harry Bridges" delves into the past, but illuminates problems happening today. To get your copy of peter's book log onto [burning bridges book dot com](http://burningbridgesbook.com).

Up next, a c-e-o vowing to simplify healthcare. Finding the right healthcare can be intimidating to say the least. That is where the company Joany comes in. C-e-o Christine Carillo has been in the industry for years and is here to give some advice as well as shed some light on the current state of healthcare.

To see how Joany can help you log onto [joany dot com](http://joany.com).

Next an organization adding purpose to Halloween. Halloween is just around the corner. It's a time for dressing in crazy costumes and going door to door collecting candy. But Unicef is also asking trick or treaters to collect something other than candy to help those affected by the recent disasters. Here to speak about this is Emily Brower. To find out how you can give back for Halloween log onto [trick or treat for unicef dot org](http://trickortreatforunicef.org).

Bay area focus is hosted by Michelle Griego.

ISSUE: Terrorism and Security

KCBS in Depth

April 15, 2018

6:00am

30 Minutes

KCBS anchor Jeff Bell joins KCBS morning reporter Holly Quan for a wide-ranging issue with Special Agent Craig Fair of the SF field office of the FBI to discuss security, terrorism, the threat of violence in the Bay Area, and more.

ISSUE: Education, The Kidney Foundation, Pancreatic Cancer, Homelessness

Bay Area Focus

April 15, 2018

6:30am

30 Minutes

We have a show full of incredible organizations. But first we are covering an important and timely topic: Education. It has been a controversial topic, especially after the appointment of Betsy DeVos as Secretary of Education. Author David Osborne outlines the future of public education in his book "Reinventing America's Schools". To find out more about David's work on education log onto [progressive policy dot org](http://progressivepolicy.org).

Next, we have two owners of an incredible restaurant in the Bay Area. We are highlighting an event for a great cause happening in the bay area. It is the Twenty Ninth Annual Kidney Foundation Authors Luncheon. And there will be two guest authors at the luncheon that the bay area may know very well. They are husband and wife chef proprietors Stuart Brioza and Nicole Krasinski of San Francisco's Michelin Star Rated Restaurant State Bird Provisions & The Progress.

There are tickets still available to meet Stuart, Nicole, and all the authors. Log onto authors luncheon s-f dot org.

Next another organization fighting for this community. Mark your calendar for November Fourth because it is The Purple Stride Silicon Valley - the walk to end pancreatic cancer. Richard Blish, an eight year pancreatic cancer survivor, is here to discuss how vital this walk is.

To find out how you can help log onto purple stride dot org slash silicon valley.

Just about a year ago we welcomed the organization Back on My Feet to the show and to San Francisco. There was a tremendous need in the bay area, so Back on My Feet set about changing people's perspective of homelessness and the way we approach it. Well we are checking in with Linda Glassel to see how the past year has gone and what is on the horizon. If you want to be a part of this movement log onto back on my feet dot org

Bay Area Focus is hosted by Michelle Griego.

ISSUE: Earthquake Danger in the Bay Area

KCBS in Depth

April 22, 2018

6:00am

30 Minutes

It's not a matter of if, but when, the "big one" will happen. On the heels of a sobering new report, KCBS reporters Matt Bigler and Holly Quan talk with USGS quake expert Dr. Jack Boatwright.

ISSUE: Drug Abuse, DHS

KCBS In Depth

April 22, 2018

6:30am

30 Minutes

Our guest today is Doctor Anna Lembke, Chief of the Addiction Medicine Dual Diagnosis Clinic at Stanford. She's written a book on the prescription addiction crisis called 'Drug Dealer, M.D.': How Doctors Were Duped, Patients Got Hooked, and Why It's So Hard To Stop.

Surprising his staff and department heads a few days ago, president trump said that an emergency declaration on the national opioid crisis would be coming out this next week.

You may remember Mr.Trump also promised an emergency declaration in August which was supposed to include a plan to tackle the drug epidemic.

Politico has reported that federal health officials were blindsided by the President's unexpected announcement and are now scrambling to develop a plan. But funding for, and the type and reach of an plan remain unclear...

Other impediments to implementing an emergency declaration on the opioid crisis include empty desks at several top administration departments, which would have to be involved in the implementation:

The health department is without a secretary. Tom Price resigned last month after spending more than \$1 million in taxpayer money on private and government planes for travel.

The ACTING Director of the Drug Enforcement Administration ...Chuck Rosenberg...resigned last month in protest of the president's statements including those condoning police roughing up prisoners.

Mr. Trump's nominee to lead the Department of Homeland Security has not yet been confirmed. This is the department, which would work to stop the flow of illegal drugs including opioids...

And, the president's choice to head up the Office of National Drug Control Policy, Rep. Tom Marino , withdrew his nomination amid reports, including this network's program 60 Minutes, that he may have actually helped fuel the opioid crisis through a 2014 bill he

introduced designed to make it harder for the DEA to stop distribution to drug abusers.

But, whether or not an emergency declaration is announced this week, any plan to tackle this health crisis must acknowledge how it began... and be willing to do what it would take to get a grip on what the Centers for Disease Control call an epidemic....

We spoke with Doctor Anna Lembke... Chief of the Addiction Medicine Dual Diagnosis Clinic at Stanford. She's written a book on the prescription addiction crisis called 'Drug Dealer, M.D.': How Doctors Were Duped, Patients Got Hooked, and Why It's So Hard To Stop.

Today she discusses; the drug industry's lie that opioids were not addictive when selling them to the medical community; doctor's reluctance to say no to patients asking for pain mediation; lack of help for patients addicted and in need of alternative pain mitigation; and poor response from the government in recognizing the epidemic.

KCBS's In-Depth is hosted by Jane McMillan.

ISSUE: Cal Academy of Sciences

KCBS in Depth

April 29, 2018

6:00am

30 Minutes

PLANET VISION... new sustainability project by the Cal Academy of Sciences

Executive Director Dr. Jonathon Foley

Science-based plan to inspire individuals, communities, business and governments to put plans into action. It's creating an online community to look at reinventing how we use food and water and energy to build a healthier future for ourselves and our planet.

It's also a physical exhibit at the Cal Academy with plans to offer it to museums around the country and the world so those centers of learning and inspiration can share it with their own communities.

The plan is to draw people to act on every day solutions rather than be divided over theoretical arguments.

Can we save water and cut back on greenhouse gasses by just cutting down on food waste? YES!

It's about creating success by focusing on positive action and understanding rather than division... and sowing renewed interest and wonder in our natural world/home.

KCBS's In-Depth is hosted by Jane McMillan.

ISSUE: Promoting Education, Mill Valley Film Festival, SF Latin Film Festival, Strut Your Mutt

Bay Area Focus

April 29, 2018

6:30am

30 Minutes

Today we are going to start our show with a very special guest. In 2011 he won a Jefferson Award from K-P-I-X and his inspirational work continues. Former Forty Niners Tight End Eason Ramson knows what it means to struggle - and he has made it his life's mission to help young adults through those hard stages of their lives. He is here to speak about truancy and engaging the community to promote education.

To find out more about Eason Ramson and the care program log onto y-m-c-a-s-f.org.

Next, we catch up with an amazing film festival. Well it is time to celebrate - because the Mill Valley Film Festival is back for its fourteenth year. This festival has been an

integral part of the independent film scene for years, and this year they have big plans. Here to tell us all about it are founder mark Fishkin and Director of Programming Zoe Elton. To get your tickets to the mill valley film festival log onto m-v-f-f dot com.

We are so excited to highlight another amazing film festival. This time it is The San Francisco Latino Film Festival, which celebrates the Latino arts. Founder and Executive Director of Cine Mas S-F, Lucho Ramirez, is sitting down with us now to clue us in on the exciting plans for this festival. This film festival is already in full swing, so log onto s-f latino film festival dot org now to see all the upcoming events.

Next, we have a returning guest and some cute special guests who are helping our community. We are welcoming back returning guest Leslie Smith from Best Friends Animal Society to continue to raise awareness for Strut Your Mutt- it is a phenomenal event that helps our four legged friends. And joining her today from Rocket Dog Rescue is Andy Rifken and two of the most adorable puppies. To find out more about strut your mutt and where you can donate log onto best friends dot org.

Bay Area Focus is hosted by Michelle Griego.

ISSUE: Meltdown: Why Our Systems Fail and What We Can Do About It

ISSUE: Albert Einstein

KCBS In Depth

May 13, 2018

6:00am

30 Minutes

One of the greatest minds of the 20th century looms large in modern day America...and the world. In fact, Albert Einstein is probably making someone's holiday brighter with his discoveries in science and technology appearing in all manner of gadget and gizmo.

It was the combination of his technical genius and his philosophical depth that made Einstein a singular figure and contributor to humanity.

In the 21st century, Albert Einstein remains a giant of discovery... a genius of science and technology...but also at heart, a philosopher who spent his life trying to understand humanity's place in the universe as much as what makes that universe tick.

Einstein biographer David Bodanis (boe-DAN-iss) says the great man's outlook on research and responsibility offers lessons for the modern day.

KCBS's In-Depth is hosted by Jane McMillan.

ISSUE: The 1968 Election and the Transformation of American Politics.

KCBS In Depth

May 13, 2018

6:30am

30 Minutes

Today our guest is Lawrence O'Donnell, author of *Playing With Fire: The 1968 Election and the Transformation of American Politics*.

Regardless of political party, most people would agree that the Presidential election year of 2016 rocked most political, social and electoral norms. And, news that continues to pour out of our nation's capital and erupt in cities, industries and spread across social media hasn't stopped.

The nation has gone through foundation rattling turbulence before...and many of the seeds of America today were sewn in the ground-shaking year of 1968. The year rage over the unending war in Viet Nam, brought young people into the streets and democratic presidential candidates into a wild race against their party's sitting president. The year rage around racism and segregation brought extreme candidates to run on the right, The year two beloved leaders were assassinated, and the one who emerged the winner of the white house colluded with a foreign power for that prize. So much of what happened in that political watershed year of 1968 has set the stage for the politics of today.

KCBS's In-Depth is hosted by Jane McMillan.

ISSUE: The fate of The Dreamers, Big Money Donors

KCBS In-Depth

May 20, 2018

6:00am

30 Minutes

This past week we've been watching big stakes politics being played out in Washington DC....

And, with the clock winding down on a budget deal, what's been at stake is more than just money...it's people's lives. The fate of the Dreamers.... young people brought here as children but who are without documentation. The fate of health care access for children...as the CHIP program runs out of funds... And the sword of domiciles hanging overhead...a full shutdown of the government of the United States of America.

When we talk about politics we usually focus on elected officials as being the power brokers...after all they have the office and the votes or vetoes when it comes to these decisions.

But big money donors also are behind much of what comes to pass through all three branches of government. They influence campaigns and policy votes of those elected. The motivations behind these moneyed influencers can be ideological, religious, self-serving... they can also be altruistic, depending upon one's point of view...

We have a locally-grown mega- donor who has long funded progressive races and issues, particularly surrounding climate change... and who has recently made headlines by launching a signature drive to Impeach President Trump, and has pledged 30-million dollars to flip the House blue in the 2018 midterms.

Tom Steyer is a former professional investor and founder of Farallon Capital. He's now a San Francisco-based philanthropist and political activist who started Next GenClimate...which has become NextGenAmerica as Steyer's mission has branched out to address more areas of concern, and to mobilize young Americans to engage in the process of citizenship and governing.

If you haven't had the opportunity before, here's a chance to hear from one of the most powerful political donors in the country and why he's chosen to engage his personal wealth in the political process...

KCBS's InDepth is hosted by Jane McMillan.

ISSUE: Albert Einstein, Science and Technology

ISSUE: Bay Area Wines, Pets for Vets, ARF, Alameda Community Food Bank

Bay Area Focus

May 27, 2018

6:00am

30 Minutes

We are kicking our show off today by highlighting a holiday favorite - wine. There is a new wine bar showcasing all that Napa Valley has to offer. Here to introduce the new space and some of the incredible wines is host of "Check Please, Bay Area", wine expert, and author Leslie Sbrocco.

To check out the wine bar and sample some local wines visit Macy's in Union Square. and to see what Leslie is up to visit [leslie sbrocco dot com](http://lesliesbrocco.com).

Next, we have some four legged friends joining us. Tony La Russa's Animal Rescue Foundation, or ARF for short, has been saving animals and placing them in loving homes since 1991. Now ARF is giving back in a very special way - by helping veterans with their "pets For Vets" program. Elena Bicker, Executive Director for ARF, and special guest Rosie join us this morning. To find out more about pets for vets log onto [arf life dot org](http://arf.life.org).

Next, we have another incredible animal organization. There are numerous incredible dog adoption organizations in the Bay Area, but many of those getting adopted are puppies - so what about the senior dogs? Muttnville is giving those dogs a second chance in their golden years. Founder Sherri Franklin and another special guest - who is up for adoption - are on set sharing why Muttnville is so important. If you want to adopt a senior dog log onto [muttnville dot org](http://muttnville.org).

Next, an organization serving the community. Just this year the food bank will distribute the equivalent of thirty million meals. The Alameda County Community Food Bank has been leading the campaign for hunger relief since 1985. We are excited to highlight such an incredible organization and are lucky to have Elizabeth Gomez with us today.

If you want to give back to the alameda food bank log onto [a-c-c-f-b dot org](http://a-c-c-f-b.org).

Bay area focus is hosted this week by Anne Makovec.

ISSUE: Social Media and Russian Election Targeting

KCBS In Depth

May 27, 2018

6:30am

30 Minutes

CNET Executive Editor Ian Sherr and KCBS Technology Analyst Larry Magid, discuss social media and Russian election targeting

If you are on social media, at all... odds are your favorite platform was the target of a first rate grilling in Washington DC this past week...

Legal representatives from Google, Facebook and Twitter were called to testify before Congress about their platforms being used by Russia in a disinformation campaign that likely influenced the 2016 Presidential election...

Were you the target of any of those ads or postings? Might they have influenced your choice?

How do you, as a content consumer, tell if what you're reading...and passing along to your online friends and followers is legitimate and truthful information?

And, who should be responsible for this... if anyone? Does it fall under free speech? Should it be legislated... or should the private for-profit social media firms be liable for how their product is used?

KCBS's In-Depth is hosted by Jane McMillan.

ISSUE: Iran Protests

KCBS in Depth

June 3, 2018

6:00am

30 Minutes

Decades-long economic disparity, and an oppressive religious governmental structure has pushed Iran into widespread social unrest... deeper and more far-reaching than we've seen before. As the young people and working class of the country take to the streets against their ruling parties... those in control claim the protests are the work of Iran's enemies, like the U-S, Israel and Saudi Arabia... fomenting the unrest.

During a Friday UN Security Council meeting called by the US to address the situation in Iran, the Iranian Ambassador to the UN accused the US of abusing its power in the security council...basically saying the US should butt out of what is an internal affair and should be outside the mandate of the UN.

Meanwhile, some crucial deadlines related to the Iran nuclear deal are just days away... with mixed messages coming from the trump administration. The president continues to threaten US withdrawal from the multi-national deal...but his Secretary of State is hinting at a legislative move to solve the situation.

Any new sanctions like abandoning the nuclear deal would further injure an already drowning Iranian economy.

Certainly the U-S, and other nations, have an interest in the internal affairs of Iran and its influence in the region... but one of our most noted local scholars on the nation says what's happening in his homeland, with its people, is being driven internally...by a citizenry hungry to realize its full potential.

Our guest on In Depth is Doctor Abbas Milani... He joined us from Stanford University where he is the Director of Iranian Studies and co-Director of the Iran democracy Project at the Hoover Institution.

We discuss in detail:

Life in Iran

The issues,

Who are the protestors?

What do they want?

Young people/ will the middle class get involved?

Rouhani vs Komenee moderates vs hardliners

Government crackdown... access to information/technology... how else will they do it?

The difference between the people and the government and religious leadership

US involvement...past, present and future. 2 erroneous US positions

KCBS's InDepth is hosted by Jane McMillan.

ISSUE: The Race to be California's Superintendent of Public Instruction

KCBS In Depth

June 3, 2018

6:30am

30 Minutes

Who will run the Golden State? In a costly, contentious leadup to the June primary, KCBS political reporter Doug Sovern sat down with the six major contenders for the top post in Sacramento, California

KCBS Political Reporter talks with the major contenders to run the State of California's high-ranking, expansive and sometimes costly public education system.

ISSUE: CA Surrogacy Laws, Genetic Engineering, Designer Babies

KCBS In Depth

June 17, 2018

6:00am

30 Minutes

In another big step forward in medical technology... CRISPR Gene Editing is ready for testing in humans...as early as this year.

In a very oversimplified explanation, the CRISPER technology can edit out damaging genes that cause disease. Incredible news with the potential of improving and saving lives.

According to a report this week in the Financial Times, 2 biotech companies, one Swiss and one American, are applying for FDA permission to test gene editing on people with certain blood diseases and blindness.

When you consider that mapping the human genome was only completed in 1990, and the CRISPR-Cas9 gene-editing technology was first demonstrated only 5 years ago... the pace of advancement is break-neck.

It was only this past summer that CRISPR was used for the first time in the US to alter the genetic make-up of a large number of single-cell human embryos.

None of the edited embryos was allowed to develop and was never intended to be implanted.

But... it's this part of new medical technology that sparks fears ... that we're opening a Pandora's Box leading to so-called designer babies.

Reproductive technology is already a burgeoning global industry... and one without any consistent oversight to keep up with its rapid development. This is a big concern of this week's guest on In Depth... particularly the rights of the children brought into the world through the wonders of science, including multiple-parent surrogacy..., which is thriving in the U-S, and specifically California where laws are quite permissible.

Dr. Mary Ann Mason is Professor of the Graduate School of Law at UC Berkeley, and a Faculty Affiliate of the Berkeley Center for Law & Technology. Her area of expertise is child and family law and policy... an author of several books, her latest, co-authored with Tom Eckman, is **BABIES OF TECHNOLOGY: Assisted Reproduction and Rights of the Child.**

Book Review:

“Millions of children have been born in the United States with the help of cutting-edge reproductive technologies, much to the delight of their parents. But alarmingly, scarce attention has been paid to the lax regulations that have made the U.S. a major fertility tourism destination. And without clear protections, the unique rights and needs of the children of assisted reproduction are often ignored.

This book is the first to consider the voice of the child in discussions about regulating the fertility industry. The controversies are many. Donor anonymity is preventing millions of children from knowing their genetic origins. Fertility clinics are marketing genetically enhanced babies. Career women are saving their eggs for later in life. And Third World women are renting their wombs to the rich. Meanwhile, the unregulated fertility market charges forward as a multi-billion-dollar industry. This deeply-considered book offers answers to the urgent question: Who will protect our babies of technology?”

SOME of the questions of children's rights:

Does every child have the right to be as healthy as genetically possible...imperfect embryos destroyed?

Does every child be as genetically fit as possible? Healthy vs Enhanced kids.

What is the Govt role... genetic screening?

Does genetic engineering threaten mental and emotional health of child?

Does it change family dynamics?

Is there a basic human right to be naturally conceived? Can kids challenge parent's genetic decisions?

Should money determine who genetically engineers a child?

KCBS's InDepth is hosted by Jane McMillan.

ISSUE: Bay Area Music, Bay Area Tech,

Bay Area Focus

June 17, 2018

6:30am

30 Minutes

We are starting our show today with a talented guest. Mads Tolling is an internationally renowned violinist and composer. He has won two Grammy awards and we are so excited he is bringing his music back to the bay area. Mads will be playing at Yoshi's in Oakland and he is sitting down with us now to discuss his career.

If you want to see mads live or find out more about his music log onto mads.tolling.com.

Next, we are talking to a seventeen year old genius. We have another incredible guest sitting at our table. At the age of thirteen George Hofstetter was invited to his first hackathon, where he competed against Stanford master's students. Since then, he has developed his own apps and has started a tech company. Now at seventeen years old George shows no signs of slowing down. To learn more about George's inspiring journey log onto meetgeorge.com.

Next, an organization doing all it can to save lives. The American cancer society is working tirelessly to fight for a world that will one day be cancer free. November eighteenth is a special day for this amazing organization. It is the American Cancer Society's East Bay Jewel Ball. We are so excited that our own KPIX and KBCW are sponsors of this incredible gala. Valery Uhl and Juliane Lee are here to discuss. If you want to volunteer at the gala or want tickets log onto [a-c-s jewel ball dot org](http://acsjewelball.org).

Next, we have another guest fighting for the well-being of others. Sheri Brisson is helping young adults who are struggling with physical and mental illness in an innovative way - through a mobile game. She has used her own personal health experience to change the lives of others. Sheri and Nicole Gustafson are at our table to tell us all the details of this new game. To find out more about Sheri's incredible game log onto [shadows edge dot com](http://shadowsedge.com).

Bay Area Focus is hosted by Michelle Griego.

ISSUE: CA Surrogacy Laws, Genetic Engineering, Designer Babies

KCBS In Depth

June 24, 2018

6:30am

30 Minutes

In another big step forward in medical technology... CRISPR Gene Editing is ready for testing in humans...as early as this year.

In a very oversimplified explanation, the CRISPER technology can edit out damaging genes that cause disease. Incredible news with the potential of improving and saving lives.

According to a report this week in the Financial Times, 2 biotech companies, one Swiss and one American, are applying for FDA permission to test gene editing on people with certain blood diseases and blindness.

When you consider that mapping the human genome was only completed in 1990, and the CRISPR-Cas9 gene-editing technology was first demonstrated only 5 years ago... the pace of advancement is break-neck.

It was only this past summer that CRISPR was used for the first time in the US to alter the genetic make-up of a large number of single-cell human embryos.

None of the edited embryos was allowed to develop and was never intended to be implanted.

But... it's this part of new medical technology that sparks fears ... that we're opening a Pandora's Box leading to so-called designer babies.

Reproductive technology is already a burgeoning global industry... and one without any consistent oversight to keep up with its rapid development. This is a big concern of this week's guest on In

Depth... particularly the rights of the children brought into the world through the wonders of science, including multiple-parent surrogacy..., which is thriving in the U-S, and specifically California where laws are quite permissible.

Dr. Mary Ann Mason is Professor of the Graduate School of Law at UC Berkeley, and a Faculty Affiliate of the Berkeley Center for Law & Technology. Her area of expertise is child and family law and policy... an author of several books, her latest, co-authored with Tom Eckman, is **BABIES OF TECHNOLOGY: Assisted Reproduction and Rights of the Child.**
