sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.
 In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
Both parts of bookends and piggy backs are combined;
Only the first member of a rotation group is shown, this may differ from what eventually is aired.
In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.
 In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.
 In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.
 In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of bookends and piggy backs are combined;

Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR

sss Indicates zero dollar spot is on locked log -s- indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -a- indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:
 Both parts of bookends and piggy backs are combined;
 Only the first member of a rotation group is shown, this may differ from what eventually is aired.

In the case of locked logs both parts of bookends and piggybacks are shown, each with their own AUR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUR
