1:47	SEGMENT 1: THE DEBATE ON INVASIVE SPECIES	8:11
	Synopsis: Many people are worried that non-native plants and animals are invading the U.S. and preventing native species from thriving. Each year, a lot of money and time is spent trying to rid the land of these aliens - often to no avail. But, are these species present because they're the only ones that can exist in that environment? Are some plants and animals actually helping to create a more diverse and robust ecosystem? And are some native species <i>really</i> native to the U.S.? Our guests offer up a different perspective on the invasive species debate. Host: Gary Price. Guests: Fred Pearce, science journalist, researcher, author of <i>The New Wild: Why Invasive Species Will Be Nature's Salvation</i> ; Tao Orion, permaculture educator, author of <i>Beyond the War on Invasive Species: A Permaculture Approach to Ecosystem Restoration</i> .
