

## Medical Notification Process

WLPX-TV - Charleston, WV - ION Media Charleston License, Inc.

Per the rules of the FCC (47 CFR 15.242) and as part of the grant of a construction permit, television stations are required to make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within the service area potentially affected by DTV operations.

Widely was engaged to identify and to make a good faith effort to notify locations that met the criteria of the rules.

Using D&B data, and NAICS codes, and using industry standard mapping software, Widely identified all locations that were within a 150 kilometer radius of the transmission location. This yielded 508 locations that met the following criteria:

- General medical and surgical hospitals
- Nursing and personal care
- Psychiatric hospitals
- Residential care
- Skilled nursing care facilities
- VA medical facilities

The facilities were selected from the licensed D&B data for the following NAICS codes:

### NAICS Code 622 Hospitals

Industries in the Hospitals subsector provide medical, diagnostic, and treatment services that include physician, nursing, and other health services to inpatients and the specialized accommodation services required by inpatients. Hospitals may also provide outpatient services as a secondary activity. Establishments in the Hospitals subsector provide inpatient health services, many of which can only be provided using the specialized facilities and equipment that form a significant and integral part of the production process.

### NAICS Code 623 Nursing and Residential Care Facilities

Industries in the Nursing and Residential Care Facilities subsector provide residential care combined with either nursing, supervisory, or other types of care as required by the residents. In this subsector, the facilities are a significant part of the production process and the care provided is a mix of health and social services with the health services being largely some level of nursing services.

In addition, Veterans Affairs medical facilities were researched and added to the Widely healthcare database.

The letters were mailed via the US Post Office. Letters that were returned from the US Post Office were researched individually and, where reasonable, addresses were corrected and the letters were resent.

In addition, letters were sent to the following state associations:

Kentucky Association of Health Care Facilities  
Kentucky Association of Homes and Services for the Aging  
Kentucky Hospital Association  
Kentucky Medical Association  
Kentucky Association of Hospice and Palliative Care  
Kentucky Nurses Association  
Ohio Assisted Living Association  
GREATER DAYTON AREA HOSPITAL ASSOCIATION

Ohio Assisted Living Association  
Ohio Association of Area Agencies on Aging  
Ohio Children's Alliance  
Ohio Children's Hospital Association  
Ohio Health Care Association  
Ohio Hospital Association  
Ohio Hospital Association  
Ohio Nurses Association  
Ohio State Medical Association  
Virginia Assisted Living Association

Medical Society of Northern Virginia  
Medical Society of Virginia  
Virginia Center for Assisted Living  
Virginia Hospital & Healthcare Association  
Virginia Nurses Association  
West Virginia Health Care Association  
West Virginia Nurses Association  
West Virginia Assisted Living Association  
West Virginia Hospital Association  
West Virginia State Medical Association

Letter sent to the facilities, the associations, and the facility list follow.

Facility Letter

To: Director, Clinical/Biomedical Engineering Engineer, Risk Manager, Hospital Administrator, Nursing Home Director

From: WLPX-TV - Charleston, WV - ION Media Charleston License, Inc.

Date: August 18, 2019

Pages in this communication: 2

**Notice of Channel Change for Digital Television Channels**

You are receiving this letter because WLPX-TV was a participant in the Broadcast Incentive Reverse Auction (Auction 1001). This station will cease operations on its current channel 39 (620 - 626 MHz) and will commence operations on channel 18 (494 - 500 MHz). This may affect reception and retransmission equipment in your facility. Please be sure that everyone responsible for the supervision or maintenance of the biomedical equipment receives a copy of this notification and the attachment regarding the channel change on October 18, 2019.

-----

Under authorization from the Federal Communications Commission (FCC), the station listed above will be broadcasting on a new frequency.

Per the rules of the FCC (DA 17-702), stations are required to make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within the service area potentially affected by the DTV operations.

Widelity has been retained by the station listed above to make the required good faith notifications to applicable facilities in their service areas. This letter is to notify health care facilities in the coverage area in the event that any electronic medical devices are affected by the relocation of the transmit locations of the station. Your facility may have electronic biomedical devices that could be impacted by the DTV operations listed on the following pages. The FCC allows certain electronic biomedical devices to use unoccupied DTV frequencies on a secondary use basis. As a result of the secondary use status, your facility is responsible for identifying and resolving any potential radio frequency interference for the operations identified on the following pages.

To address potential interference problems for medical telemetry systems, the FDA recommends that you work with the manufacturer of your telemetry systems to:

- determine the channel/frequencies your telemetry systems use; and
- consult the FCC table of allotments for DTV channels that will be coming on line in your area.

If your telemetry systems are transmitting on channels that are used by a local station, (as identified in the attached sheets) you should work with the manufacturer of your telemetry systems to:

- change your telemetry channels to unused channels prior to the expected broadcast date to avoid interference

If you find that your telemetry systems are transmitting on channels that will remain unused, you should not have a problem due to DTV transmissions. However, you should periodically check the FCC allotments to assure that those channels remain available.

Sincerely  
Widelity, Inc.

WLPX-TV, Charleston, WV, will be changing the frequencies on which it transmits. It will cease operations on its current channel 39 (620 - 626 MHz) and will commence operations on channel 18 (494 - 500 MHz). Per the FCC, this process of change in frequencies from channel 39 to channel 18 may begin as early as October 18, 2019. This change in broadcast channels may affect equipment in your facility. It is possible that certain medical devices in your facility may be affected by the change in operations identified here.

As the guidance from the FDA notes:

Many medical telemetry devices are operated under 47 CFR Part 15 of the FCC regulations. These devices are secondary users of the radio-frequency (RF) spectrum. Licensed users such as television stations are the primary users. As a secondary user, your telemetry devices may be subject to interference from the primary user at any time, but must not cause interference with the primary user. If your telemetry devices are operating on frequencies licensed to a primary user, you need to be aware of the potential for interference and take any steps necessary to avoid device malfunctions due to interference

#### FDA Recommendations

To address potential interference problems for medical telemetry systems, the FDA recommends that you work with the manufacturer of your telemetry systems to:

- determine the channel/frequencies your telemetry systems use; and
- consult the FCC table of allotments for DTV channels that will be coming on line in your area.

If your telemetry systems are transmitting or receiving on channels that are scheduled to be used by a local station, you should work with the manufacturer of your telemetry systems to:

- change your telemetry channels to unused channels prior to the expected broadcast date to avoid interference

As a general rule, if you find that your telemetry systems are transmitting or receiving on channels that will remain unused, you should not have a problem due to DTV transmissions. However, you should periodically check the FCC allotments to assure that those channels remain available.

-----

### **WLPX-TV - Charleston, WV - ION Media Charleston License, Inc.**

Facility ID: 73189      FCC file Number: 0000069627

DTV Channel: 18

Frequency Band: 494 - 500 MHz

Effective radiated power: 765 kW Horizontal, 229.5 kW Vertical

Antenna Location: 38° 30' 21.1" N (38.505861) Latitude, 82° 12' 32.3" W (-82.208972) Longitude (NAD83)

Association Letters to associations – West Virginia, Virginia, Kentucky, Ohio

Report Date

Name

Title

Association

Address

City, State zip

Dear:

You are receiving this letter because WLPX-TV, Charleston, WV, will be changing the frequencies on which it transmits. It will cease operations on its current channel 39 (620 - 626 MHz) and will commence operations on channel 18 (494 - 500 MHz). Per the FCC, this process of change in frequencies from channel 39 to channel 18 may begin as early as October 18, 2019.

Our firm, Widelity, has been retained by the station to make the required good faith notifications to applicable facilities in their service areas. Hospitals, medical, and residential medical facilities in the service area have been notified of the impending change in frequency.

It is possible that some of your member's facilities in CUSTOMIZE LETTER will be impacted by the FCC authorized move. In your membership communications, would you please consider notifying your members of the change in the event that some of their devices are tuned to the identified spectrum? Timely notification will give them time to retune their equipment.

Please do not hesitate to contact me if you have any questions or need additional information.

Thank you for your assistance in this effort.

Sincerely,

Michael Lasky

Principal

Widelity
