But when Crystal realizes that nothing they're doing is actually raising awareness of the issue, she decides to organize a HUGE benefit concert, and everyone agrees to pitch in and help (as long as the King doesn't have to perform)! "Crystal and King Benefit Concert: Part Two" - The "Don't Overfish the Big Pond" Benefit Concert is underway, and it's a HUGE success! But because there's so much to organize, Crystal never finds the time to rehearse her big finale - so when it's time for her to go onstage, she experiences something she's never experienced before - stage fright! Can the kids help Crystal get over her stage fright and get her back onstage, or will the King have to come out of "performance retirement" to help her out? Educational Objectives: Overfishing generally results in a dramatic depletion in the total amount of fish (i.e., biomass). Also, overfishing often causes smaller fish (the prey species of larger fish) to increase in number as the larger predators are removed. If aquatic ecosystems are given a chance to rebound, they often will, as long as the numbers of fish have not been depleted too far.	PBS	(S)	(CC)	DVI	#410H

These statistics tell us that anxiety touches all our lives...if not personally, then through our family or friends. What is anxiety? And what can be done about it? Symptoms range from mild to severe, rendering some people unable to function in their daily lives. How can those most affected overcome this challenge and regain their lives? Uncertainty: Why We're So Anxious About Anxiety presents an open discussion that addresses these questions and more, in an effort to heighten awareness, increase understanding, provide resources, and offer hope to those whose lives have been impacted by this mental health condition. 	<p>The Pteranodon Family, with the Conductor, have raced on land a few times and in the air against Thurston Troodon, but have never raced in the water! So, after Thurston shows up in his own souped-up, "state-of-the-art" submarine, the challenge is on! Buddy, Tiny, and Mrs. Pteranodon are with Mr. Conductor in the Dinosaur Train Submarine, racing across the great Western Interior Sea against Thurston, Shiny, Don, and Mr. Pteranodon! On the way, they meet a new species of marine reptile, Leo the Liopleuridon, who helps Thurston a little too much in the race. / but he doesn't have wings like his siblings do! For 4 seasons, Buddy has run along while his siblings fly, although sometimes they carry him. When Shiny complains that Buddy is getting too big to carry around Pteranodon Terrace, Buddy feels sad for a little while, then decides to do something about it - build himself his own set of wings! Our Pteranodon kids love this, and they get to work designing and engineering, starting with funny homemade versions, a try-and-fail sequence with some hilarious crashes and some success, leading up to a cool, Leonardo-esque set of mechanical wings. The wings work! Buddy can fly with his siblings, and they have a triumphant flying session. But in the end, Buddy misses being carried. "Who am I kidding? I'm not a Pteranodon! I'm a T. rex who really loves to fly!" Buddy goes happily back to the status quo. And even better, he knows what to do with his mechanical wings - he gives them to the Pteranodon kid with a stunted wing. We end with them all flying together, the neighbor kid joyfully flying Buddy's mechanical wings.</p>

When they arrive, the kids are AMAZED to see the huge sequoias, which are so tall, the kids can't even see the top! They try to form a ring around the trees by having the whole class hold hands, but they don't even get close to circling the tree. This makes Ari realize how tall trees are often wide at the bottom, which gives him the perfect idea for his tower: just make it wide at the bottom! Baby Steps - While Elinor and Ari are looking after Ari's baby sister, Miri, in the park, they decide they want to teach her how to walk. But, after they try and try again, Miri still can't seem to be able to walk. Meanwhile, Olive is determined to learn a new roller skate jump, but can't seem to get it. The kids finally realize that sometimes, you can't do things, because your body isn't ready yet. With this new knowledge, they help Miri stand, and Olive gets inspired to practice until she's ready to do her new move!</p>

	<p>The Pteranodon Family is excited to be going back to the "Classic in the Jurassic"! This time, it's a race between pterosaurs from each of the three Time Periods. The best part-all the family members will have a role to play in the race! Mom and Tiny will be in-air referees, Buddy and Don will do "play-by-play", and Dad and Shiny will man the start and finish lines. It's an exciting race as the pterosaurs fly between hanging vines, swoop through a canyon, push through a wind tunnel, slalom over and under branches, than carry food from a pond as they race to the finish line! Teddy Pterodaustro finishes first, but the race is contested when Remy Rhamphorhynchus (another competitor) protests that Teddy never retrieved a fish from the pond. Everyone is surprised to learn that the Perodaustro don't eat fish, they strain plankton through their bristle teeth. Teddy shows everyone how he does it to prove that he did indeed get food from the pond. Teddy is declared the winner! Buddy, Tiny and Mom are riding the Dinosaur Train when they bump into their old friend, Crystal Cryolophosaurus. She's on her way to visit King Cryolophosaurus down in Jurassic Antarctic and invites our family along. Mom and the kids jump at the chance, and upon arrival surprise King as he's singing a brand new song, Top Carnivore. King and Crystal's heartfelt reunion is marred when Crystal tries to convince a reluctant King to take this fantastic new song out on the road to share with his adoring Mesozoic fans. But King doesn't like leaving home and excuses himself to do some thinking. Buddy and Tiny follow and King sings a song called Good ol' Gondwana to explain his feelings about his home. Tiny has a great idea. King and Crystal can perform a live concert in Gondwana and invite dinosaurs from around the Mesozoic to attend! The concert is a huge success, and King is surprised and delighted when Crystal decides to stay there with him instead of going back out on the road.</p>

11:00a	Dinosaur Train Classic in the Jurassic - Air, Water and Land/Desert Day and Night	PBS	(S)	(CC)	DVI	#310H
	It's time for the "Classic in the Jurassic" - the Mesozoic Olympics! Today's "Air, Water and Land" contest is a three-part competition pitting teams consisting of a pterosaur and a crocodile from each Time Period against one another. Mrs. Pteranodon, Tiny and Shiny are recruited to help in one of the three "legs" of the race, while Buddy, Don and Dad watch from the stands. The competition's three "legs" are flying, swimming and a lap around a track. Early on, Team Cretaceous pulls ahead and hold onto its lead, until the wild card of the race is revealed: Team Triassic's croc, Effie Effegia, who shocks the crowd when she runs, and then sprints, on two legs! Effie wins the race, and her bi-pedal ability prompts many questions - and a healthy discussion -- about her features. Tiny is disappointed her team lost, but cheers up when reminded that she was part of "Classic in the Jurassic" history. While playing "Cold and Hot," a game they made up, the Pteranodon kids learn from Mr. Pteranodon that there might be more variety in the desert than they imagined. Their curiosity piqued, they plead for a trip to investigate the desert scene. Mr. Conductor tells them just how diverse plant and animal life can be in the desert. He happens to know a desert mammal: Fruitafossor. Upon disembarking from the Dinosaur Train, the Pteranodon kids meet Frankie Fruitafossor, a chipmunk-sized mammal. They quickly learn that their assumption that desert life was hot all the time and relatively uninhabited was incorrect. Come dusk, they find the desert hopping and crawling with life, as creatures emerge all over - mostly underground - where they hide from the blazing sun. Frankie gives our family a tour, including a peek at underground burrows he dug. Back on the desert floor, Don and the siblings can't believe how cold the desert has become. Nighttime in the desert is a different world than daytime! The family goes back to the Dinosaur Train to warm up and have a snack.

11:00a	Dinosaur Train Classic in the Jurassic: Ultimate Face-Off/Back In Time	PBS	(S)	(CC)	DVI	#311H
	<p>The "Classic in the Jurassic" games are back, and this time, it's the Ultimate Smackdown. Mr. Conductor explains the "wrestling" matchups from the three Time Periods are: T. Rex vs. Triceratops, Allosaurus vs. Stegosaurus and Zupaysaurus vs. Riojasaurus (dinos new to the Pteranodon clan.) Fears that competitors may get injured are allayed by the explanation of how the "Smackdown" works -- the best choreographed and most entertaining show wins! Morris Stegosaurus beats Alvin Allosaurus. When Ziggy Zupaysaurus goes up against Renaldo Riojasaurus, Mr. Conductor explains that Riojasaurus may be smaller, but he has a powerful tail and speed on his side. Then Boris the T. Rex loses to Trevor Triceratops. Tank and Buddy are thrilled-what a face-off! Once the judges tally the results, Team Cretaceous is declared the winner, and the fans love it! Buddy and Tiny wonder aloud whether the Triassic was the beginning of time, and if there was anything before the Age of Dinosaurs. So, to the Dinosaur Train they go where Mr. Conductor takes them back to the beginning of the Triassic Period to get some answers. In the Triassic, Buddy, Tiny, Mom and Mr. Conductor meet up with Erma Eoraptor who is happy to explore the "before the Triassic" question with them. Our group walks through a Pedestrian Time Tunnel (that's beyond the end of the train tracks) to get to the Permian Period, the time period immediately before the Triassic. There, they meet Deon Dimetrodon, who has never met a dinosaur or pterosaur before. Buddy and Tiny are amazed to learn that there are neither of these in the Permian Period (or earlier)! Deon marvels at our family's features - especially Tiny and Mrs. Pteranodon's wings. Deon shows our group around the hot and humid Permian, and he explains how his sail fin keeps him cool. Then Deon is delighted to experience the Mesozoic Era. He walks through the Pedestrian Time Tunnel with our group, and is blown away by the vegetation and the variety and size of dinosaurs. Another lifelong friendship is forged!</p>

11:00a	Dinosaur Train Zeppelin: Pangaea/Zeppelin: Crater	PBS	(S)	(CC)	DVI	#313H
	<p>When the Pteranodon kids decide to draw some maps, Don's map of one big land mass for "the whole Mesozoic" triggers a discussion on whether the Mesozoic is "one big place that's all connected" or comprised of a bunch of smaller, interconnected land masses. On the Dinosaur Train, the Conductor explains that millions of years ago there actually was just one big land mass called "Pangaea"! Then, over a long period of time, it started to drift apart and form separate, smaller landmasses, or continents. Our family can't believe it! The Conductor offers to take the Pteranodons up in the Zeppelin and through a Sky Time Tunnel, back to the time of Pangaea. At the Zeppelin Station, they meet up with Tricia Troodon, who helps pilot the Zeppelin on their journey. Once in the sky and through the time tunnel, our family is able to see Pangaea, the one giant landmass, just as it's starting to break apart. Then the family travels forward in time and views the continents separating more as oceans and seas move in between the land. Looking down at how their coastline looks in the Cretaceous Period, Buddy, Tiny, Shiny and Don all agree that seeing Pangaea breaking apart is one of the coolest things they've ever seen! As the Pteranodon kids are playing outside their nest, a few seedpods fall from a nearby tree, bonking Don on the head. This leads to a discussion about how far away things can fall from...maybe even from space?? Buddy hypothesizes that perhaps if a star came close enough, it could land on Earth! On the Dinosaur Train, the Conductor explains that things actually do fall from space. Big space rocks, called "asteroids," sometimes land on Earth, and when they occasionally do, they make a biiiiiig hole, called a crater. Don perks up at this-he'd love to see a crater! So the Conductor takes the Pteranodon Family up in the Zeppelin to see a giant crater from above! On the ground, they explore the crater and find fragments of "space rocks" from the former asteroid. As evening falls and our family flies back home, the Conductor and Mom and Dad surprise the kids with a picnic dinner on the Zeppelin-hurrah!</p>

After observing how important the water flow is to the fish, they decide to remove their walkway and build a log bridge that goes over the stream instead. Thinking About Blinking - Ari is crowned the blinking champion after winning a bunch of intense staring contests at school. As Elinor and Olive try not to blink themselves, Elinor wonders, "why do we need to blink?" The kids then set out to learn everything there is to know about blinking. 07:00a	Yoga In Practice The Art of Connection The art of yoga is really the art of connection. In our practices, we connect the body to the mind; the individual to the universal; the material to the spiritual-and, in this class, the front body to the back body. In yoga terms, the front body represents our individual ego and the back body represents an experience of oneness. Therefore, when we begin a pose from the back it invites us to connect to something bigger than ourselves. Moving from the back body requires us to integrate the strength of the front body. Today, we use this connection in Snowbird and Boat pose.	APTEX	(S)	(CC)	N/A	#111H
