Gentlemen:

I am writing to inform you of a minor problem that Channel 2 has apparently solved but Channel 7 and Channel 22 have not.

I use closed captioning because of slightly diminished hearing and vision. On the news broadcasts the captions appear over the bottom ribbon which lists emergency messages and/or closings and delays. Because of this the message is covered over and cannot be read. Channel 2 somehow has the emergency messages on a separate ribbon that is not covered by the captioning. I don't know how much control the station has over this but it seems to me that if one channel has fixed the issue then the other two local channels can find a way to do so also.

Thanks to all three of you for listening, and thank you Channel 2 for solving a problem for me.

Elsie M. Kleiner
