Streaming services are on the rise and older business models are falling. We discuss what the future of what the entertainment industry looks like and what it means for what we will see and consume.

**I'm Listening / March / Mental Health**

Guest: Victor Armstrong-AFSP, Steve Siple-AFSP Contributor

Contact: David Glover, Host

Airdate: March 17

Category: Mental Health

Description: Talk Away the Dark: How to Have Open and Honest Conversations with Men. Men are less likely to talk about their mental health struggles than women, which is why it's so important to break down stigma and open the door for these conversations. Community and friendships are huge protective factors against suicide. We seek to emphasize the critical role that asking someone directly about suicide plays in suicide prevention and demonstrate how to have supportive conversations with loved ones about mental health and suicide prevention.
