Description:
Don Goldsmith, Ph. D joins us this hour. Goldsmith and co author Martin Rees have written The End of Astronauts, a book that weighs the benefits and risks of human exploration across the solar system. In space humans require air, food, and water, along with protection from potentially deadly radiation and high-energy particles, at a cost of more than ten times that of robotic exploration. Meanwhile, automated explorers have demonstrated the ability to investigate planetary surfaces efficiently and effectively, operating autonomously or under direction from Earth. Goldsmith has written more than a dozen books, including Exoplanets, The Runaway Universe, The Hunt for Life on Mars, Supernova, and, with Neil deGrasse Tyson, Origins. He has received lifetime achievement awards for astronomy education from the American Astronomical Society and for the popularization of astronomy from the Astronomical Society of the Pacific.
