Epidermolysis Bullosa or EB for short	Pickle Spotlight	07/09/2017	7 am	13:30	Talked with Shelby Gregory and David Cole about their son Lennon who is currently 4 months old but was born with EB a life threatening skin condition in which there is no cure. Lennon is among the 1 and 50,000 children that are born with this devastating skin condition each year. Children born with EB lack a critical protein that binds the layers of skin together. Without this protein the skin tears apart, blisters, and sheers off leading to severe pain disfigurement and wounds that never heal and affects

the body inside and out. We
talked about their son
Lennon and what they have
to deal with to make him
comfortable and bring
attention to this condition
that lacks any funding for
research because it affects so
few children
