Weekly Public Affairs Program

Show # 2020-10 Total running time: 29:30 (with optional exit at 24:00)

1. **Kelly McGonigal, PhD,** health psychologist, lecturer at Stanford University, author of "*The Joy of Movement: How Exercise Helps Us Find Happiness, Hope, Connection, And Courage*"

People who are regularly active have a stronger sense of purpose, and they experience more gratitude, love, and hope. Dr. McGonigal shared stories of people who have found fulfillment and belonging through running, walking, dancing, swimming, weightlifting, and more. She said a gym workout or other intense exercise isn't necessary—it's just important to find an activity that is enjoyable.

<u>Issues covered:</u> Mental Health Physical Fitness Aging

**2. Mark McConville, PhD,** family clinical psychologist in private practice in Cleveland, author of "Failure to Launch: Why Your Twentysomething Hasn't Grown Up...and What to Do About It"

A recent study shows that a third of today's 25 to29 year-olds live with their parents—three times as many as in 1970. Dr. McConville said that many are struggling with three critical skills that are necessary to make the transition from childhood to adulthood: finding a sense of purpose, developing administrative responsibility, and cultivating interdependence. He explained why things have changed for this generation, and how parents can help.

<u>Issues covered:</u> <u>Length:</u> 9:22 Parenting

**3. Souvik Sen, MD, MS, MPH,** Chair of Neurology at Palmetto Health-USC Medical Group, Professor of Neurology at the University of South Carolina School of Medicine

Dr. Sen led a study that found that gum disease may be linked to higher rates of stroke caused by hardened and severely blocked arteries. He discussed the connection between gum disease and blood inflammation. He found that patients with gum disease had twice as many strokes and were twice as likely to have moderately severe narrowing of brain arteries.
