aaa Indicates zero value spot is on locked log. - indicates zero value spot on unlocked log.

aaa Indicates announcement is on locked log. - indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

100% parts of broadcast are 100% locked are contained. Only the first number of a 4 digit group is shown. This may differ from what eventually is aired. In the case of locked logs each part of broadcast and 100%locks are shown, each with their own ALT.

The counts for each group indicate the number of spots where it was possible to establish an equivalent ALT.

aaa Indicates zero dollar spot is on locked log -> indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -> indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of uncheck log:

Only parts of line items and play lists are confirmed. Only the number of spots in group is shown. This may differ from what externally is shown.

In the case of locked log both parts of line items and play lists are shown, even with their own AUI.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUI.

aaa indicates zero dollar spot is on locked log - indicates zero dollar spot on unlocked log

aaa indicates announcement is on locked log - indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unstacked logs:

Both parts of broadcast and logback are contained. Only one part number of a broadcast is shown. This may differ from what eventually is aired. In the case of stacked logs, both parts of broadcast and logback are shown, each with their own AIR.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

See Indicates zero dollar spot is on locked log - Indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log - Indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

Both parts of broadcast and program length are confirmed. Data for the number of spots and program length is shown. This may differ from what originally is aired. In the case of locked logs both parts of broadcast and program length are shown, each with their own field.

The counts for each group indicate the number of spots where it was possible to establish an equivalent AUD.

See Indicates zero order spot is on locked log. - Indicates zero order spot on unlocked log.

aaa Indicates announcement is on locked log. - Indicates announcement on unlocked log. Note that announcements posted on actual contracts will only show as such after media has been applied to the spots.

See the rate of individual spots.

Only the first member of a program group is shown. This may differ from what eventually is aired, as the rate of locked logs both parts of line items and line items are shown, each with their own ALT.

The counts for each group indicate the number of spots where it was possible to establish an equivalent ALT.

aaa Indicates zero dollar spot is on locked log -> indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -> indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unclocked logs:

Both parts of linebreaks and payor breaks are combined. Only the first linebreak of a rotation group is shown. The rest of the linebreak group is shown. Each with their own ALC.

The counts for each group indicate the number of spots where it was possible to establish an equivalent ALC.

aaa Indicates announcement is on locked log - indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of locked logs:
Some parts of lockouts are paged back are confirmed.
Only the first member of a rotation group is shown, this may differ from what eventually is aired.
In the case of locked logs some parts of lockouts and pagedbacks are shown, each with their own AIR.
The counts for each group indicate the number of spots where it was possible to establish an equivalent AIR.

aaa Indicates zero dollar spot & on locked log -> indicates zero dollar spot on unlocked log

aaa Indicates announcement is on locked log -> indicates announcement on unlocked log. Note that announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of locked logs:

Spots of friends and jiggly jacks are combined.

Only the first member of a rotation group is shown. This may differ from what eventually is aired.

In the case of locked logs both parts of breakfast and jigglyjacks are shown, each with their own ALT.

The counts for each group indicate the number of spots where it was possible to establish an equivalent ALT.

sis indicates zero dollar spot is on locked log - indicates zero dollar spot on unlocked log

aaa indicates announcement is on locked log - indicates announcement on unlocked log. Note the announcements placed on actual contracts will only show as such after media has been applied to the spots.

In the case of unlocked logs:

With one of locked and one unlocked, both are confirmed. With one of locked and one unlocked, the one other from what eventually is aired.

In the case of locked logs both parts of broadcast are programmed, each with their own Alt.

The counts for each group indicate the number of spots where it was possible to establish an equivalent Alt.
