

On an ongoing basis, we maintain contact and confer with local government, civic, and business leaders, as well as members of the general public, about what they perceive as top-of-mind issues important to the communities we serve.

Recurring priority topics:

- Health care, particularly COVID-19 related
- Crime and substance abuse
- Employment opportunities, opportunities for young people, the labor pool, and availability of quality housing
- Education
- Health of the local retail economy

Area community leaders continue to express concerns relating to rural healthcare; workforce development and related industrial needs; infrastructure such as roads and bridges; substance abuse; and tax revenue supporting public services.

We strive to provide responsive and helpful programming. Further, we also work to educate and inform the people we are privileged to serve through a variety of public service announcements, local news coverage, community calendars, and other programs.
