IMPORTANT MEDICAL TELEMETRY INFORMATION NOTICE

It is possible that certain medical devices in your facility may be affected by the operations identified herein. Please note, WVVH-CD in Southampton, NY will commence transmitting on or about January 16, 2020 on UHF Channel 18 (494-500 MHz) at a new transmitter site whose coordinates are specified below. With this letter we are informing you of the intent of the station to begin broadcasting on Channel 18 as authorized by the FCC.

As the guidance from the FDA notes:

Many medical telemetry devices are operated under 47 CFR Part 15 of the FCC regulations. These devices are secondary users of the radio-frequency (RF) spectrum. Licensed users such as television stations are the primary users. As a secondary user, your telemetry devices may be subject to interference from the primary user at any time, but must not cause interference with the primary user. If your telemetry devices are operating on frequencies licensed to a primary user, you need to be aware of the potential for interference and take any steps necessary to avoid device malfunctions due to interference

FDA Recommendations

To address potential interference problems for medical telemetry systems, FDA recommends that you work with the manufacturer of your telemetry systems to:

- Determine the channel /frequencies your telemetry systems use; and
- Consult the FCC table of allotments for DTV channels in your area.

If your telemetry systems are transmitting on channels that are or will be used by a local station, you should work with the manufacturer of your telemetry systems to:

- Change your telemetry channels to unused channels prior to the expected broadcast date to avoid interference

It is suggested that you should periodically check the FCC allotments to assure that those channels remain available.
