

LOCAL PUBLIC CERTIFICATIONS & ANNOUNCEMENTS

During WDWO-CD's last license renewal application process, WDWO properly aired (actually more than) the required number of pre and post-filing license renewal announcements on the proper dates times required by the FCC and documented that compliance in the form of local public notice certifications placed in the public file. However, at some point, during the time period of 2009-2011, a FCC alternative inspection consultant removed the certifications from WDWO's public file, advising that the documents did not need to be retained and the documents were subsequently destroyed.

This is a true and correct statement, to the best of my understanding and belief.
