NARRATIVE: The top court of San Diego after has given his mistake in favor of the increase to the water tariffs of the district of irrigation of Imperial to Calexico the appeal presented by this frontier city inclined the scales next to you since I determine that there are sufficient arguments to continue with the litigation.

Renison, Calexico; there was not audencia he publishes, when something is raised of the public sector you have to announce it that you have to have public meetings where it comes the people to announce in the newspaper things for the style there is a process and we think that there was no this legal process.

Whereas the IID answers.

Kelley, IID; I have understood that the IID pipe a series of public conferences and there was a public notification.

The litigation dates from 2005 when the IID increased the tariff to municipalities for according to them to recover the cost of the service. The position of the IID is that we want that our tariffs reflect the service that we provide and have to recover the cost of this service.

Renison, we had to raise the tariff 3 times in 3 years to the residents clearly that departs from the rise was because to renew the water plant and tubes you sew for the style things that they were going away to do anyhow but we had not increased the water so much if it had not been for this increase. But the cities were going to pay the double price for sanear the finance of the water department thing that did not make us to him just.

Kelley, IID; the IID supports that what it did in 2005 was in accordance with right and appropriate. Both parts will exhibit again his arguments to the court in San Diego in date for determining and in the only thing that if they have agreed up to this moment is in saying that they should leave that the magistrate decides the future of this case.

Which were brought to the Mexican authorities with whom one works as a whole to eradicate this problem. We work with them span to span to have a balance because the violence that happens on the border not only fond to the traffickers or to the frontier patrol fond of the community. In spite of the increase that is brought at national level in Yuma Arizona a decrease was seen in incidents against this federal agency.

They constructed encirclements both primarily and secondarily, barriers anti transport in major number because they saw a major number of illegal crossings. Since there shows us Official Quinn Palmer of the Patrol Fronterizaa the violence against the agents it is for the frustration of the traffickers of not being able to deposit to the country of an illegal way that because this year there joined about 13 miles of primary encirclement and any miles of barriers anti transport.

And it is planned that for February, 2008 the alargue is begun again so much of the primary encirclement as the barrier installation anti transport on the border of Mexicali and the county of Imperial.
